

TABLE OF CONTENTS

1	Introduction	
1		
2	Objectives	
2	General Objective	
	Specific	2
2		
3	Area Description	
3.1	Location	3
3.2	History of the area	3
3.3	Topography	4
3.4	Slope	4
3.5	Drainage	5
3.6	Climate	6
3.7	Geology of Soil	6
3.8	Vegetation and Forest Cover	6
3.9	Forest Resource Data	6
3.9.1	Flora	6
3.9.2	Fauna	7
3.9.3	Relevant information on the different land cover types encompassing the JVA area	8
3.9.3.1	Open Forest	8

3.9.3.2	Brush/Shrub Land	9	
3.9.3.3	Annual Crop	9	
3.9.3.4	Perennial Crop	10	
3.9.3.5	Inland Water	10	
3.10	Demographic and socio-economic condition of the community	10	
3.10.1	Polpulation	10	
3.10.1.1	Barangay Candawaga	10	
3.10.1.2	Barangay Culasian	10	
3.10.1.3	Barangay Ransang	11	
3.10.2	Household population by barangay and the average household size in 2018	11	
3.10.3	Population composition by school age and sex for year 2018	11	
3.10.4	Dialect	11	
3.10.5	Socio-economic condition	11	
3.10.6	Potential tourism site	12	
3.10.7	Status on the production and consumption of basic food items within the Municipality of Rizal	12	
3.11	Infrastructure and utilities	13	
3.11.1	Roads	13	
3.11.2	Barangay Halls	13	
3.11.3	Schools	14	
3.11.4	Health Care Unit/Basketball Court/Solar Dryer/Covered Court/Church	14	
3.11.5	Bridges	14	
3.11.6	Processing Facility	14	
3.11.7	Waste Management Facility	14	

3.11.8	Telecommunication Facilities	15
3.11.9	Electricity	15
3.11.10	Water Facilities	15
3.12	Environmental Information	15
3.13	Security	16
4	Development Plan	16
4.1	General Strategy	16
4.1.1	Choice of species	17
4.1.1.1	Choice of species for the hybrid coconut plantation	17
4.1.1.2	Choice of species for forest tree plantation & Enrichment	17
4.1.1.3	Choice of species for the production of agricultural crops	19
4.1.1.3.1	Perennial and annual crops	19
4.1.2	Silviculture for all product categories	19
4.1.2.1	Hybrid coconut plantation	19
4.1.2.2	Forest tree plantation	20
4.1.2.3	Agricultural crops	22
4.1.2.4	Inland water	22
4.1.3	Annual Development Program for All Product Categories	22
4.1.3.1	Areas to be developed and the activities relative to the hybrid Coconut Plantation	22
4.1.3.2	Areas to be developed and the activities relative to the development of forest tree plantation and implementation of enrichment planting	24
4.1.4	Development along inland water	28
4.1.5	Amendment/Plan Revision	28

4.2	Boundary Delineation and Maintenance	28
4.2.1	Infrastructure Development	28
4.2.2	Field Office, Nursery and Related Facilities	29
4.2.3	Proposed improvement within the JVA area	29
4.2.4	Permanent Improvements	30
4.2.4.1	Roads and Irrigation canals	30
4.2.4.2	Irrigation canal	31
4.2.5	Temporary improvements	31
4.2.5.1	Workers camp	31
4.2.5.2	Look-out towers	31
5	Nursery Operations/Nursery Work Program	32
5.1	Seedling production for the Hybrid Coconut Plantation	32
5.1.1	Seed Procurement	32
5.1.2	Nursery Operations	32
5.1.3	Seedbed Preparation	32
5.1.4	Sowing of Seed Nuts	33
5.1.5	Sorting or grading of nuts for removal from the seedbeds	33
5.1.6	Pricking-Off of Seedlings	33
5.1.7	Soil Mixing and Bagging	33
5.1.8	Seedlings at Hardening Bed	33
5.1.9	Culling of Seedlings (after pricking-off based on germination monitoring)	33
5.1.10	Seedling Disposal	33
5.2	Hybrid coconut plantation seedling requirements	34

34	5.3	Seedling production for the Forest Tree Plantation	
	5.3.1	Seed Procurement	34
	5.3.2	Nursery Operations	34
	5.3.2.1	Seedbed Preparation	34
	5.3.2.2	Collection and potting or bagging of soil	34
	5.3.2.3	Sowing of forest tree seeds	
35	5.3.2.4	Sorting or grading of seedlings for removal from the Seedbeds	35
	5.3.2.5	Pricking-off of seedlings	
35	5.3.2.6	Seedlings at Hardening Bed	
	5.3.2.7	Culling of Seedlings (after pricking-off based on germination monitoring)	
35	5.3.2.8	Seedling Disposal	35
	5.3.3	Forest tree plantation seedling requirements	
35	5.3.3.1	Enrichment planting seedling requirements	36
	5.3.3.2	SALT model seedling requirements	
36			
6	Plantation Establishment and Maintenance		37
	6.1	Hybrid Coconut Plantation Establishment and Maintenance	37
	6.1.1	Clearing/Brushing	37
	6.1.2	Establishment of Baseline	37
	6.1.3	Alignment and Staking	37
	6.1.4	Planting Design (based on the Philippines Coconut Authority (PCA) recommendation)	37
	6.1.4.1	Triangle Method for Flat Area	
37	6.1.4.2	Triangle Method for Sloping/Slanting Area	37
	6.1.5	Holing	38
	6.1.6	Pit-Hole Filling	38

	6.1.6.1 Application of Organic Filling Material on the Pit-Holes	38
6.1.7	Planting the seedling	39
6.1.8	Planting of Cover Crops	39
6.2	Establishment and Maintenance of the Plantation of Forest Trees	39
6.2.1	Land Preparation	39
6.2.2	Establishment of Baseline	39
6.2.3	Alignment and Staking	39
6.2.4	Planting Design	39
6.2.4.1	10m by 10m spacing	39
6.2.5	Holing	40
6.2.6	Pit-Hole Filling	40
6.2.6.1	Application of Organic Filling Material on the Pit-Holes	40
6.2.7	Planting the seedling	40
6.2.8	Forest Tree Plantation Protection and Maintenance and Protection	40
6.3	Cultivation and maintenance of Agricultural Crops	41
6.4	Planting/Development Schedule	43
7	Plantation Maintenance and Protection	44
7.1	Maintenance and Protection of Hybrid Coconut Plantation	44
7.2	Maintenance and Protection of the Forest Trees Plantation	45
7.2.1	Maintenance and Protection of Forest Trees Plantation	45
7.3	Forest Protection	46
7.4	Maintenance and Protection of Agricultural Crops	47
7.4.1	Watering and weeding	47
7.4.2	Top dressing (fertilizer application)	47

8 Harvesting and Transport

.....	48	
8.1 Harvesting and transport of produce from the hybrid coconut plantation...	48	
8.1.1 Harvesting of Tender Nuts		
.....	48	
8.1.2 Harvesting of Mature Nuts for VCO		
48		
8.1.3 Harvesting of Coconut Sap		
.....	49	
8.1.3.1 Harvesting techniques		
.....	49	
8.1.4 Piling and hauling or transporting of nuts and sap harvested from LFPC plantations to the processing facility.....		
49		
8.1.4.1 Transportation of Nuts		
49		
8.1.4.2 Transportation of Sap		
49		
8.2 Harvesting at Forest Tree Plantations		
.....	49	
8.2.1 The Harvesting Process		
.....	50	
8.3 Harvesting of agricultural crops		
.....	50	
8.3.1 Harvesting Processes		
.....	51	
8.3.2 Harvesting Methods		
.....	51	
8.3.2.1 Harvesting of leafy vegetables		
51		
8.3.2.2 Harvesting of grain and seed crops		
52		
8.3.2.3 Harvesting of Vegetable Crops		
52		
8.4 Harvesting of fruits of fruit bearing trees		
53		
8.4.1 Important considerations in harvesting fruits of fruit bearing trees		
.....	53	

9 Coconut Processing and Packaging

.....	53
9.1 Processing of virgin coconut oil	
.....	53
9.1.1 Cold extraction processes	
.....	54
9.1.2 Chilling, freezing and thawing method	
55	

9.1.3	Centrifugation method	55
9.1.4	Fermentation method	55
9.1.5	Aqueous enzymatic extraction method	56
9.1.6	Hot extraction process	56
9.2	Coconut sap sugar production	56
9.2.1	Conversion of sap into syrup	56
9.2.2	Conversion of syrup into granulated sugar	57
9.2.3	Sieving and drying of coconut sap sugar	57
9.2.4	Removal of unfit raw material	57
9.2.5	Control of pest and other contaminants	57
9.2.6	Packaging	57
9.2.7	Handling, storage and transport	57
9.2.8	Equipment and utensils	58
10	Yield and Production	58
10.1	Yield per hectare and yield projection for all products	58
10.1.1	Whole matured nuts	58
10.1.2	Coconut sap	58
10.1.3	Forest trees	59
10.2	Financial analysis/projected cash flow	59
11	Monitoring and Quality Control	62
11.1	Project's implementation monitoring	62
11.2	LFPC's internal monitoring and evaluation	62
11.3	Managerial strategies to ensure efficiency of the Company's	

	workforce	
	62	
11.4	Corporation's strategy to ensure quality management, quality service, and quality production	63
12	Forest Management and Records Systems	
		64
12.1	Demarcation of the hybrid coconut plantation	
12.2	Records management	64
13	Market and Utilization	
		65
13.1	Market information	
		65
13.2	Utilization	
		66
13.3	Description of the identified market, demand, existing supply, and the would-be gap on the existing supply	
		66
13.4	Related trends vis-à-vis the demand and supply of organic coconut syrup, coconut sugar, virgin coconut water extracted from the 2016-2024 Transparency Market Research (TMR)	
		67
13.4.1	Coconut syrup	
		67
13.4.2	Coconut sugar	
		68
13.4.3	Virgin coconut water	
		69
14	Community Involvement/ Development	
		71
15	Organization	
		72
15.1	Company Organization	
		72
15.2	Project Organization	
		72
16	Financial Aspects	
		72
16.1	Costing's including assumptions for the nursery operation for a 1 hectare	

	coconut plantation	72
16.2	Costs	
74		
16.2.1	Development cost	74
16.2.1.1	Cost for coconut seedling and forest tree Seedling production including inputs for perennial and annual crops	74
16.2.1.2	Plantation Establishment	75
16.2.1.3	Post Development Phase (Protection and Maintenance)	76
16.2.1.4	Boundary delineation and Forest protection	76
16.3	Sources of Finance	77
16.4	Returns	
16.5	Financial analysis	78
16.6	Sensitivity Analysis	78
17	Cost/Benefit	
17.1	Community Cost Benefit	79
17.1.1	Community costs	79
17.1.2	Community Benefits	79
18	Environmental Cost Benefit	
18.1	Environmental Costs	80
18.2	Environmental Benefits	80
19	Annexes	
...	81	

19.1	Maps	
81		
19.1.1	General location with technical descriptions (survey data)	82
19.1.1	Different Thematic Maps	
	Topographic Map	83
	Slope Map	84
	Land Use Cover Map	85
19.1.3	Map Showing Rivers/Creeks	86
19.2	20 % Tree inventory	87
19.2.1	Area sampled of tree inventory	
19.2.2	Inventory Report	90
19.2.2.1	Tree Inventory Tally Sheet	
19.2.3	Panoramic View photographs and Geo-Tagged photographs of Timber Inventory, survey of Inland water and demarcation of 20 meters area at both sides from river bank within the Upland Agroforestry Project	149
19.3	Biodiversity Assessment of Center for Conservation Innovation (CCI)	154
19.4	Organizational Chart	156
19.5	Summary of plans and schedules indicating all activities and physical Targets for the 25-year duration of the JVA	157

List of Tables

Table 1 Slope Per Barangay

4

Table 2. A distribution of Slopes Ranges in the Municipality of Jose P. Rizal, Palawan, 2006

5

Table 3. Area of the buffer zone of the principal rivers in the JVA area	5
Table 4. Breakdown of the different physical aspect and land use classes of the JVA area	6
Table 5. Conservation status of birds surveyed	7
Table 6. The CCI's personnel involved in the biodiversity assessment	8
Table 7. Number and volume of trees inventoried	8
Table 8. Species group, diameter class, total no. of trees inventoried and corresponding volume	9
Table 9. Household population	10
Table 10. Population composition by school, age and sex	10
Table 11. Crops usually planted by the farmers	12
Table 12. No. of sari-sari stores per Barangay	12
Table 13. Natural attractions per Barangay	12
Table 14. Status of the production and consumption of basic food items in the Municipality of Rizal	13
Table 15. Road networks in the host Barangays	13
Table 16. Location of Barangay Halls	13
Table 17. Schools in Barangay Ransang	14
Table 18. Existing facilities in its host barangay	14

Table 19. Bridges in the host barangay	14
Table 20. Management strategies for each land use	16
Table 21. Species-site matching guide	18
Table 22. Potential perennial and annual crops for agro-forestry activities in the JVA area ...	19
Table 23. Present land use and vegetative cover of the JVA area	23
Table 24. Breakdown of the easement or buffer zones suitable for coconut plantation.....	23
Table 25. Development plan for the establishment of hybrid coconut plantation.....	24
Table 26. The breakdown of the 476.6 hectares for forest tree plantation and 15 hectares enrichment planting.....	25
Table 27. Development plan for the establishment of forest tree plantation and enrichment planting.....	25
Table 28. Breakdown of the 54.19 hectares easement or buffer zones suitable for enrichment planting.....	26
Table 29. Development plan for the development of agro-forestry farms and cultivation of agricultural crops.....	27
Table 30. Existing infrastructure development within and outside the JVA area	28
Table 31. Proposed infrastructures	29
Table 32. Roads constructed within the host barangays	31
Table 33. Seedling requirements for the hybrid coconut plantation	34

Table 34. Seedling requirements for the forest tree plantation	36
Table 35. Seedling requirements for the enrichment planting component	36
Table 36. Seedling requirements for the SALT model	36
Table 37. The method, distance and density of coconut seedlings planted per hectare on a flat and sloping area.....	38
Table 38. The organic materials and the dosage applied in Triangle Method for Sloping/Slanting Area.....	38
Table 39. The organic materials and the dosage applied in a 10m by 10m spacing	40
Table 40. Perennial and annual crops to be grown in the JVA area.....	42
Table 41. The schedule of planting of coconuts, forest trees and agricultural crops in the areas categorized as brush/shrub, open forest, inland water, perennial crop and annual crop.....	43
Table 42. Coconut products and the yield per hectare.....	58
Table 43. Percent allocation of each coconut products (whole nuts & coconut sap) versus the total hectares planted with coconut.....	58
Table 44. Financial analysis/projected cash flow	60
Table 45. The appraisal processes	63
Table 46. ODM parameters	63
Table 47. Concerns to be recorded by the Company's administrative department	64

Table 48. Assumptions on the potential market at the local, national and international levels.....	66
Table 49. Level of management and their corresponding duties and responsibilities	72
Table 50. Nursery operation for one (1) hectare coconut plantation.....	73
Table 51. Costs for nursery operation/seedling production for coconut and forest tree species including inputs for perennial and annual crops.....	74
Table 52. Physical development, area, costs and the extent of the area for the coconut and forest tree plantations and related crops.....	75
Table 53. Costs of protection and maintenance for all types of crops.....	76
Table 54. Boundary delineation and forest protection activities within the JVA area.....	76
Table 55. Forest protection activities within the JVA and adjacent area.....	77
Table 56. Summary of the activities and allocations.....	77
Table 57. Financial analysis (mio peso or what?)	77
Table 58. Sensitivity analysis	77
