Good day,

I am Joshua Jireh Maher, a student at Palawan State University, and undergoing a research entitled ASSESSMENT OF HEAVY METAL CONCENTRATION OF SOIL IN BARANGAY MAOYON, PUERTO PRINCESA CITY USING CONTAMINATION FACTOR. I am writing to inquire about the soil quality guidelines in the Philippines. Is it possible to acquire data about the standard concentration of heavy metals in soil? I have contacted the DA, DENR office in Puerto Princesa, BSWM, EMB, and MGB, there were no data present. Is it safe to say that the Philippines has no standard regarding heavy metal concentration in soil? Any help would much be appreciated. Thank you and have a nice day.

Best Regards
