PRS92 data

I hope this email finds you well. I'm currently working for a company that is exploring methodologies in converting and updating the CRS of cadastres to PRS92 and we are looking for existing data to compare results to, as well as methodologies involving conversion of coordinate systems to PRS92.

In that regard, I would like to ask if there is any available cadastre data or ground data that is projected to PRS92. If so, would it be possible to ask for such data from you or from any other sources you can recommend. Thank you very much in advance.
