

## MEMORANDUM

TO : **Directors**  
Bureaus and Attached Agencies

**Regional Executive Directors**  
DENR Regional Offices

FROM : **The Undersecretary**  
Finance, Information Systems and Climate Change

SUBJECT : **REQUEST FOR PROPOSAL FOR THE GREEN- GREY DESIGN  
CONCEPT DEVELOPMENT**

DATE : May 24, 2021

This has reference to the request of the Conservation International (CI) for proposals to carry out the Green-Grey Infrastructure Philippines Design Technical Consultancy. The consultancy primarily aims to develop ten (10) green-grey design concepts through a series of facilitated workshops with representatives from each of the 10 municipalities where the concepts are being developed. The technical workshops with municipal engineers and planners will provide a venue to co-design and develop the green-grey design concepts.

This approach is beneficial in that it:

1. facilitates ownership of project designs by each municipality leading to statements of intent to seek funding to design and build the green-grey projects;
2. overcomes barriers of travel and data collection caused by COVID-19; and
3. provides additional national training and capacity building for green-gray engineering climate adaptation strategies.

Attached herewith is the Request for Proposal which contains all the necessary information for interested offerors. Interested parties should submit a proposal for the anticipated agreement by sending an email with both the Technical and Cost Proposal to [marine@conservation.org](mailto:marine@conservation.org) by June 9, 2021 11:59 pm PDT (UTC-06:59). Queries can be submitted to the same email address by May 28, 2021 and written responses by CI will be posted by June 1, 2021.

For your information and guidance.
