28 April 2022

Dear Mrs. Lomerlyn E. Claudio,

**RE: NATURE BASED PROJECTS IN THE PHILIPPINES**

It is our honored privilege to write to you with regards to the above-mentioned subject matter and take this opportunity to thank you for the opportunity given to our local representative – Mr. Christian Mack to meet with Marilyn R. Limpiada and her team to initiate the conversation.

In line with the Philippines carbon emission reduction target to 75% by 2030, the projects shall also support the Government's agenda of carbon emission reduction through regenerative agriculture, habitat restoration or nature conservation projects.

Upon presenting our project proposal, we are now interested to identify area of interest such as mangroves, peatlands, forest lands, or wetlands particularly in Palawan. As previously mentioned such project shall support the Government's agenda of carbon emission reduction. For these area in particular, nature conservation and potentially restoration would be the main activity. For such project to be successful, we shall also work with locally established communities to support our efforts, whether in terms of conservation or for regenerative agriculture.

The benefit of such project can be considered on several level, from a clear impact on the reduction of CO2 for the country, economically through the opportunity to create local employment and empower and support local communities.

Mr. Christian Mack will be traveling to Manila on the first or second week of May, and we would appreciate the possibility to meet you or your representative. We would also request the possibility to meet with your OIC for Palawan in particular to identify the potential land, as we are prepared to travel to Palawan within the same time frame.

We are eager to invest in the country and ready to sign a MOU upon identifying the appropriate land for such project.

Your consideration and assistance in this regard is greatly appreciated.

**Rina JUGURNAUTH**  
**Director**
