Good day!

Let us elevate the mission of responsible mining together in the upcoming Virtual Stakeholders' Forum happening from Feb. 10-11, 2022.

Join us as Mines & Geosciences Bureau (MGB) brings together partners and stakeholders from the mining industry, national and local government bodies, academe, media, civil society, and more in a 2-day event to tackle the most recent policies and developments in mining and to hear from the nine recipients of the 2021 Presidential Mineral Industry Environmental Awardees (PMIEA). Participants are invited to join for an informative and engaging discussion with policy experts from MGB and with PMIEA awardees who will share best practices in elevating the nationwide mission of responsible mining.
