Dear all,

Just to clarify further [Signed MEMO_Updated Directive from the Secretary on the Budget Initially Provided to Procure Underwater Drone.pdf - Google Drive](#)

and regulations.

2. Protected Areas that have received approved funds allotted for the procurement of ROVs through their Regional Offices or implementing PENROs may still procure ROVs, or may instead procure other technical scientific equipment (TSE) for coastal and marine scientific research, subject to necessary needs assessments, justifications, and experts' advice.

-> For Offices

(without MSR STATIONS) with Approved PHP 3M Funds for ROVs may still procure ROVs, but may also utilize this budget to procure other TSE necessary for your Offices to assess and monitor coastal and marine ecosystems.

B. Procurement of ROVs or other TSEs by other DENR Regional Offices or implementing PENROs with approved funds for ROVs: The procurement of ROVs or additional TSE for the National Integrated Protected Areas System (NIPAS) MPAs with approved funds, but with no DENR MSR Stations, shall follow the procedure prescribed herein:

1. **Needs Assessment:** Each MPA will be assessed to determine its specific needs along with an inventory of existing TSE. Assessment will be done by the RO and PENRO.
2. **Justification and Expert Advice:** The procurement process will involve justification and expert advice, primarily from the academe and subject matter experts, to ensure the relevance and effectiveness of the use of the equipment.
3. **Impact Analysis:** A thorough analysis of the possible outcomes and impacts of utilizing the proposed TSE on Protected Area (PA) management will be conducted.
4. **Terms of Reference and Specifications:** Detailed terms of reference and specifications for the TSE will be prepared to meet the technical and operational requirements of each MPA.

-> Said Offices

must ensure that all equipment to be procured, including ROVs, or other TSEs as was recommended by this Office through [VERSION 2 Proposed Technical, Scientific and Other Equipment \(TSE\) for PHP 3M Budget of DENR PENROs, PENROs, and CENROs - Google Docs](#) are necessary and needed for assessment of coastal and marine ecosystems in your respective jurisdictions.

You may utilize the [Training Modules - CARE-CaDRES - Google Drive](#) CARE-CADRES Training Modules in your respective justification memos.

For your guidance and reference.

Dear all,

Please note some minor revisions on the proposed TOR for the ROV: [Revised BMB TOR ver 3 - CMEMP 2024 Procurement of Underwater ROV PHP 3M.docx - Google Docs](#) <- LINK

Minor revisions so as the specifications are not too high/difficult to procure, but should still be of good quality.

The list of equipment serves as a guide for your procurement; any equipment outside of this list may still be procured, so long as these are absolutely necessary for assessment/monitoring of coastal and marine ecosystems/habitats, as must be provided in your respective justifications, experts' advice, etc.

We would provide the advice that the funds be utilized to procure any assessment equipment necessary for your respective Offices.

For your information.
