"The Medium-Term Fiscal Strategy of this administration seeks to attain short-term macro-fiscal stability while remaining supportive of the country's economic recovery and to promote medium-term fiscal sustainability. Furthermore, and more importantly, fiscal policy aims to bring together the National Government's resources so that these are mobilized and utilized in order to gain the maximum benefit and the high multiplier effects for our economy.

Measurable medium-term macroeconomic and fiscal objectives include the following headline numbers. These are based on forecasts that are consistent with the guiding principles of coherence of strategies, policy discipline and fiscal sustainability. xxx

It is therefore a forward-looking document that extends beyond the traditional three-year horizon to reach six (6) years, coinciding with the six-year coverage of the Philippine Development Plan (PDP) 2023 to 2028. xxx

I have instructed the NEDA to coordinate with other agencies and work on the Philippine Development Plan for 2023 to 2028 and to submit to me the complete blueprint and progress of its implementation not later than year-end." - (Excerpts from PBBM SONA 2022)

The Mandanas-Garcia ruling fully transfers or devolves the delivery of basic services to LGUs, stemming from a 2013 petition made by Governor Mandanas and former Bataan Governor Enrique Garcia, Jr., together with other local elective officials, before the Supreme Court (SC) on LGU shares of the Internal Revenue Allotment (IRA). The SC affirmed the ruling in 2018, giving the LGUs a just share of all national taxes collected and not only from the Bureau of Internal Revenue (BIR) effective 2022. LGUs get their IRA from 40% of the National Internal Revenue Taxes collected by the BIR. With the SC ruling, LGUs are projected to increase the IRA by 27.16%.

With the implementation of the Mandanas-Garcia ruling effective this year, Pres. Ferdinand Marcos, Jr. has formed a team that will look into issues of devolution and decentralization of the functions of the local and national government, to be headed by the DILG.

*SUBJECT TO CONFIRMATION

"We are entering an age of exponential adoption of technology. It is the Fourth Industrial Revolution.

This will be characterized by the infusion of technology into almost every facet of our daily lives. xxx.

The mission of our Department of Information and Communications Technology is to identify and utilize these innovations to improve governance. It has the daunting task now of transforming our government into an agile bureaucracy that is responsive to the needs of the public, provide good and solid data to ensure informed decision-making, as well as allow secure and seamless access to public services. xxx.

As I am here today addressing the legislature, allow me now to propose legislation that we would like you to pass in support of these programs:

1. National Government Rightsizing Program (NGRP)

A reform mechanism that seeks to enhance the government's institutional capacity to perform its mandate and provide better services, while ensuring optimal and efficient use of resources.

Compared to previous government reorganization efforts, the NGRP will entail a comprehensive strategic review of the functions, operations, organization, systems and processes of the different agencies, and massive and transformational initiatives in agencies concerned, such as mergers, consolidation, splitting, transfer, and even the abolition of some offices. The rightsizing efforts will also involve the conduct of a comprehensive strategic review of functions, programs and projects that will cut across various agencies." - (Excerpts from PBBM SONA 2022)
