Greetings!

This is to inform you that one of the schools in the province of Marinduque is currently having a hard time disposing of hazardous laboratory waste. Some of the wastes can no longer be identified as they were accumulated years ago from past laboratory experiments. As far as I know, there were no hazardous waste transporters and/or TSD in the island province. In this regard, may I know what immediate actions should be taken to resolve this matter?

I look forward to hearing from you soon. Thank you very much.

Truly yours,
Ronnel Nolos
