SUBJECT : **INCIDENT REPORT RE: SUNKEN DIVE YACHT M/Y DREAM
KEEPER WITHIN THE VICINITY OF TUBBATAHA REEFS
NATURAL PARK (TRNP) IN PALAWAN (RDATS NO. I-2023-
108931)**

DATE : **MAY 02 2023**

Please find the attached emailed Incident Report dated 02 May 2023 of Tubbataha Reefs Natural Park (TRNP) Superintendent Angelique Songco with the following information:

1. On 30 April 2023 at around 3:20 am, M/Y Discovery Palawan sent a call through a marine band radio informing that M/Y Dream Keeper was in distress at the vicinity of TRNP.
2. On 30 April 2023 at around 3:30 am, M/Y Discovery Palawan, which was 4 nautical miles away from M/Y Dream Keeper proceeded to its location.
3. On 30 April 2023 at around 4:15 am, M/Y Discovery Palawan arrived at the area and found that M/Y Dream Keeper has already sunk and immediately it started search and rescue operations.

for ksm mde

4. On 30 April 2023 at around 4:50 am, the crew of M/Y Discovery Palawan successfully rescued twenty-eight (28) people composed of fifteen (15) crew members, eleven (11) guests and two (2) divemasters. However, the following four (4) passengers were missing:
 - i. Boat Owner Denke "Jackie" Yang (36 years old)
 - ii. Passenger Nino Anthony Labrador (36 years old)
 - iii. Passenger Marianne Paz Labrador (36 years old)
 - iv. Dive Master Timmy Jean Bejoc (32 years old)
5. On 30 April 2023 at around 6:46 am, the Philippine Coast Guard, Tubbataha Management Office (TMO) and LGU personnel with other dive boats proceeded in the incident area at the north of the North Atoll to conduct search and rescue operations. Debris were found in the area but the four (4) passengers were still missing.
6. On 30 April 2023 at around 2:00 pm, BRP Melchora Aquino (MRRV-9702) arrived at TRNP.
7. On 30 April 2023 at around 3:30 pm, BRP Melchora Aquino (MRRV-9702) coordinated the transfer of the survivors from M/Y Discovery Palawan to their vessel and continued search and rescue operations.
8. On 01 May 2023 at around 6:00 am, BRP Melchora Aquino (MRRV-9702) continued search and rescue operations at the South Atoll and sailed back to Puerto Princesa at 7:30 am. Survivors were expected to arrive at Puerto Princesa in the afternoon.
9. The Philippine Navy and Philippine Coast Guard continuously coordinated and provided updates with their mother units. TMO also coordinated with the management of M/Y Dream Keeper regarding ongoing search and rescue operations.
10. On 01 May 2023 at around 8:00 am, US aircraft P8-436 conducted airborne search and rescue operations within TRNP.

PASu Songco informed PENRO Felizardo Cayatoc that the four (4) missing passengers have not yet been found. Dr. Cesar Villanoy provided a model of the possible location of the missing passengers. This model was sent to Western Command and Philippine Navy.

Hereunder are the relevant information about TRNP:

- TRNP is a marine protected area located 150 kilometers southeast of Puerto Princesa City.
- TRNP also protects one of the few remaining colonies of breeding seabirds in the region.

Yb Wm mdr

- TRNP lies at the heart of the **Coral Triangle**, the geographic centre of world marine biodiversity.
- TRNP has 10,000 hectares of reef ecosystems that are home to:
 - ▶ 700 species of fish
 - ▶ 360 species of corals (about half of all coral species in the world)
 - ▶ 11 species of sharks and rays
 - ▶ 13 species of dolphins and whales
 - ▶ 100 species of birds
 - ▶ hawksbill and green sea turtles
- In 1993, TRNP was inscribed by UNESCO as a World Heritage Site.
- On April 06, 2010, former President Gloria Macapagal Arroyo signed Republic Act 10067, an Act establishing the Tubbataha Reefs Natural Park in the province of Palawan as a Protected Area under the NIPAS Act (RA 7586) and the Strategic Environmental Plan (SEP) for Palawan Act (RA 7611).
- Ten (10) stations were regularly monitored from 2012. Two (2) new stations were established for 2021 and 2022.
- In 2022, TMO conducted monitoring of corals within 12 stations.
- All trips bound to TRNP are vessel-based or "liveboard" since there are no accommodation facilities in the area.

The TRNP has an average depth of 750 meters. Based on the coordinates (Lat 08°51'23.36 N Long 120°01'58 E) given by the captain of the yacht M/Y Discovery Palawan, the area where the yacht sank is within the TRNP and has an average depth of 1,500 meters according to PASu Songco who is now in the TRNP station. PASu Songco reported that the captain or crew of the M/Y Dream Keeper did not coordinate with the TMO for their entry to the TRNP as they could have been assisted in mooring the yacht and could have avoided mishap due to the local thunderstorm.

The TMO and Tubbataha Protected Area Management Board (TPAMB), wherein PCG and WESCOM are included as members, will conduct an assessment/coral reef monitoring in collaboration with the UP-MSI to ascertain if damage has been done to the coral reef systems.

The report of PENRO Felizardo Cayatoc is also attached with the map showing the location of the sinking incident, for your information and further instructions, if any.
