

MEMORANDUM

TO : **ALL REGIONAL EXECUTIVE DIRECTORS**
DENR Regions NCR, CAR TO Region 8

FROM : **THE UNDERSECRETARY**
Field Operations for Luzon, Visayas and Environment

SUBJECT : **SUMMARY OF REGIONAL REPORTS ON APPREHENSIONS,
SEIZURES AND/OR CONFISCATION OF UNDOCUMENTED
FOREST PRODUCTS INCLUDING CONVEYANCES, TOOLS
AND IMPLEMENTS FOR CALENDAR YEAR 2022**

DATE : **MAY 11 2023**

This has reference to the result of the consolidated Regional Reports on Apprehended, Seized, and/or Confiscated Undocumented Forest Products, including Conveyances, Tools, and Implements for Calendar Year 2021 nationwide (excluding ARMM), of which ***CY 2022 illegal logging hotspots have been reduced to 16 municipalities as compared to 18 in CY 2021.***

In this regard and in order to strengthen efforts to protect our natural forests, forest plantations, watershed reserves, rivers system, national parks, and protected areas, All Regional Executive Directors are hereby instructed to intensify forest protection works and strictly enforced ENR laws, rules and regulations:

1. As compliance, the field Office must re-adopt and provide a timely monthly comprehensive report pursuant to the Memorandum of instructions to use the Electronic Filing and Monitoring System (e-FMS) in reporting the apprehension, seizure, and confiscation of undocumented forest products including conveyances, tools, and implements dated 03 August 2020 and 29 June 2021 signed by the then Undersecretary for Field Operations, Enforcement and Muslim Affairs and The Assistant Secretary for Enforcement, respectively.
2. DENR Regional Offices to regularly file cases and issue confiscation orders as well as obtain Order of Finality to facilitate the disposition of confiscated undocumented forest products, tools, and implements and to preserve the economic value of the confiscated forest products.
3. DENR Regional Offices should consider relocating their DENR Forest Products Monitoring Stations to strategic locations if deemed necessary. The established monitoring stations must be sanctioned by their respective DENR Regional Executive Directors and the same must be covered by a DENR Regional Special Order.
4. Continued use of the Lawin Forest and Biodiversity Protection System through the conduct of regular patrolling as deterrent monitoring and effective visibility specifically in the hotspot and hard to penetrate areas.
5. DENR Regional Offices with illegal hotspots municipalities must strive harder to neutralize them next year.

FOR YOUR STRICT COMPLIANCE.

MEMORANDUM

FOR : The Undersecretary for Field Operations and Environment
(Luzon & Visayas)

The Undersecretary for Field Operations (Mindanao)

FROM : The OIC Assistant Secretary for Field Operations - Western Mindanao
and Director, in Concurrent Capacity

SUBJECT : **CONSOLIDATED DENR REGIONAL REPORTS ON THE APPREHENDED, SEIZED, AND/OR CONFISCATION OF UNDOCUMENTED FOREST PRODUCTS INCLUDING CONVEYANCES, TOOLS, AND IMPLEMENTS FOR CALENDAR YEAR 2022**

DATE : MAY 09 2023

This is a report on the monitoring of illegal logging hotspots municipalities nationwide for CY 2022. The report focused on how the different DENR Regional Offices had undertaken their forest protection works and law enforcement efforts to minimize illegal cutting of trees and more specifically to neutralized illegal logging hotspots, they implemented their respective Five-Year Regional Intensified Forest Protection Program from CY 2020 to 2024. The indicators of illegal logging hotspots used were derived from the Memoranda dated 23 March 2015 and 29 August 2013 from the Director of the Forest Management Bureau. *(Please see attached copies for your reference)*

FINDINGS OF THE CONSOLIDATED REPORTS

This is the consolidated regional reports on the Apprehended, Seized, and/or Confiscation Undocumented Forest Products, including Conveyances, Tools, and Implements cover the period of Calendar Year 2022 (excluding ARMM). For CY 2022, a total of **2,675** incidents of apprehensions, seizures, and/or confiscation of undocumented forest products, including Conveyances, Tools, and Implements which is lower by 15% from **3,133** incidents for CY 2021. The total volume of undocumented forest products (logs and lumber) with indicated market value is **2,097,556.76 bd.ft.** which lower by 16% from the CY 2021 of **2,483,259 bd.ft.** All these 2,675 incidents of apprehensions, seizures have undergone Administrative Adjudication Proceedings (AAP) wherein 356 Confiscation Orders were issued (**Appendix A**)

For the same period, the total estimated market value of these undocumented forest products is Php 105,265,279.64 which is slightly higher by 2% than in CY 2021 of Php 103,263,696 as reported by the Regional Offices. Then, a total of 299 criminal cases were reported in CY 2022 while there were 448 criminal cases last CY 2021. The same period also reflected the apprehension, seizure and/or confiscation of 662 implements and 681 conveyances. (**Appendix A**)

The top 5 DENR Regions with most number of incidents of apprehensions, seizures and/or confiscations of undocumented forest products were Regions V, XIII, VIII, IV-B, and IV-A, with

443, 397, 269, 206, and 189 incidents, respectively. On the other hand, the top 5 Regions with the highest total estimated market value of undocumented forest products were Regions XIII, V, CAR, II and VIII respectively. Finally, some 318,131 bd. ft. were donated by DENR Regions VI, VIII, X, XI and XIII. Hence, strengthened or enhanced efforts to intensify forest protection activities have been implemented nationwide. (*Appendix A*).

For CY 2022, the number of **illegal logging hotspots municipalities** has decreased to **sixteen (16)** municipalities from **eighteen (18)** in CY 2021. Five (5) municipalities from CY 2021 were neutralized while three (3) municipalities recurred for CY 2022, based on the criteria of illegal logging hotspots. Neutralized were **Peñablanca** in Cagayan; **Casiguran**, **Dilasag**, and **Dingalan** all in Aurora, and **Brooke's Point** in Palawan. **Peñablanca** has no reported incidence of apprehension, seizure and/or confiscation of undocumented forest products including conveyances, tools and implements. While **Casiguran**, **Dilasag**, and **Dingalan and Brooke's Point** recorded non-commercial quantities of undocumented forest products including conveyances, tools and implements. (*Appendix B*)

However, three (3) municipalities were considered recurrent illegal logging hotspots namely; **Laak** and **Nabunturan** both of Compostela Valley, and **Talacogon** of Agusan del Sur, recorded commercial quantities of undocumented forest products including conveyances, tools and implements. (*Appendix B*). The regional distribution of illegal logging hotspots municipalities are as follows: **Region II has 2** (*Jones & Bag-gao*); **Region IV-B has 1** (*Taytay*); **Region XI has 5** (*Boston; Baganga; Cateel; Laak, & Nabunturan*) and **Region XIII has 8** (*Loreto; San Luis; Talacogon; La Paz; Ezperanza; Trento; Lingig & Lianga*). (*Appendix B*)

For CY 2022, some fifty-two percent (52%) of these undocumented forest products are composed of fifty-three (53) different indigenous and native timber species e.g. dipterocarps, etc., while seventeen percent (17%) were exotic species consisting of nine (9) species, and thirty percent (30%) were miscellaneous, lesser-use & mixed unidentified species consisting of eleven (11) different species. (*Appendix C*). This is strong indication that these substantial percentage of indigenous and native timber species, may have originated or came from the natural and residual forests in public lands or accumulated illegally cut standing trees from private titled lands.

In 2011, when Executive Order No. 23 was issued, there were one hundred ninety-seven (197) **illegal logging hotspots municipalities** nationwide. For CY 2022, there were one hundred nineteen (119) **municipalities** that can be described as recurring **illegal logging hotspots** in terms of **Incidents** of apprehension, seizure, and/or confiscation of undocumented forest products registering a total of seven hundred forty-six (746) **Incidents**. Fifty-two (52) **municipalities** have incurred **double-digit Incidents** while sixty-seven (67) **municipalities have single-digits record** of apprehension, seizure, and/or confiscation of undocumented forest products. The hundred ninety-seven (197) **illegal logging hotspots municipalities** in CY 2011 have been drastically reduced by nine-two percent (92%) to only **sixteen (16)** in CY 2022. (*Appendix D*). This also reflected a reduction of eleven percent (11%) of **eighteen (18)** illegal logging hotspot municipalities in CY 2021 compared to only **sixteen (16)** in CY 2022. (*Appendix E*)

These are the basic or primary indicators or references used to determine the illegal logging hotspots municipalities.

1. **High incidence of illegal logging** - increased by at least 50% or higher than the incidence the previous year regardless of the volume or value of the forest products involved. (*Memo. 29 Aug. 2013 by FMB Director Calderon*)
2. **Volume and value of the forest products** - increased by at least 50% or higher than the previous year. (*Memo. 29 Aug. 2013 by FMB Director Calderon*)

3. **Commercial quantity of forest products** - minimum of 1,000 bd.ft. for lumber or 2.35 cu.m. of logs from the natural and residual forests, including government reforestation projects. (*Memo. of 23 Mar. 2015 by FMB Director Calderon*)
4. **Commercial quantity of forest products** - minimum of 2,000 bd.ft. for lumber and/or 9.0 cu.m. of logs from private plantations and planted trees from private lands. (*Memo. of 23 Mar. 2015 by FMB Director Calderon*)

OBSERVATIONS AND RECOMMENDATIONS

1. There were five (5) illegal logging hotspots municipalities neutralized for CY 2022, namely; **Peñablanca** in Cagayan; **Casiguran**, **Dilasag**, and **Dingalan** all of Aurora, and **Brooke's Point** in Palawan, which is good news for those regions for being very effective in their law enforcement works and efforts. However, three (3) municipalities were considered recurrent illegal logging hotspots namely; **Laak** and **Nabunturan** both of Compostela Valley, and **Talacogon** of Agusan del Sur, for recording sizeable commercial quantities of undocumented forest products a combination of indigenous and exotic species, though all three (3) municipalities reported no apprehension, seizure, and/or confiscation of undocumented forest products last CY 2021. They need to be more vigilant in enforcing ENR laws and regulations.
2. If fifty-two percent (52%) of these undocumented forest products composed of fifty-three (53) indigenous and native timber species e.g. dipterocarps, etc, this is quite disturbing since it confirmed that their sources or origin is presumed to have come from the natural and residual forests, since only seventeen percent (17%) were of exotic species consisting of nine (9) exotic or introduced species, and thirty percent (30%) of miscellaneous, lesser-use & mixed unidentified species consisting of eleven (11) different species.
3. The existence of DENR Forest Products Monitoring Stations (FPMS) in strategic locations and covered by DENR Special Orders, may be effective in deterring illegal transport of undocumented forest products whereby CY 2022 is 392,098 bd.ft. less than in CY 2021 in terms of volume apprehended, seized and /or confiscated.
4. All DENR Field Offices specifically the CENROs and implementing PENROs must adopt and use the Electronic Filing and Monitoring System (e-FMS) in immediately reporting electronically all apprehension, seizure, and/or confiscation of undocumented forest products including conveyances, tools, and implements, pursuant to the memorandum instruction by the Undersecretary for Field Operations, Enforcement and Muslim Affairs dated 03 August 2020 and the Assistant Secretary for Enforcement dated 29 June 2021.
5. Continued use of the Lawin Forest and Biodiversity Protection System in all forest lands is a very strong deterrent for would-be illegal cutting or transport of timber and associated products and equally intensifying their forest protection efforts from the regional level down to the CENROs.
6. Sixteen (16) illegal logging hotspots municipalities for CY 2022 need to be neutralized in the next one or two years echoing the very same instruction of the previous DENR Secretary, requiring all DENR field offices for vigilance and concerted efforts.

7. All DENR Field Offices must endeavor to file criminal complaints for all those apprehensions, seizures and/or confiscation of undocumented forest products when there is/are claimant/s as required by existing DENR regulations.

Should the Undersecretary concur, attached are the draft Memorandum addressed to all Regional Executive Directors, for your consideration.

FOR YOUR INFORMATION, REFERENCE, AND CONSIDERATION, PLEASE.
