Respectfully submitted is the report on the inspection and monitoring of the CBFM-CARP Project CY – 2022 of Bantoto - Abaroan Farmers Multipurpose Cooperative (BAFARMAI). The project is in entitled as Agroforestry Plantation and a combination of fruit trees and vegetables with Lagundi Honey Production.

During monitoring the PO are continues collect for wildlings of mahogany meanwhile, that there are no funds downloaded by our office yet. The PO have produced additional 1,000 potted mahogany seedlings and about the Agri - Silvi crop they are 1,000 Banana suckers and 1,000 pineapple suckers ready for transplanting in planting site although not yet completed based on WFP.

The PO's of BAFARMAI is waiting for the download of Mobilization fund to start the conduct of site preparation because the association has no funds to use for the activity.

RECOMMENDATION:

1. That the PO counterpart must apply the hardening-off process that the seedlings can adapt to adverse condition on the planting sites;
2. That the PO must transfer the Abaca to the planting site for an initial accomplishment while waiting for the mobilization fund;
3. To apply Bayanihan system in order to start the site preparation by planting activities while we are still at rainy season and
4. Invite other PO members to be beneficiaries of CARP Project for 2022 and for the additional required number of seedlings to be produced.

The undersigned MEO will continuously monitor and supervise the project activities to ascertain the completion of the project.
