Dear Friends of the Environment:

Isang mapayapa at luntiang Pilipinas!

On behalf of the Scientific and Organizing Committee, I am pleased to invite you to submit an abstract for the Waste No More 2023 Conference this coming November 27-29, 2023 at the Sky Hall Seaside, Cebu City, Philippines.

Waste No More 2023 is a great way for researchers to disseminate their work. Our Presenters benefit from the opportunity to meet other researchers, who otherwise they will not meet, to comment on their work, give some helpful suggestions, and see what additional issues are still there to address, and identify further its strengths and weaknesses. You can also hear what others are working on while keeping up to date. Discussions following a talk can lead to future collaborations with fellow researchers, as well as, international and private organizations. It is often that the discussion continues after the session ends or at the lunch or dinner table.

We will be happy to provide an invitation letter should you require one. Please do not hesitate to email or text/call via WhatsApp or message at FB or send a message directly from the conference website. Please visit the conference website for more information [SCIENTIFIC INFO | Waste No More 2023](#). Please submit your abstract online only. [Submit Abstract | Waste No More 2023](#).

Looking forward to hearing from you and welcoming you to Waste No More 2023.

Respectfully,

Grace Garcia
Conference Director
