**SUBJECT :** REPORT OF THE FIRST SEMESTER CY 2022 BIODIVERSITY  
MONITORING SYSTEM (BMS) CONDUCTED WITHIN  
MARINDUQUE WILDLIFE SANCTUARY (MWS).

**Date :** March 7, 2022

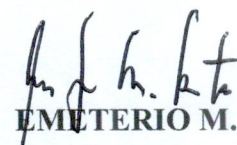

Respectfully submitting is the First Semester CY 2022 Biodiversity Monitoring System (BMS) Report conducted on February 17-18, 2022 within Marinduque Wildlife Sanctuary (MWS) situated at Brgys. Masalukot & Tambangan, Sta. Cruz and Brgy. Tumagabok, Boac, Marinduque.

The Biodiversity Monitoring System (BMS) was regularly conducted semi-annually within Marinduque Wildlife Sanctuary (MWS) with the following methods undertaken e.g. Focus Group Discussion (FGD), Photo documentation and 2- kms. transect walk established in the area.

Per data gathered from the different activities of BMS, it was confirmed that the continuous development of forest vegetation and wildlife resources, can be achieved through the participatory management and protection by the Community Monitoring Group (CMG) with the assistance of the local government units from the provincial, municipal and barangay. Likewise, active participation of the academe will additionally led to expand environmental awareness among tenured migrants and stakeholders in the community.

For information and record.
