Message

Governments and communities are currently stuck in a vicious cycle where the financial cost of disasters is rapidly rising while funding for recovery and reconstruction are stretched to their limits. This has been especially true for nations, whose main productive sectors have been gravely affected by the COVID crises. The ongoing pandemic and the lessons learnt from it only prove how important it is to address the resilience gaps now before another big disaster strikes.

This year's celebration is themed, **"Boosting the Country's Recovery with Informed Decisions, Better Policies."** The theme signifies the importance of evidence-based policy- and decision-making in implementing responsive plans and programs to accelerate economic recovery and growth. The celebration aims to promote, enhance and instill awareness and appreciation of the importance and value of statistics in the different sectors of society and to elicit the cooperation and support of the general public in upgrading the quality and standards of statistics in the country.

In line with this, the DENR-PENRO Marinduque proudly presents this **2022 ENR Information and Statistics**, as this Office emphasizes the critical role of statistics in crafting the most appropriate decisions and policies needed to boost recovery efforts. As the country's recovery continues to take off, the public and private sectors both play important roles by providing and producing the correct and right data, actively participating in economic activities, and making informed decisions from relevant information.

The ENR Information and Statistics has been prepared annually by this Office to provide basic and updated statistical data information on Environment and Natural Resources in Marinduque province. Much of the data were obtained from the various sectors of Forestry, Lands, Environment, Protected Areas, Wildlife, Coastal and Marine, Mines and Geosciences, Research, Administrative and Support Services. Likewise, other data were generated from local government units, other government agencies, academe, non-government organizations and civic groups. The reliability of data depend on how the data from various entities/organizations are collected, processed, stored, documented and disseminated.

We hope that this ENR Information and Statistics will convey to our stakeholders from the private sectors, the academe, civil society, and other government entities the information and data they need as well as to showcase our accomplishments.

IMELDA M. DIAZ
OIC - PENR Officer

DENR VISION

A nation enjoying and sustaining its natural resources and a clean and healthy environment.

DENR MISSION

To mobilize our citizenry in protecting, conserving, and managing the environment and natural resources for the present and future generations.

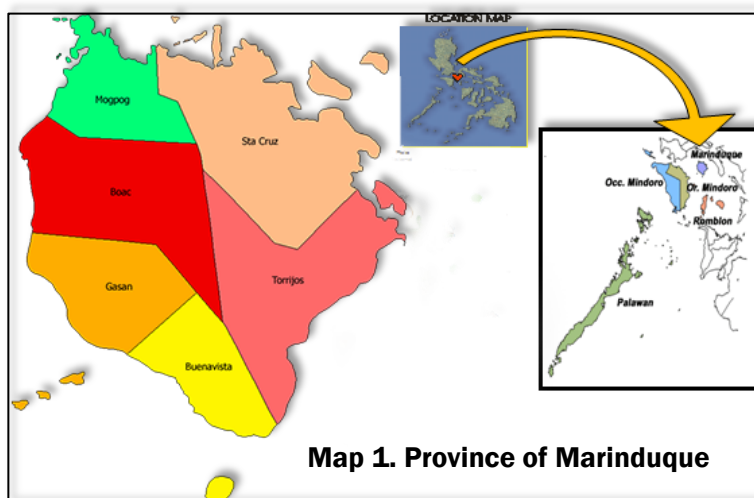

DENR MANDATE

Executive Order No. 192 mandates the DENR to be the government agency primarily responsible for the conservation, management, development, and proper use of the country's environment and natural resources, specifically forest and grazing lands, minerals resources, including those in reservation and watershed areas and lands of public domain as well as the licensing and equitability sharing of the benefits derived therefrom for the welfare of the present and future generations of Filipinos.

DENR QUALITY POLICY

"Malinis na kapaligiran at mayamang kalikasan para sa buong sambayanan. "

Marinduque is a heart-shaped island which lies between the Bondoc Peninsula at the south-eastern part of Luzon and the island of Mindoro. It is bounded by four bodies of water, on the north by Tayabas Bay, northeast by Mongpong Pass, South-east by Tayabas Strait, and Sibuyan at the south.

Marinduque was made into a sub-corregimiento in 1590, under the jurisdiction of Mindoro, when the two islands were detached from the administrative control of Bonbon (later Balayan), Batangas. In 1671, Marinduque was made into a province, later a sub-province again.

Later on May 1, 1901, the United States-Philippine Commission passed Act No. 125 which created the Province of Marinduque and established the provincial government at the municipality of Boac, its capital.

A year later by virtue of Act No. 423, dated June 23, 1902, the US-Philippine Commission annexed the island of Mindoro, including the island of Lubang (then separated from the Province of Cavite), to the Province of Marinduque, Boac remained as the capital of the consolidated provinces. Four months after, on November 10, by virtue of an Act No. 499 Marinduque was made a part of Tayabas (now Quezon). Later on May 17, 1907 under Act No. 1649, the Commission made Marinduque as sub-province of Tayabas. And finally, on February 21, 1920, Act No. 2880, sponsored by then representative Hon. Ricardo Paras, Jr. separated the sub - province of Marinduque from Tayabas and re-established the former province of Marinduque. That Law was signed by American Governor Francis Burton Harrison.

B. ELEVATION AND SLOPE

Approximately 83% of the total land area is hills and mountains while 17% are built-up areas, coastal, swamp and marshy areas. The highest peak of the island is Mt. Malindig with elevation of 1,157 meters above sea level located in the southern tip of the island. The landscape of the province is classified with the following six (6) categories of slope: 0%-3%, 3%-8%, 8%-15%, 15%-18%. The land is suitable to paddy cultivation with slope less than 3% which is about 10% of the total. The topographically steep land with slope over 8% accounts for 38% of the whole land would remain as reserved land for soil conservation and water retention and the respective areas can be shown as follows:

Table 2. Land Slope Classification

SLOPE	RATIO	EQUIVALENT LAND AREA
0%	5.8%	5,564
0% - 3%	10.3%	9,880
3% - 8%	9.0%	8,633

C. COASTAL AREA

The coastal area of Marinduque takes up about 241,500 hectares with a water area of 2,700.97 square meters and a coastline length of 223.34 kilometers. Out of 218 barangays of the province, 83 of which are coastal barangays.

D. MINERAL RESOURCES

The island province of Marinduque benefited well from deposits of copper before the incident of tailing took place in 1996. Other minerals found in the rich soil of the island are iron, manganese, limestone, gold and silver.

E. CLIMATE

The type of climate in Marinduque according to the Modified Corona's Classification of Climate is categorized as Type III climate having no very pronounced maximum rain period, with a short dry season lasting only from one to three months, either during the period from December to February or from March to May. This climate type resembles type I since it has a short dry season.

F. MEAN ANNUAL TEMPERATURE

The annual mean, maximum and minimum temperatures were calculated at 27.0, 32.9 and 22.3 degrees centigrade, respectively.

G. RELATIVE HUMIDITY

Humidity average is 78% year-round. The average monthly relative humidity varies between 71% in March and 85% in September. The combination of warm temperature and high relative and absolute humidity give rise to high sensible temperature throughout the archipelago. It is especially uncomfortable during March to May, when temperature and humidity attain their maximum levels.

H. MEAN ANNUAL RAINFALL

The annual mean, maximum, and minimum temperatures were calculated at 27.0 °C (80.6 °F), 32.9 °C (91.2 °F) and 22.3 °C (72.1 °F) respectively. Humidity average is 78% year-round with an average annual rainfall totaling 2,034.6 mm (80.1 inches).

I. NATURAL HAZARDS/ CONSTRAINTS

Marinduque province is prone to Natural Hazards like Hydro Meteorological, flooding caused by heavy rains brought by typhoons, mud flows, drought, earthquakes, liquefaction, landslide and erosion, tsunami and climate change.

5. Housing

Marinduque being known to its geographical location and a 4th class province is considered to have a low to middle standard of living. It can be observed in the tables below the distribution of households in a specific type of tenure from the CBMS data of 2014-2016.

CBMS results of 2014-2016 showed that the province of Marinduque has a total of 53,321 households, 1,686 of which live in public places with rented/owned house or lot, or rent-free house or lot without consent of the owner. There are still numbers of housing units in the rural barangays which used bamboo, sawali and nipa as prevalent construction materials in outer walls of their houses.

Almost all (99.1%) of the occupied housing units were single houses. Other structures were duplex (0.5%) and multi-unit residential (three units and more) (0.4%). In 2010, the median floor area was 23.3 square meters, higher than the 20.6 square meters recorded in 2005. This meant that half of the occupied housing units in Marinduque had a floor area of below 23 square meters. Most of the occupied housing units had a floor area of either 10 to 19 square meters (26.3%), 20 to 29 square meters (20.5%), 30 to 49 square meters (16.8%), and less than 10 square meters (16.3%).

Furthermore, the proportion of occupied housing units with roof made of galvanized iron/aluminum accounted for 68.8% while 30.1% had concrete/brick/stone as the construction materials of the outer walls. These figures were up by 37.8 and 19.6 percentage points, respectively from that of the 2005 figures.

As to the combination of materials used for roof and outer walls, 29% of occupied housing units were made of galvanized iron/aluminum for roof and concrete/brick/stone for outer walls. This figure was higher from the 9.1% reported in the 2005 census.

J. HEALTH

Aside from the three (3) hospitals: the Marinduque Provincial Hospital (MPH), the Santa Cruz District Hospital (SCDH) and the Torrijos Municipal Hospital (TMH), the province has eight (8) Rural Health Units to accommodate emergency needs of the patients in the far-flung barangays.

All three (3) hospitals and eight (8) Rural Health Units are equip with outpatient department, dental facility, ward/indoor facility, laboratory, pharmacy, ECG services, radiology/X-ray facility, Material Recovery Facility and Waster Disposal Facility.

All municipalities maintain and operate each own Rural Health Units (RHUs) and the 218 barangays in the province has Barangay Health Stations being maintained by Barangay Health Workers and Barangay Officials. Similarly, there are eight (8) RHUs and 37 Barangay Health Stations, 11 Public Dental Clinics, 26 privately-owned Medical Clinic, and 16 privately-owned Dental Clinics.

1. Health Manpower

The inadequacy of hospital manpower is the common concern of the three hospitals. Shortage of health personnel especially in far flung areas contributed to the high mortality and morbidity rates in the province. There is a need to capacitate the existing personnel and upgrade skills on hospital operations and management.

3. Print/Media Organizations

One registered Local Print/Media Organization named “*Ang PULSO ng Bayang Api*” (*Pahayagan ng Mulat at Nakikisangkot na Marinduqueños*) which is circulated once a month. Other Southern Tagalog newsprint is “*The MIMAROPA Sunrise*” published every month.

There are registered Local and National radio groups ready to provide assistance during emergencies such as the Regional Emergency Assistance Communication-Morion Group and Marinduque Amateur Radio Net (DX1 - MAR) groups.

Marinduque News Network (MNN) also known as Marinduque News is a one stop news and information portal related to the island province of Marinduque, which broadcast (online and offline) via social media and Lucky Seven cable channel.

4. Telecommunications

The province has postal, telephone, telegraph/telefax, mobile phone and freight services. Postal and telegraph services are provided by the Philippine Postal Corporation and Bureau of Telecommunication. Telephone and internet services are served by PLDT connecting the municipalities of Boac, Gasan, Mogpog and Santa Cruz.

Mobile/Cellular phone signals are accessible throughout the province by SMART, and GLOBE companies.

Internet WiFi connections and services are also offered by SMART Bro and GLOBE Tattoo. Other communication services available in the province are two (2) private cable TV companies and the Dream Satellite TVs plus four (4) AM-FM radio stations.

M. TOURISM AND CULTURE

At first glance, Marinduque may seem insignificant. Perhaps because of its small land area. But being the center most part of the Philippines, not just because of its heart shaped feature, the island province of Marinduque has a lot of wonders to offer, that will swallow interests of the many. From its culture and traditional practices to the picturesque natural destinations, Marinduque as one of the provinces in MIMAROPA tagged to be the “Destination of Choice” is waging the island province’ tourists’ destination of culture and nature attractions.

The province of Marinduque is blessed with hypnotic sceneries from plain lands to mountaintops down to the waters. The unique culture and tradition like Putong and Moriones Festivals has placed Marinduque in the Philippine Tourism Map. As the Luzon Datum Origin of the Philippines located in Barangay Hinanggayon in the municipality of Mogpog, Marinduque has all the right to claim to be heart and center of the Philippine archipelago. The central part of the province maintains its potential to be developed as the Eco Park.

With reference to RA 8022, the municipalities of Boac, Buenavista and Torrijos, were declared as Tourist Zones had it not lapsed into law in 1995. Coupled with the Marinduque Wildlife Sanctuary covering more than 900 hectares found in the municipalities of Boac, Buenavista, Gasan, Santa Cruz and Torrijos, ecotourism is now being viewed as potentially economy booster of the province.

Part II: Organization's Input

DENR Mandate (E.O. 192, s. 1987)

The Department is the primary agency responsible for the conservation, management, development, and proper use of the country's environment and natural resources, specifically forest and grazing lands, mineral resources, including those in reservation and watershed areas, and lands of the public domain, as well as the licensing and regulation of all natural resources as may be provided for by law in order to ensure equitable sharing of the benefits derived therefrom for the welfare of the present and future generations of Filipinos.

To accomplish this mandate, the Department shall be guided by the following objectives:

1. Assure the availability and sustainability of the country's natural resources through judicious use and systematic restoration or replacement, whenever possible;
2. Increase the productivity of natural resources in order to meet the demands for forest, mineral, and land resources if a growing population;
3. Enhance the contribution of natural resources for achieving national economic and social development;
4. Promote equitable access to natural resources by the different sectors of the population; and
5. Conserve specific terrestrial and marine areas representative of the Philippine natural and cultural heritage for present and future generations.

DENR Vision

A nation enjoying and sustaining its natural resources and a clean and healthy environment.

DENR Mission

To mobilize our citizenry in protecting, conserving, and managing the environment and natural resources for the present and future generations.

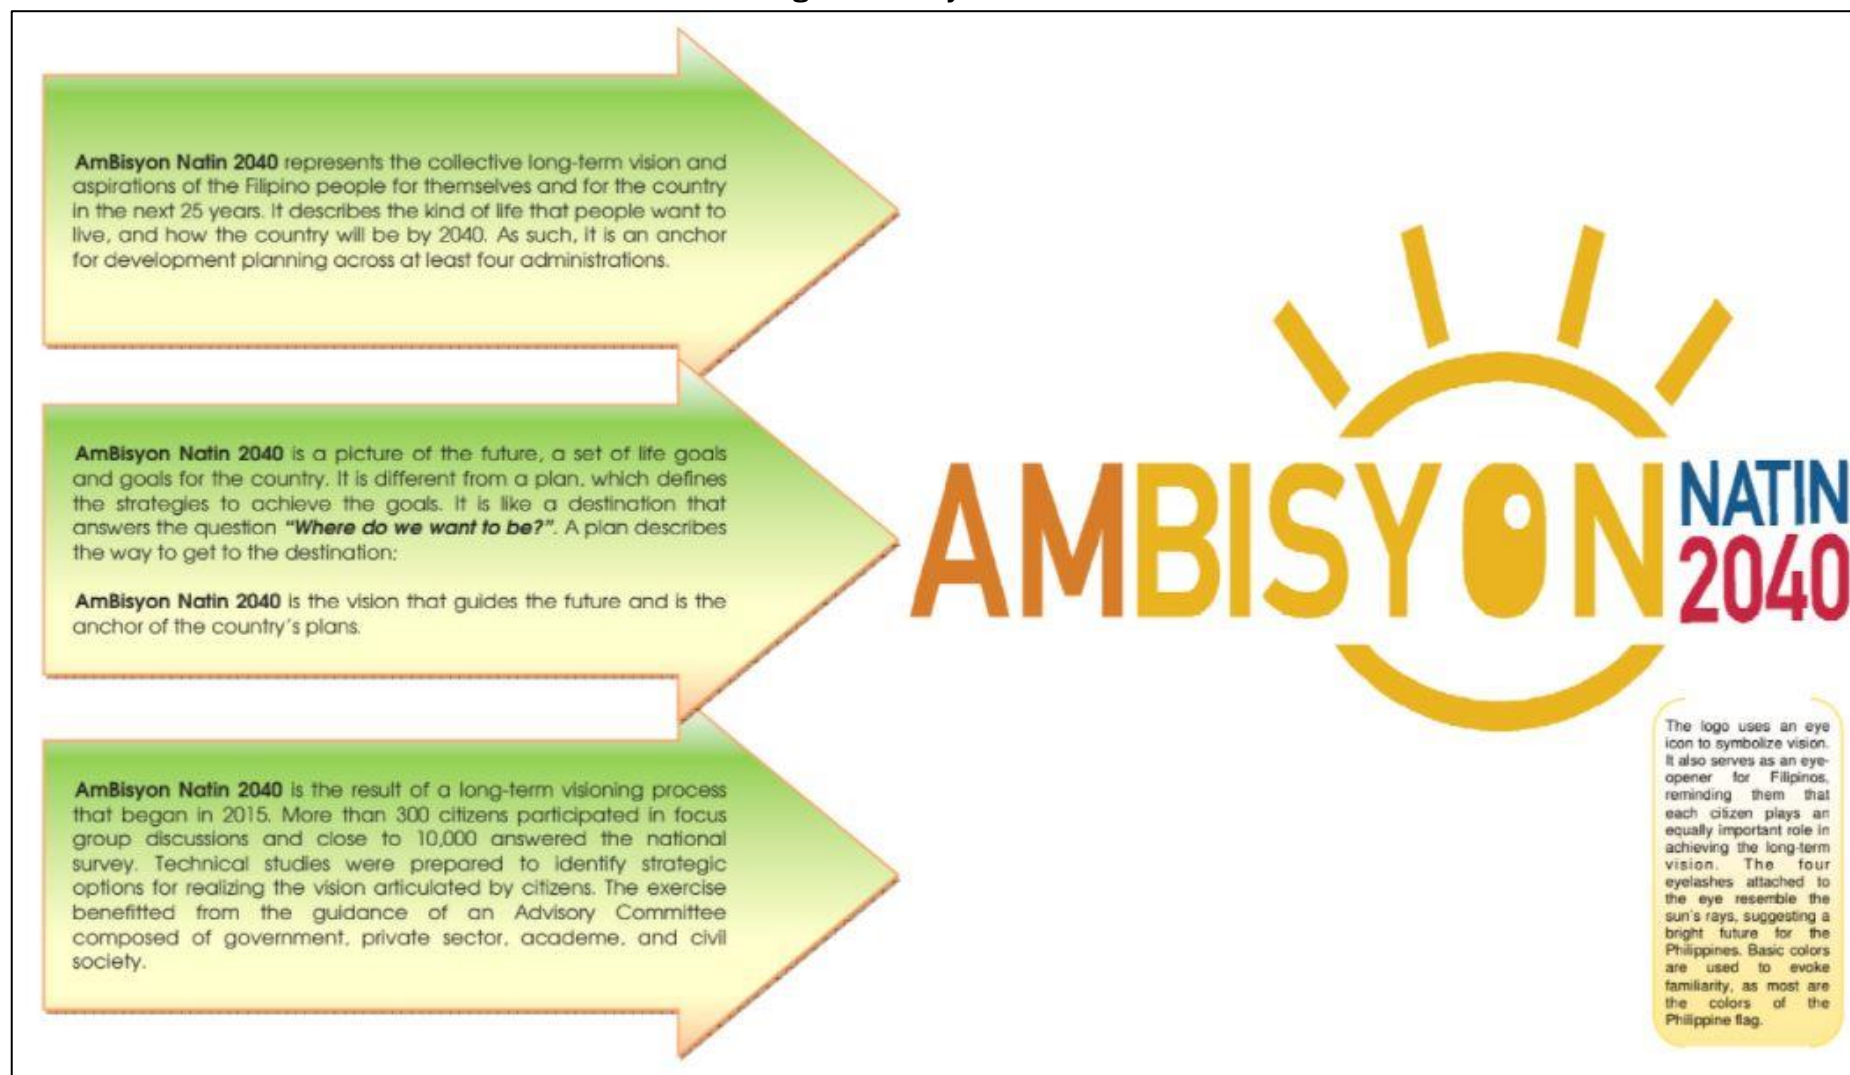

Image 5. The life of all Filipinos in 2040: *Matatag, Maginhawa at Panatag na Buhay*

The life of all Filipinos in 2040: *Matatag, Maginhawa at Panatag na Buhay*

By 2040, Filipinos enjoy a strongly rooted, comfortable, and secure life.

In 2040, we will all enjoy a stable and comfortable lifestyle, secure in the knowledge that we have enough for our daily needs and unexpected expenses, that we can plan and prepare for our own and our children's future. Our family lives together in a place of our own, and we have the freedom to go where we desire, protected and enabled by a clean, efficient, and fair government.

Filipinos are strongly rooted: *matatag*. Filipino families live together; there is work-life balance so that there is time to spend with family even for members who work. On weekends, families and friends enjoy time together in parks and recreational centers. It is a high-trust society with a strong sense of community. There are volunteer opportunities, and Filipinos spend time to serve the community, help others who are in need, and contribute to various causes.

Filipinos are comfortable: *maginhawa*. No one is poor, no one is ever hungry. Filipino families live in comfortable homes with the desired amenities and secure tenure. Families and friends are within reach because transport is convenient and affordable, and they can take a vacation together within the country and abroad. Children receive quality education so that they realize their full potentials and become productive members of society. Decent jobs that bring sustainable income are available, including opportunities for entrepreneurship.

Filipinos are secure: *panatag*. Filipinos feel secure over their entire lifetime. They expect to live long and enjoy a comfortable life upon retirement. There are resources to cover unexpected expenses, and there are savings. They feel safe in all places in the country. Filipinos trust their government because it is free of corruption and provides service to all its citizens equally.

Matatag	Maginhawa	Panatag
- Family is together - Time with friends - Work-life balance - Volunteering	- Free from hunger and poverty - Secure home ownership - Good transport facilities - Travel and vacation	- Enough resources for day-to-day needs, unexpected expenses and savings - Peace and security - Long and healthy life - Comfortable retirement

Note: There are discrepancies on the measurement of areas of the CSC Universe and Accomplishments due to the measuring device used. In the case of identifying the area of the CSC Universe, transit (theodolite) was used, while GPS device is used during the actual evaluation/assessment in the area. Transit (theodolite) is said to be less precise, unlike the GPS device.

PROJECT/ACTIVITY	BRIEF DESCRIPTION	PARTNER AGENCY/GROUP	LOCATION	DOST-MIMAROPA BUDGET	YEAR IMPLEMENTED
Eco-Friendly Septic System (Eco-Sep) for Improved Sanitation in Island Tourist Spot	The project was implemented to prevent any human and environmental harmful effects brought by ineffective waste disposal system in the developing tourist destinations in Marinduque such as the Hakupan Island. Specific Objectives: 1. To minimize waste water pollution in Hakupan Island; 2. To ensure the safety of marine life and people in the Island; and 3. To help protect the environment thru promoting the use of eco-friendly septic system and the organo minerals.	Botilao Tourism Service Cooperative	Hakupan Island, Botilao, Sta. Cruz, Marinduque	185,000.00	2018
Bioremediation of Mined-out Areas using Endemic Bamboo and other Forest Trees in Mogpog, Marinduque	The project adopted the Bioremediation Technology of UPLB-BIOTECH to rehabilitate mine-out areas in Mogpog, Marinduque. Forest trees were planted in baren lands affected by the mine tailings. The technology reduces the effect of heavy metal concentration in soils to that forest trees can grow more effectively. Eco-Friendly Septic System (Eco-Sep) for Improved Sanitation in Poctoy White Beach	The project was implemented to prevent any human and environmental harmful effects brought by ineffective waste disposal system in the developing tourist destinations in Marinduque such as the Poctoy White Beach. Specific Objectives: 1. To minimize waste water pollution in Poctoy White Beach; 2. To ensure the safety of marine life and people in the Island; and 3. PROJECT/ACTIVITY	BRIEF DESCRIPTION	PARTNER AGENCY/GROUP	LOCATION	DOST-MIMAROPA BUDGET	YEAR IMPLEMENTED
Coral Restoration Project for Marinduque	The project is an off-shoot of the previously conducted "Automated Rapid Reef Assessment (ARRAS)" of the coral covers of the Province in 2018. The results from these assessments showed that Live Coral Cover and Coral Reef Status varied greatly from location to location. Some areas like Barangay Ino in Mogpog and Barangay Bonliw and Cagpo in Torrijos had very exceptional and good live coral cover. But in areas like Barangay Bangbang in Gasan live coral cover is almost non-existent due to siltation and sedimentation along the coast. Moreover, High Priority Area for Management and Protection is recommended for identified areas of Torrijos and Mogpog while Low Priority Area for Management and Protection is recommended for identified areas of Gasan. Siltation and sedimentation are found to be the leading causes of coral degradation in the areas surveyed. From the fact stated above, the DOST-PSTC Marinduque made a series of dialogues with concerned LGUs and other government offices for a strategy to effectively manage the marine ecosystem of the province. The technologies developed by the DOST- Philippine Council for Agriculture, Aquatic and Natural Resources Research and Development (PCAARRD) on coral restoration using asexual reproduction specifically the "Corals of Opportunity (COP) and Coral Nursery Unit (CNU)" project is found to be useful in the plan of the Province to restore and have a sustainable marine ecosystem, thus this project. Part VII: National Statistics Month

About the National Statistics Month

The National Statistics Month (NSM) was first observed in 1990 pursuant to Presidential Proclamation No. 647 signed by then President Corazon C. Aquino on September 20, 1990, Declaring the Month of October of Every Year as the National Statistics Month.

The NSM celebration aims to:

1. promote, enhance and instill awareness and appreciation of the importance and value of statistics to the different sectors of society; and
2. to elicit the cooperation and support of the general public in upgrading the quality and standards of statistics in the country.

Statman - NSM Mascot

Each of the body parts of STATMAN, the mascot, represents a statistical symbol that is commonly used in statistical theory and its applications.

The **Head** symbolizes the sign **Sigma** σ which is used to denote standard deviation or variations in human endeavors.

The **Right Arm** symbolizes the sign **Sigma** Σ which is used to denote summation of society's dreams and aspirations.

The **Left Arm** and **Torso**, taken altogether, symbolizes the sign **Chi Square** χ^2 and is used to denote independence and objectivity of one's views and decisions while maintaining harmony with the government.

The use of the symbols as the **body parts of STATMAN** signifies coherence and unity between statistical theory and their various applications which include, among others, the generation, analysis and interpretation of data.

The picture depicted of the **STATMAN** in motion signifies the vision for and mission of the Philippine Statistical System, that is, '**Statistics in Action**' which simply means a system that is proactive and responsive to developments affecting the country and its products, in terms of statistical data series, used in governance, and in the conduct of our daily lives.
