Dear Sir/Madam:

This webinar is in line with the implementation of the Capacity Building on Measurement, Reporting and Verification (MRV) of Climate Change Mitigation Phase 2 being facilitated by the DENR Climate Change Service (CCS) through the Climate Change Information and Technical Support Division (CCITSD). The overall goal of this program is to develop the Measurement, Reporting and Verification (MRV) system for NDC mitigation measures in the Waste and Industrial Processes and Product Use (IPPU) sectors spearheaded by the EMB, through support being provided by the Partnership to Strengthen Transparency for co-Innovation (PaSTI) in order to track progress towards achievement of goals set in the NDC and to highlight mitigation efforts made by the private sector.

The objective of this activity is to introduce private sector participants with specific examples of GHG emission calculations in their respective sectors. Several companies from Japan will be invited to the workshop to demonstrate the calculation method with sample data sets. The intended participants are from government agencies (national and local) and the private/business sector. In particular, it shall comprise representatives from the EMB Central Office Divisions/Sections, Climate Change Focal Persons/GHG Inventory Teams from the EMB and DENR Regional Offices, as well as partners from the industry associations and business organizations, DENR Offices and some national government agencies.

In this regard, we would like to invite you and/or your technical staff to the webinar. We would highly appreciate to kindly immediately send back to us the attached duly accomplished Confirmation Slip, for our reference, please.

Thank you very much.

CLIMATE CHANGE SERVICE (CCS)
