MEMORANDUM

FOR : The Regional Executive Director
DENR MIMAROPA Region
1515 L&S Bldg., Roxas Blvd.
Ermita, Manila

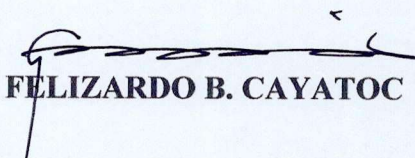

FROM : The Provincial Environment and
Natural Resources Officer

SUBJECT : **SUBMISSION OF ACCOMPLISHMENT REPORT ON LAWIN
PATROLLING WITHIN THE AREA OF RESPONSIBILITY OF
CENRO-ROXAS, PALAWAN FOR THE PERIOD OF JULY 2022**

Respectfully forwarded is the memorandum of CENRO Roxas dated August 1, 2022 in connection the above subject.

Based on the report, a total of 130.15 kilometers were covered with LAWIN patrolling for the month of July 2022. Further, there are Fourteen (14) Typhoon-related, Five (5) Annual and Perennial Farming, and One (1) Landslide and Mudslide threats recorded/ observed. *(Please refer to the attached matrix of the report)*

For information and record.

Summary Patrol Report

Region 04B - Roxas-Pal

Number of days analyzed: 30

1 Aug 2022 11:18 AM

This report presents the patrol performance and quality of the implementing unit during the above stated period of time (number of days). The report contains information on accomplishment rate, coverage and intensity of patrolling in different forest types on patrol distance covered per patroller. The information is meant to provide a basis for patrol planning for the next planning period and implementation of adaptive measures to enhance patrolling as necessary.

Overall accomplishment rate*

Level of Accomplishment

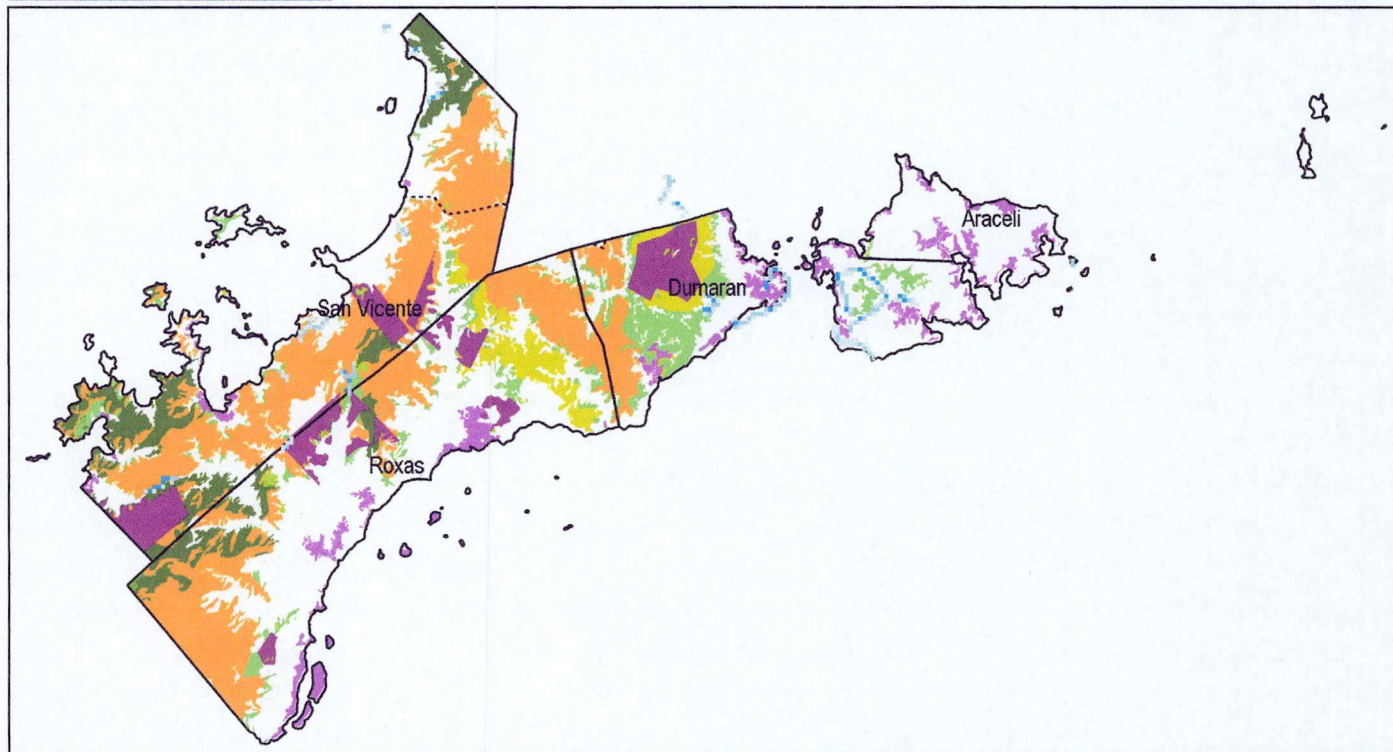

● Accomplishment
● Target

Accomplishment* for the period	Target* distance for the period
130.15	103.50

Accomplishment Rate:
125.75%

*Target is computed based on 10km target per team of 4 DENR patrollers per month

Patrol coverage and intensity

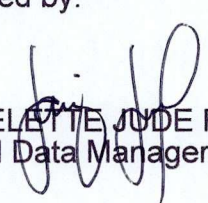

Republic of the Philippines
Department of Environment and Natural Resources
Lawin Forest and Biodiversity Protection System

Patrol distance covered by each forest ranger

Forest Ranger	Patrol Distance Accomplished
Donne Sabroso	98.68
Charlie Rabang	87.85
Roy Mercader	87.85
James Tajon	79.41
Alonso Tabangay	76.41
Ryan Giganto	74.87
Enrique Jardin	67.91
Christopher Padrones	49.46
Merma Saddin	44.40
Ronnie Jann Ian Mabitasan	42.95
Mark Anthony Ortega	32.26
Markwilliams Sotoza	29.28
Lemuel Bacalla	25.49
Alvin Maduro	20.68
Marco Angelo Marquez	20.68
Nolly Billones	14.63
Rogelio Yaquitin	12.12
Armando Gabayan	9.71
Rommel Allan Llaniguez	9.71

Summary Threat Report

Region 04B - Roxas-Pal

Number of days analyzed:

30

1 Aug 2022 11:15 AM

This report presents information for the implementing units of DENR to effectively plan and carry out actions for addressing observed threats to the forest.

Threats observed and level of response required

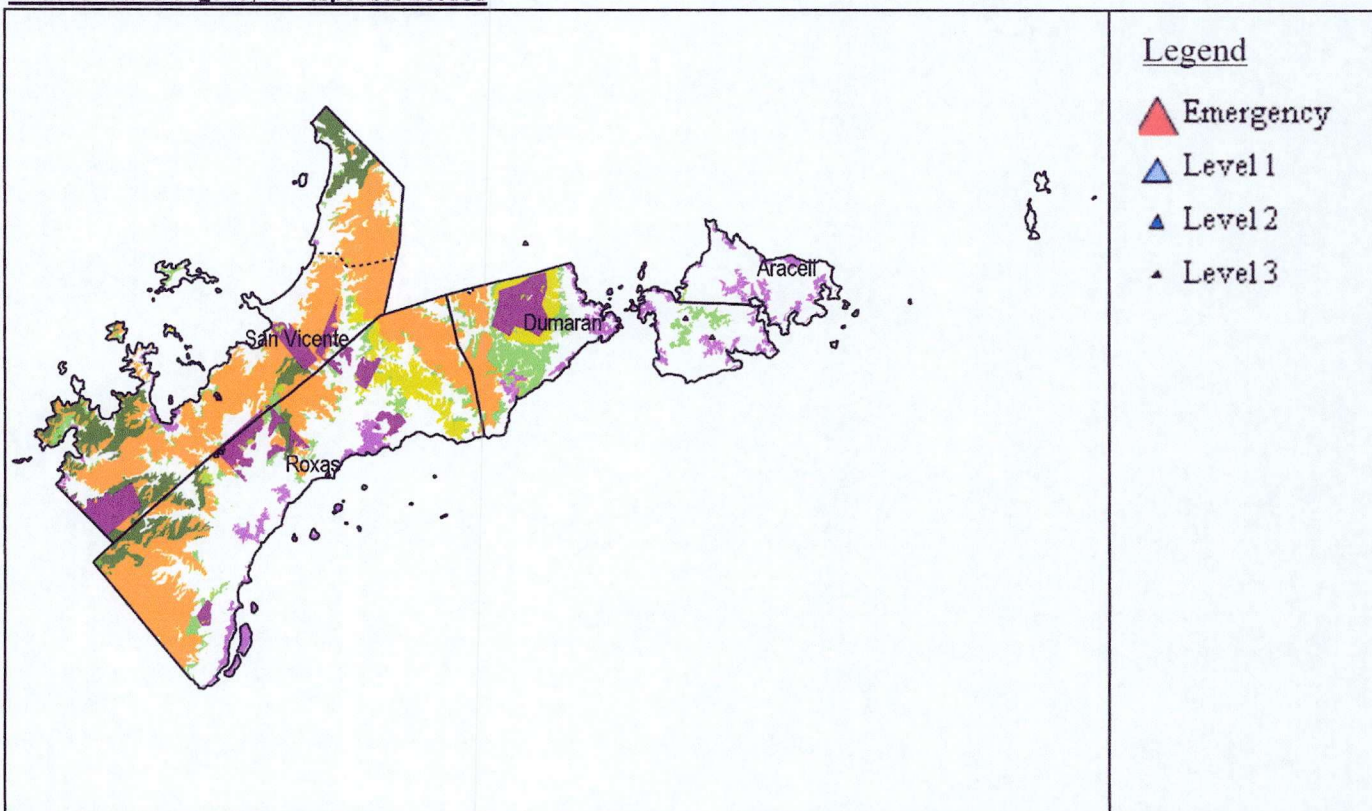

Threat	No. of Observations	Emergency - Immediate action required!	Level 1 - Action required within a week	Level 2 - Action required within a month
Typhoon-related Threats	14	0	0	0
Annual and Perennial Farming	5	0	0	0
Landslide and Mudslide	1	0	0	0

Location of observed threats

Locations and urgency of responses needed

Locations of actions taken to address threats

Actions taken to address observed threats during patrols

Forest Protection Effectiveness Report

Region 04B - Roxas-Pal

Number of days analyzed: 30

1 Aug 2022 11:21 AM

This reports presents trends in observations of forest condition, regeneration, threats and indicator species. The combined presentation allows for an evaluation if protection efforts are effective, conservation targets are met and the forest achieves the desired future forest condition. Protection efforts are effective, when records of forest condition, regeneration and indicator species show an upward trend towards more observations more and denser regeneration, particularly in degraded forest areas. Increasing trends in indicator species suggest that the improved forest condition is providing a better habitat for forest dependent species. All trends presented are put in relation to the patrol effort to provide comparability. Forest cover data were derived from 2003 and 2010 NAMRIA land cover maps.

Trends of Observations per Patrol Kilometer in the Forest Conservation Area

Trend in Threats

A decreasing trend in threats in the forest conservation area mean effective forest protection; an increasing trend means the opposite.

Trend in Indicator Species

An increasing trend in indicator species in the forest conservation area means effective forest protection; a decreasing trend means the opposite.

Trends in Regeneration Density

An increasing trend in regeneration means effective forest protection; a decreasing trend means the opposite.

Trends of most common Threats
