SUBJECT : COASTAL CLEAN-UP ACTIVITY IN BALABAC

OFFICE OF THE CENRO
BROOKE'S POINT, PALAWAN

The primary objective of the coastal clean-up activity was to raise awareness about the importance of preserving the marine ecosystem and to promote community involvement in maintaining the cleanliness of the coast.

Date: February 18, 2023

Location: Shoreline of Barangay Poblacion V, Balabac, Palawan

Organizers: Local Government Unit of Balabac

Activities:

The coastal clean-up activity, spearheaded by the LGU Balabac, started at 8:00 am and lasted for two hours. Participants were provided with gloves, trash bags, and other cleaning materials to collect garbage and debris along the shoreline of Poblacion V. The event was divided into different sections, and each group of participants was assigned a specific area to clean.

During the clean-up, participants collected various types of garbage, including plastic bags, bottles, fishing nets, and food containers. They also removed larger items, such as tires, which were found washed up on the beach.

The collected garbage was sorted and categorized before being disposed of in an appropriate manner. Plastic items were separated from other waste to be recycled.

Results:

After the two-hour coastal clean-up activity, participants collected more or less 200 kilograms of garbage and debris from the shoreline of Poblacion V. The majority of the garbage collected was plastic, which accounted for over 60% of the total waste.

The success of the event was due to the enthusiastic participation of the volunteers, who worked tirelessly to collect the garbage and debris along the shoreline. The event also served as an opportunity to raise awareness about the importance of reducing plastic waste and promoting sustainable practices.

Conclusion:

The coastal clean-up activity, spearheaded by the LGU Balabac, was a success, and it helped to bring the community together to support a good cause. The event highlighted the importance of taking care of the marine ecosystem and demonstrated the positive impact that community involvement can have in maintaining the cleanliness of our beaches and coastlines.
