

February 8, 2022

Ms. Lormelyn E. Claudio, CESO IV
Regional Executive Director (OIC)
DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES – Region IV-B
Calamba City, Laguna

THRU: ALL MIS/IT Officer of Field Office Region IV-B

Dear Ma'am Claudio,

Greetings!

Comspec has been in the systems integration business for 20 years now, focusing on Information and Communications Technology (ICT), Safety and Security, Audio-Visual (AV) solutions, and emerging technologies. The company continues to build strong relationships with its clients from various industries and from various regions.

Even before the pandemic, government enterprises have constantly upgraded their technologies. With a reliable network infrastructure, government enterprises have more leeway to maximize new technologies especially with the new generation of digital natives and tech-savvy users. With this and the current protocols brought about by the pandemic – skeletal workforce, work-from-home, and others, organizations must also ensure that their data is secure. We at Compsec can help with this transformation and enable organizations and enterprises to reach their full potential through innovative solutions and emerging technologies.

With this, we would like to formally invite you and representatives of your esteemed organization to: ***GOVERNMENT ENTERPRISES, Technologies and Solutions***, a virtual event happening on **March 1, 2022, Tuesday, 1:30 PM – 4:30 PM**. Attached in this letter is our company's profile, and a copy of our event invitation and program.

To register, kindly fill up the following registration form:

<https://forms.gle/2122eGZP5p7jBD4N9>

We look forward to meeting you virtually through this event. For any questions or concerns, please feel free to contact me at aubenito.comspec@gmail.com and / or 0917-109-6799.

Yours truly,

Alvin Pebenito
Sales Specialist
