Good day, sir.

I'm Engr. Rossenie Jardin from Dos Palmas Island Resort in Palawan is sending this email to request assistance with the current situation that we are experiencing. We notified CENRO Palawan of our intention to build riprap on the shores of Dos Palmas Island. This initiative aims to protect the trees that are falling one by one due to erosion caused by waves.(See attached photo)

This area of the island is not intended to generate revenue; rather, its primary objective is to safeguard the trees and prevent further erosion.

We would like to request your prompt reaction to the matter as part of our preparations for the incoming typhoon this year.

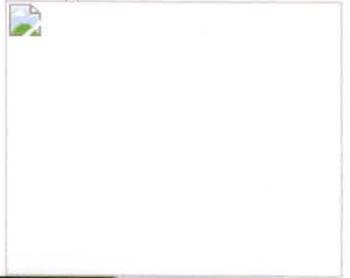

May we know what documents we need to secure aside from the notification letter that we submitted in CENRO that requires your approval?

Thank you very much.
