To all DENR Climate Change Focal Persons and GAD Focal Persons

Good day!

We are pleased to share with you the streaming link for the Adaptation Fund Podcast Series: Building Climate Resilience.

Members of the Adaptation Fund (AF) discuss the importance of sharing lessons learned, experiences and successful models in addressing the impact of AF projects. As the urgency of climate change has increased, the importance for gathering and disseminating useful knowledge or replicating successful projects has also risen. While knowledge management has always been a key component of AF-funded projects, it has evolved further in recent years since the development of the Fund's medium term strategy in 2018. Ms. Dengel and Ms. Gomes coordinate a suite of knowledge products, including themed publications, e-learning modules, case studies, learning grants, and both virtual and physical events.

Adaptation Fund Podcast Series: Building Climate Resilience

Episode 4: Knowledge and Sharing for Adaptation

[Listen now](#)

Guests: Cristina Dengel, Knowledge Management Officer, Adaptation Fund, and Alyssa Gomes, Knowledge and Projects Analyst, Adaptation Fund

Host: Matt Pueschel, Communications Officer, Adaptation Fund

Members of the Adaptation Fund (AF) discuss the importance of sharing lessons learned, experiences and successful models in adaptation to help further the impact of AF projects. As the urgency of climate change has increased, the importance for gathering and disseminating useful knowledge that can lead to scaling up or replicating successful projects has also risen. While knowledge management has always been a key component of AF-funded projects for more than a decade, it has evolved further in recent years since the development of the Fund's medium term strategy in 2018. Ms. Dengel and Ms. Gomes discuss the Fund's growing suite of knowledge products, including themed publications, e-learning modules, case studies, learning grants, and both virtual and on the ground knowledge events.

About the Adaptation Fund

Since 2010, the Adaptation Fund has committed nearly US\$ 830 million for climate change adaptation and resilience projects and programmes, including over 120 concrete, localized projects in the most vulnerable communities of developing countries around the world with 28 million total beneficiaries. It also pioneered Direct Access and Enhanced Direct Access, empowering countries to access funding and develop localized projects directly through accredited national implementing entities.
