Attn: Lormelyn E. Claudio, CESO IV

Hello po, my name is Maricar Francisco a mother of three ages 9yr, 6yr and 3 month old. We live in Purok Cansilayan, Bato Palawan.

We are seeking your help for protection of our health and well-being.

There is an industrial plant for the making of asphalt right on our property line, they operated for 6 months last year and made us all very sick. My husband a foreigner helped me to stop them.

It is the TN Ramos Corp. and were operating in the Malayapaya Sound protected land zone in Cansilayan without any permits. After our Mayor and our local DENR said they could not remove them We contacted Joe Salino director of EMB and they sent a team out to investigate. The corporation received several violations and a temporary shutdown notice was issued.

It has been 10 months and still they have not moved but rather are processing the permits and making preparations to operate.

We are desperate to stop them because of the devastating affects to our health!

How can they be allowed to operate so close to a residential home with minor children? We bought this property before they came and started construction and there was no warning or discussion with us about it.

Is the health of our children not important? We have tried for a year contacting several agencies and still no help!

We are asking what can be done to stop them from operating next to our house?

Thank you po

Sincerely,

Maricar Francisco
