### Invitation: Fundamentals of Strategic Planning and Execution Training Workshop & Designing and Implementing a Monitoring and Evaluation System Workshop

Many strategy implementations fail because of a lack of monitoring and control. Often an effective planning and control system is missing. Without timely and accurate management information it is impossible to assess the progress of the strategy implementation effort. Further, an effective implementation starts in strategic planning. There are 5 most common challenges in executing a strategic plan (according to [www.cumanagement.com](http://www.cumanagement.com)): poor goal setting, lack of alignment, inability to track progress, people not connected to the strategy, and no measurements or leading indicators.

Allow us to help you become an agile organization through the following workshops (via ZOOM):
