Overview: The fourth episode of *Nickel Initiative: Talks and Webinars Series* will feature the launch of PNIA's 2020 Sustainable Development Goals Report entitled “Global Goals. Local Actions. Sustainability as Our Way of Life.” As an industry, PNIA is progressively looking for ways on how to

improve the design, implementation, monitoring and evaluation of its social development, environment protection and inclusive economic development programs. The goal is to ensure that these investments and initiatives generate meaningful and sustainable impact to its host communities and the country's economy. Aligning with the UN SDGs is the clear and logical next step for PNIA as these universal goals provide a clear direction and roadmap on how all sectors of society can synergize efforts towards the elimination of all forms of poverty, to reach the furthest behind first, and to create sustainable, resilient communities.
