

Tubbataha Management Office

Tubbataha Reefs Natural Park & World Heritage Site

26 April 2023

LORMELYN E. CLAUDIO, CESO IV
Regional Executive Director
DENR- MIMAROPA Region

Dear RED Claudio,

Seabird is one of the important biological indicators of reef health in Tubbataha. Their population is monitored annually to determine the status and adapt management actions accordingly. This year, the Tubbataha Management Office will conduct the annual seabird census trip on 7-14 May 2023.

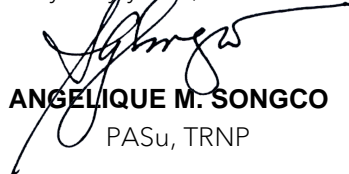

Another space opened for our annual seabird census trip. We write to invite **one of the marine park rangers of Apo Reef Natural Park** to join the said trip. This will be a great opportunity for him to learn about seabird management and to share and learn lessons with the marine park rangers of Tubbataha.

Thank you very much for your support!

Very truly yours,

ANGELIQUE M. SONGCO
