Dear Sir or Madam,

Our company Michael Bauer Research GmbH produces and offers worldwide market data (e.g. purchasing power data) and matching postal and administrative GIS layers (digital boundary maps).

Amongst others we also offer data for the Republic of the Philippines.

For this reason I have a data request: Is it possible to provide me with a Layer or Map (preferably a Shapefile) of all Barangays in the Philippines?

It would be much appreciated.

Best regards,

Luca Beisenwenger
