1	PENRO Document Action and Tracking System (PDATS)	<p>The Document Action and Tracking System (DATS) was developed to automate the current process of DENR-PENRO Marinduque in recording and tracking internal and external documents' movements. A central procedural system of document recording and tracking through digital means introduces increased security and authenticity concerning document status, and reduces the risk of human error or tampering in handling documents. The DATS also reduces the loss or misplacing of documents by effectively tracking or tracing the chain of custody and whereabouts of the document.</p> <p>Basic Features of the System</p> <ol style="list-style-type: none">1. Computerized recording and tracking all incoming and outgoing documents2. Automatically computes the time consumed on and after action/s have been taken3. Attached documents per transaction4.
