Respectfully submitting the updated version of our proposal for the institutionalization of Data Management, Mapping and Operations Center. In this revised version, the observations and recommendations of KISS personnel who conducted ICT Inventory and Needs Assessment last September 2022 were incorporated. Further, the undersigned has also initiated meeting with Philippine Space Agency for possible collaboration of high-resolution and time-lapse satellite images. We also initiated meetings with tech companies for outsourcing of available technology at the market nowadays for this project.

As to the building construction, preliminary procedures such as consulting with the Architect and Civil Engineer were made. The documents for posting at Philgeps website are now under review of TWG for Infrastructure of the Bids and Awards Committee of this office. We are expecting that the initial building structure shall be constructed by end of this year.

With this, the undersigned is humbly requesting for your continued support in this endeavor.

For your consideration.
