January 12, 2022

MA. LOURDES G. FERRER, *CESO III*
Regional Executive Director
DENR MIMAROPA

Dear **Dir. Ferrer:**

Pursuant to E.O. 138, the National Government Agencies (NGAs) and Local Government Units (LGUs) are mandated to prepare their respective Devolution Transition Plans (DTPs). NGAs shall design and deliver capacity development (CapDev) interventions, which shall form part of the CapDev supply to facilitate devolution. LGUs, on the other hand, shall prepare their CapDev Agenda that will define the CapDev demand to transition to the functions, services, and facilities for full devolution and deliver services and results to local communities.

Consistent with Section 9 of E.O. 138, the Department through the Local Government Academy (LGA) shall oversee CapDev provision for LGUs and develop appropriate mechanisms to ensure efficient utilization of government resources, including those from non-government experts and partners available in the CapDev supply and leverage these to meet the priority CapDev demand by LGUs.

In view of the foregoing, this level facilitated the conduct of various activities to come up with the initial consolidated capacity development interventions requirements and offerings, to wit:

- Regional Roll-out of LGU Segmentation Results
- Individual LGU CapDev Analysis and Provincial and Regional Consolidation
- Service Provider CapDev Offerings and Expert Inventory
- In-house expert directory updating

As such, we are pleased to share with you the **Regional Consolidation of Capacity Development Interventions Demand and Supply** based on the analysis of the LGU segmentation and CapDev needs and submission of CapDev services of various providers. The said document may serve as an initial guide/reference in mapping out activities to assist the LGUs in our region as they transition to full devolution.

Thank you and more power.

Very truly yours,

WILHELM M. SUYKO, *CESO IV*
Regional Director
