The first of these is the *Journal of the American Medical Association* (JAMA), which has been the most influential of the medical journals in the United States. It was founded in 1883 and has since then published a wide range of medical research, including clinical trials, laboratory studies, and reviews of the literature. The JAMA is known for its high standards of scientific rigor and its commitment to the advancement of medical knowledge.

The second of these is the *New England Journal of Medicine* (NEJM), which was founded in 1812 and is one of the oldest and most respected medical journals in the world. The NEJM is known for its high standards of scientific rigor and its commitment to the advancement of medical knowledge. It has published many landmark studies, including the first randomized controlled trial of a drug in 1947.

The third of these is the *Lancet*, which was founded in 1823 and is one of the oldest and most respected medical journals in the world. The Lancet is known for its high standards of scientific rigor and its commitment to the advancement of medical knowledge. It has published many landmark studies, including the first randomized controlled trial of a drug in 1947.

The fourth of these is the *British Medical Journal* (BMJ), which was founded in 1847 and is one of the oldest and most respected medical journals in the world. The BMJ is known for its high standards of scientific rigor and its commitment to the advancement of medical knowledge. It has published many landmark studies, including the first randomized controlled trial of a drug in 1947.

The fifth of these is the *Annals of the New York Academy of Sciences* (ANAS), which was founded in 1917 and is one of the oldest and most respected medical journals in the world. The ANAS is known for its high standards of scientific rigor and its commitment to the advancement of medical knowledge. It has published many landmark studies, including the first randomized controlled trial of a drug in 1947.
