MEMORANDUM

**FOR : The Regional Executive Director
DENR - MIMAROPA Region**

**THRU : The OIC, Assistant Regional Director
for Technical Services**

FROM : The In-Charge, Office of the PENR

**SUBJECT : SUBMISSION OF THE REPORT ON ASIAN
WATERBIRDS CENSUS FOR CY 2023 IN THE
PROVINCE OF MARINDUQUE**

Respectfully submitting the report on the conducted Asian Waterbirds Census in the Province of Marinduque this CY 2023. The activity was joined by various volunteers from academe, local government units and representatives from DENR – MIMAROPA Regional Office.

Due to the weather and water levels in the sites identified for AWC, the count as of this year was much lower than that of last year. However, there are still species which are notably present and high in number such as the Philippine Wild Duck (*Anas luzonica*).

The importance of migratory birds and wetland areas was disseminated to increase awareness of the local community.

Please see attached photos, charts and tables for further reference on the conduct and result of the activity.

For information and record.

"For and in the absence of the PENR Officer"

ENGR. CYNTHIA U. LOZANO
Chief, Technical Services Division
In-Charge, Office of the PENRO

January 31, 2023

MEMORANDUM

FOR : The OIC, PENR Officer
THRU : The Chief, Technical Services Division
The Chief, Conservation and Development Section
The Chief, Biodiversity Conservation Unit
FROM : The Staff, Biodiversity Conservation Unit
SUBJECT : ASIAN WATERBIRDS CENSUS FOR CY 2023 IN THE PROVINCE OF MARINDUQUE

Relative to the sub-program of the Wildlife Resources Conservation, the Asian Waterbirds Census (AWC), which is the annual census of waterbirds every January, was conducted in the Province of Marinduque from January 24 to 27, 2023.

The identified sites included Barangays Tamayo and HUPI in the Municipality of Santa Cruz; Barangay Kay Duke in the Municipality of Torrijos and Barangay Capayang in the Municipality of Mogpog. The four (4) identified sites are all within the mangrove areas, two are operationalized fishponds while the other two are abandoned.

There was a total of 635 heads of various bird species observed during the activity in four (4) sites that were mentioned. Unexpectedly, of all the 21 species recorded, the Philippine Duck (*Anas luzonica*) has the highest number of count this year, and was observed most at Barangay Kayduke, Torrijos which always had the lowest count of species every year since 2017. On the other hand, it was the Black-winged Stilts (*Himantopus himantopus*) found in Barangay HUPI which topped the count based on species per barangay.

Based on the three-year trend as shown in Figure 2, there was a sudden drop of numbers in the total count of the Little Egrets (*E. garzetta*). The reason may be attributed to the gloomy and rainy weather, as well as the water level in the fishponds where they usually feed in the previous years. Species like Grey Plover (*P. squatarola*), Lesser - Sand Plover (*C. mongolus*), Grey - tailed Tattler (*H. brevipes*) and Common Sandpiper (*Actitis hypoleucus*, which were recorded last year were not observed this year on the same sites. However, the Pacific Golden Plover (*Pluvialis fulva*) was recorded in this year's census with a count of 32 in the operationalized fishpond located in Barangay Capayang, Mogpog. Along with the said species are the Whimbrel (*N. phaeopus*) and Greenshank (*T. nebularia*).

The total count of 635 this 2023 is much lower than the previous year's 1,627 heads. Factors such as water level which reduced the chances of the wetland birds to feed, and the rainy weather, resulted to the lesser appearance of the usual species that were seen in the AWC 2022. However, despite the weather status and state of the sites, species like egrets, whimbrels, stilts and wild ducks remained numerous and present every year. Moreover, the period of count was a week later than last year's activity.

The usual participants of the Annual Asian Waterbirds Census included representatives from Marinduque State College, Provincial Government – Environment and Natural Resources Office of Marinduque, LGU Santa Cruz, LGU Mogpog and PENRO Marinduque personnel. Representatives from APO Mandin, a non-government organization, Protected Area Management and Biodiversity Conservation Section (PAMBCS) and Coastal Resources and Foreshore Management Section (CRFMS) of DENR MIMAROPA Regional Office personnel also joined in this year's activity. The team coordinated with the barangay officials of the respective sites as courtesy call and informed them on the purpose of the activity.

Please see attached site maps, photos taken during the waterbirds census, AWC prescribed forms, graphs and charts showing the figures and variances on the present and previous counts.

For information, record and further instructions.

Greater Sand Plover <i>C. leschenaultii</i>	White-winged Black Tern <i>C. leucopterus</i>	
Oriental Plover <i>C. veredus</i>	Gull-billed Tern <i>Gelochelidon nilotica</i>	
Black-tailed Godwit <i>Limosa limosa</i>	Caspian Tern <i>Hydroprogne caspia</i>	
Bar-tailed Godwit <i>L. lapponica</i>	Indian River Tern <i>Sterna aurantia</i>	
Little Curlew <i>Numenius minutus</i>	Common Tern <i>S. hirundo</i>	
26 Whimbrel <i>N. phaeopus</i>	Black-naped Tern <i>S. sumatrana</i>	
Eurasian Curlew <i>N. arquata</i>	Black-bellied Tern <i>S. melanogaster</i>	
Far Eastern Curlew <i>N. madagascariensis</i>	Little Tern <i>S. albifrons</i>	
Marsh Sandpiper <i>T. stagnatilis</i>	Great Crested Tern <i>S. bergii</i>	
34 Greenshank <i>T. nebularia</i>	Lesser Crested Tern <i>S. bengalensis</i>	
Nordmann's Greenshank <i>T. guttifer</i>	Unidentified terns	
Green Sandpiper <i>T. ochropus</i>	Indian Skimmer <i>Rynchops albicollis</i>	
Wood Sandpiper <i>T. glareola</i>		
Terek Sandpiper <i>Xenus cinereus</i>		
Common Sandpiper <i>Actitis hypoleucus</i>		

USEFUL SITE INFORMATION: (please circle the relevant figures)

CONDITION OF WETLAND: 1 Wet (water present) 2 Totally dry, 3. Totally frozen

PROTECTION 1 By Government, 2 By Tradition, 3 Private Ownership, 4 Unprotected, 0. Unknown

THREATS AND USES: 0 Unknown, 1 None, 2 Sedimentation, 3 Excessive overgrowth of vegetation, 4 Cutting/clearance of vegetation, 5 Eutrophication, 6 Agriculture along drying margins, 7 Excessive cattle grazing, Pollution by: 8 domestic sewage, 9 solid waste, A industrial waste, B oil, C pesticides, D fertilizers, E Mining, F Hunting/trapping/poaching of birds, G Little fishing, H Large scale fishing, I Partial reclamation, J Complete reclamation, K Dam/barrage construction, L Tourism/recreation

TIME OF COUNT: START: 5:52 am

FINISH: 7:49 am

PARTICIPANT(S) NAME (S) AND ADDRESS(ES):

RANDY R. PANTOJA, PENRO - Marinduque
 DANTE L. DE LUNA, PG-ENRO Marinduque
 IRISH A. MENORCA, DENR - MIMAROPA
 RONALD S. ATIENZA, LDRRMO Mogpog

Asian Waterfowl Census (Site Form)

Please return to the National Co-ordinator, Asian Waterbird Census, Protected Areas and Wildlife Bureau, Quezon Avenue, Diliman, Quezon City(before the end of March)

COUNTRY:

PHILIPPINES

NAME OF SITE: **Capayang Mangroveswamp/ Fishpond**

DATE: January 27, 2023

ALTITUDE:

m above sea level

PROVINCE/STATE/PREFECTURE Marinduque

AREA:

50.00 (approx.)

ha/km²

NEAREST LARGE TOWN: Mogpog

CO-ORDINATES:

deg. **13°** min. **30' 2.54"** N/S

deg. **121°** min. **50' 55"** E

SITE CODE:

(For official use only)

WETLAND TYPE: (please circle the relevant figures)

- 0 Open seas, bays, straits
- 1 Estuaries, tidal mudflats, salt pans
- 2 Brackish or saline lakes, lagoons, salt pans
- 3 Rivers, streams, canals, drains
- 4 Freshwater marshes, flooded areas
- 5 Freshwater lakes, ponds
- 6 Reservoirs, barrages, tanks
- 7 Gravel pits, mineral workings, mining pools
- 8 **Fish ponds, shrimp ponds**
- 9 Grassland, arable land
- 10 Mangrove, nipah
- 11 Freshwater swamp forest, peat swamp forest

If any other type, please specify:

DESCRIPTION SITE: (please circle the relevant figures)

- a. Month of maximum flooding:
 - c. Source: 1. Local rains 2. River/stream **3. Sea** 4. Other 0. Unknown
 - d. Maximum depth of water in meters: m
 - f. Salinity: 1. Freshwater 2. Brackish 3. Saline 0. Unknown
 - g. Is the site: 1. Permanent 2. Temporary 3. Semi-permanent 0. Unknown
 - h. Vegetation cover: 1. None 2. Half area 3. Complete 4. Recently cleared 0. Unknown
 - i. Vegetation type: 1. Growing on bank 2. Submerged in water 3. Free floating 4. Floating-leaved rooted 5. Emergent 0. Unknown
 - j. Protection/conservation status: 1. By Government 2. By tradition 3. Private ownership 4. Unprotected 0. Unknown (Fishpond owner)
 - k. Fishing: 1. None 2. Little 3. Moderate 4. Large scale 0. Unknown
 - l. Hunting/trapping/poaching of birds: 1. None 2. Little 3. Moderate 4. Large scale 0. Unknown
 - m. Agriculture: 1. None 2. Little 3. Moderate 4. Large scale 0. Unrecorded
 - n. Cattle grazing: 1. None 2. Little 3. Moderate 4. Large scale 0. Unrecorded
 - o. Threats/uses: 0. Unknown 1. None 3. Excessive over growth of vegetation 4. Cutting/clearance of vegetation 5. Eutrophication 6. Agriculture along dry margins, 7. Excessive cattle grazing 8. Partial/complete reclamation 9. Dam/barrage construction 10. Tourism
- If any other type of threats/uses, please specify:
- p. Pollution by: 1. Domestic sewage 2. Solid waste 3. Industrial waste 4. Oil 5. Pesticides 6. Fertilisers 7. Mining
- If any other type of pollution, please specify:
- q. Active Conservation measures by: 0. Unknown 1. Local Government 2. National Government
 - 3. Managed by conservation group (including local community) 4. No management

ADDITIONAL COMMENTS:

Outline map of wetland count unit (limit of the area covered by the count) with important geographical features (cities, roads, rivers, hills) included. Reverse of sheet may be used if necessary. Attach a copy of map if available.
