MA. LOURDES G. FERRER, CESO IV
Regional Executive Director, DENR MIMAROPA
Department of Environment and Natural Resources
1514, L and S Building, Roxas Boulevard, Manila.

Dear **Director Ferrer**:

We would like to express our gratitude for giving us permission to conduct a site survey for the Long Term Evolution Fourth Generation (LTE 4G) base station on January 28, 2021.

Consequently, the DENR MIMAROPA building is found to be a suitable location to establish the base station. Thus, we are now preparing the Structural Investigation Report. In this regard, **we would like to request for your building's Structural Plans** for our team to compute the tower reaction if the building can support the tower.

Further, if the building can bear such equipment, we would like to request permission for the establishment of the LTE 4G base station in your building for the full implementation of the Project.

Should you require additional information, your staff may contact Ms. Clarisse Anne Arena at these numbers 8876-3454 local 3301/3303 or through email at safephpmo.dilg@gmail.com.

Thank you and looking forward to your favourable response.

Very truly yours,

LEAH RIZAH E. ANDRES
Supervising Project Officer
