LAWIN Report for 2nd Quarter 2022

Summary Patrol Report

Region 04B - Puerto Princesa

Number of days analyzed: 90

21 Jul 2022 3:23 PM

This report presents the patrol performance and quality of the implementing unit during the above stated period of time (number of days). The report contains information on accomplishment rate, coverage and intensity of patrolling in different forest types on patrol distance covered per patroller. The information is meant to provide a basis for patrol planning for the next planning period and implementation of adaptive measures to enhance patrolling as necessary.

Overall accomplishment rate*

Level of Accomplishment

● Accomplishment
● Target

Accomplishment* for the period	Target* distance for the period
225.03	543.75

Accomplishment Rate:
41.39%

*Target is computed based on 10km target per team of 4 DENR patrollers per month

Patrol coverage and intensity

Republic of the Philippines
Department of Environment and Natural Resources
Lawin Forest and Biodiversity Protection System

Patrol distance covered by each forest ranger

Forest Ranger	Patrol Distance Accomplished
Michael Polido	188.85
Joshua Paed	184.72
Raymund Sapalo	184.69
Roldan Mercado	174.59
Stephen Ker Beatingo	174.59
Rommel Adato	165.12
Denmar Diaz	158.92
Kim Ryan Villareal	152.20
Ryan Domondon	143.91
Maridol Ardaiz	132.89
Reymond Luna	129.03
David Abela	122.72
Lim Bryan Kutat	96.61
Jeffrey Modesto	95.75
Arjay Gregas	79.07
Orlando Gapuz	53.55
Bobby Garcia	29.71
Mark Andrew Arenas	19.56
Robert Andrade	19.56
Edwin Ilagan	11.33
Adam Natividad	9.25
Carlito Apid	8.29
Merico Francisco	4.04
Afredo Cacho Jr	0.03
Allan Daganta	0.03
Amba Aisa	0.03
Ariel Palma	0.03
Armando Dolor	0.03
Arnel Gabo	0.03

Summary Threat Report

Region 04B - Puerto Princesa

Number of days analyzed: 90

20 Jul 2022 8:30 AM

This report presents information for the implementing units of DENR to effectively plan and carry out actions for addressing observed threats to the forest.

Threats observed and level of response required

Threat	No. of Observations	Emergency - Immediate action required!	Level 1 - Action required within a week	Level 2 - Action required within a month
Typhoon-related Threats	5	0	0	0
Cutting of Trees	1	0	1	0

Location of observed threats

Locations and urgency of responses needed

Locations of actions taken to address threats

Actions taken to address observed threats during patrols

Summary Response Report

Region 04B - Puerto Princesa

Number of days analyzed: 90 20 Jul 2022 8:30 AM

This report presents the response performance and quality of the implementing unit during the above stated period of time (number of days). The report contains information on threats requiring responses, status of threats and types of responses per threat. The information is meant to provide a basis for response tracking and planning for the next planning period and implementation of adaptive measures to enhance responses to threats as necessary.

Number of threats observed:

6

Distribution of level of response required to address observed threats:

Immediate action required	Requires action within a week	Requires action within a month	No further action required
	1		5

Number of threats requiring post-patrol responses:

Status of threats

No action yet	Requires further action	Addressed	Invalid observation

Republic of the Philippines
Department of Environment and Natural Resources
Lawin Forest and Biodiversity Protection System

Responses per threat

Threat	Admin. proceedings	Coordination with LGU	Devt. project	Education	Garbage cleanup	Inv. sp. removal	Prosecution	Policy formulation	Wildlife rescue
--------	-----------------------	--------------------------	---------------	-----------	--------------------	---------------------	-------------	-----------------------	--------------------

Forest Protection Effectiveness Report

Region 04B - Puerto Princesa

Number of days analyzed: 90

20 Jul 2022 8:28 AM

This reports presents trends in observations of forest condition, regeneration, threats and indicator species. The combined presentation allows for an evaluation if protection efforts are effective, conservation targets are met and the forest achieves the desired future forest condition. Protection efforts are effective, when records of forest condition, regeneration and indicator species show an upward trend towards more observations more and denser regeneration, particularly in degraded forest areas. Increasing trends in indicator species suggest that the improved forest condition is providing a better habitat for forest dependent species. All trends presented are put in relation to the patrol effort to provide comparability. Forest cover data were derived from 2003 and 2010 NAMRIA land cover maps.

Trends of Observations per Patrol Kilometer in the Forest Conservation Area

Trend in Threats

A decreasing trend in threats in the forest conservation area mean effective forest protection; an increasing trend means the opposite.

Trend in Indicator Species

An increasing trend in indicator species in the forest conservation area means effective forest protection; a decreasing trend means the opposite.

Trends in Regeneration Density

An increasing trend in regeneration means effective forest protection; a decreasing trend means the opposite.

Trends of most common Threats
