MEMORANDUM

FOR : The Regional Executive Director
DENR MIMAROPA Region
1515 L and S Bldg., Roxas Boulevard
Ermita, Manila

FROM : The Provincial Environment and
Natural Resources Officer

SUBJECT : **SUBMISSION OF ACCOMPLISHMENT REPORT ON LAWIN
PATROLLING WITHIN THE AREA OF RESPONSIBILITY OF
CENRO ROXAS, PALAWAN FOR THE PERIOD OF MAY 16, 2022
TO JUNE 15, 2022**

Respectfully forwarded is the memorandum of CENRO Roxas, Palawan dated June 16, 2022 relative the above subject.

Per memorandum, the LAWIN Patrollers had accomplished the total of 91.78 kilometers or equivalent to 183.56% of their target for the said period within the jurisdiction of CENRO Roxas. As manifested, there were nineteen (19) threats recorded during the said period like the typhoon related threats, annual and perennial farming and logging trail. Those threats were already addressed and no further action needed.

For information and record.

Summary Patrol Report

Region 04B - Roxas-Pal

Number of days analyzed: 30

16 Jun 2022 7:55 AM

This report presents the patrol performance and quality of the implementing unit during the above stated period of time (number of days). The report contains information on accomplishment rate, coverage and intensity of patrolling in different forest types on patrol distance covered per patroller. The information is meant to provide a basis for patrol planning for the next planning period and implementation of adaptive measures to enhance patrolling as necessary.

Overall accomplishment rate*

Level of Accomplishment

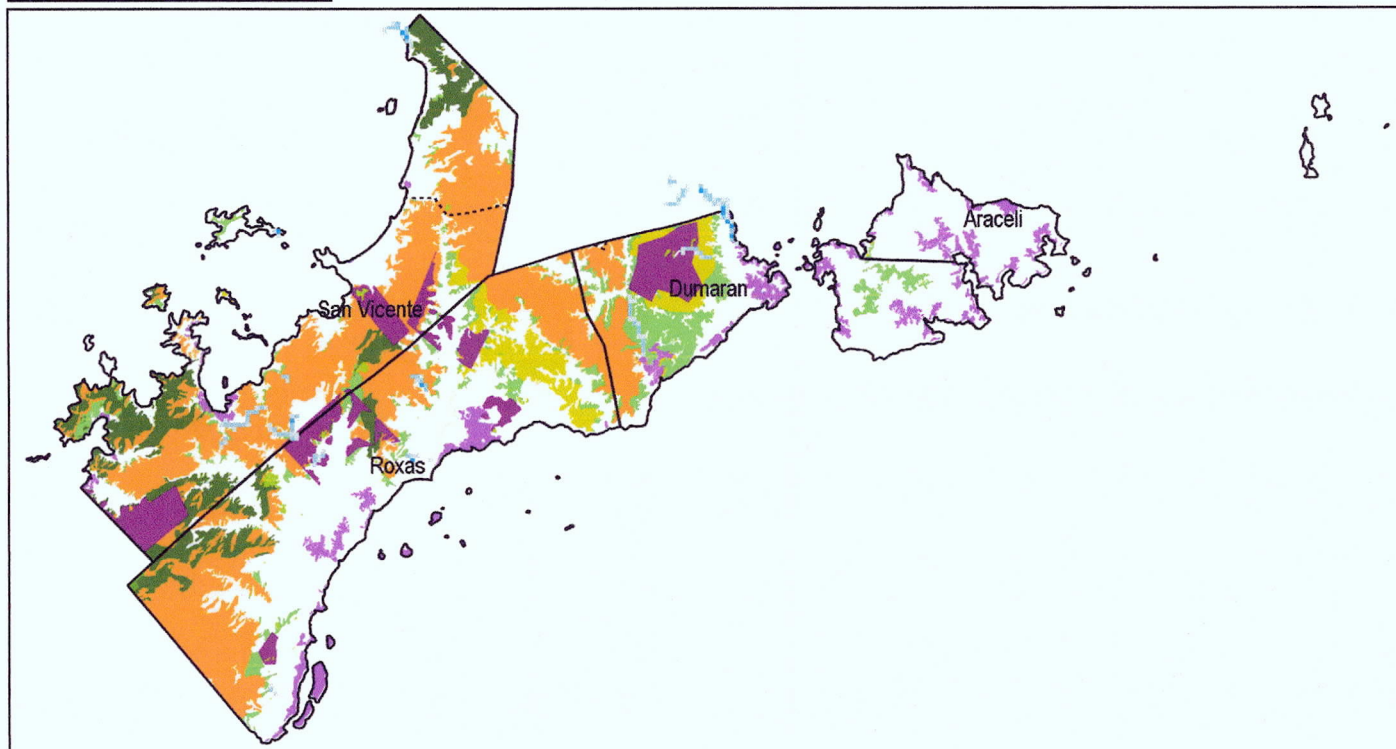

● Accomplishment
● Target

Accomplishment* for the period	Target* distance for the period
91.78	103.50

Accomplishment Rate:
88.68%

*Target is computed based on 10km target per team of 4 DENR patrollers per month

Patrol coverage and intensity

Republic of the Philippines

Department of Environment and Natural Resources

Lawin Forest and Biodiversity Protection System

Patrol distance covered by each forest ranger

Forest Ranger	Patrol Distance Accomplished
Rommel Allan Llaniguez	46.60
RONNIE JANN IAN MABITASAN	43.37
Ryan Giganto	41.74
James Tajon	39.61
Virgilio Cacatian	24.79
Nestor Cervantes	22.07
Toribio Bungalso	21.12
Rogelio Yaquitin	21.11
Charlie Rabang	20.74
Merma Saddin	19.55

Summary Threat Report

Region 04B - Roxas-Pal

Number of days analyzed: 30

16 Jun 2022 7:58 AM

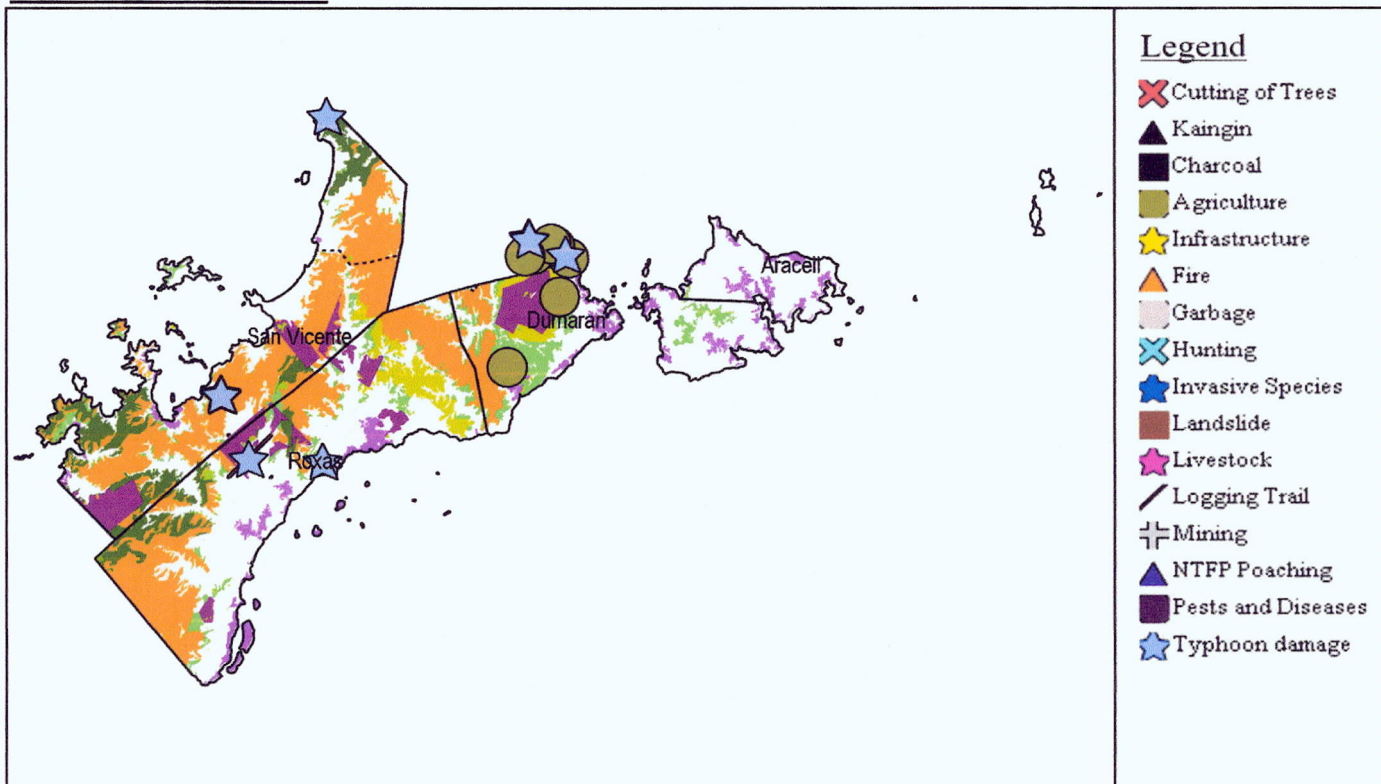

This report presents information for the implementing units of DENR to effectively plan and carry out actions for addressing observed threats to the forest.

Threats observed and level of response required

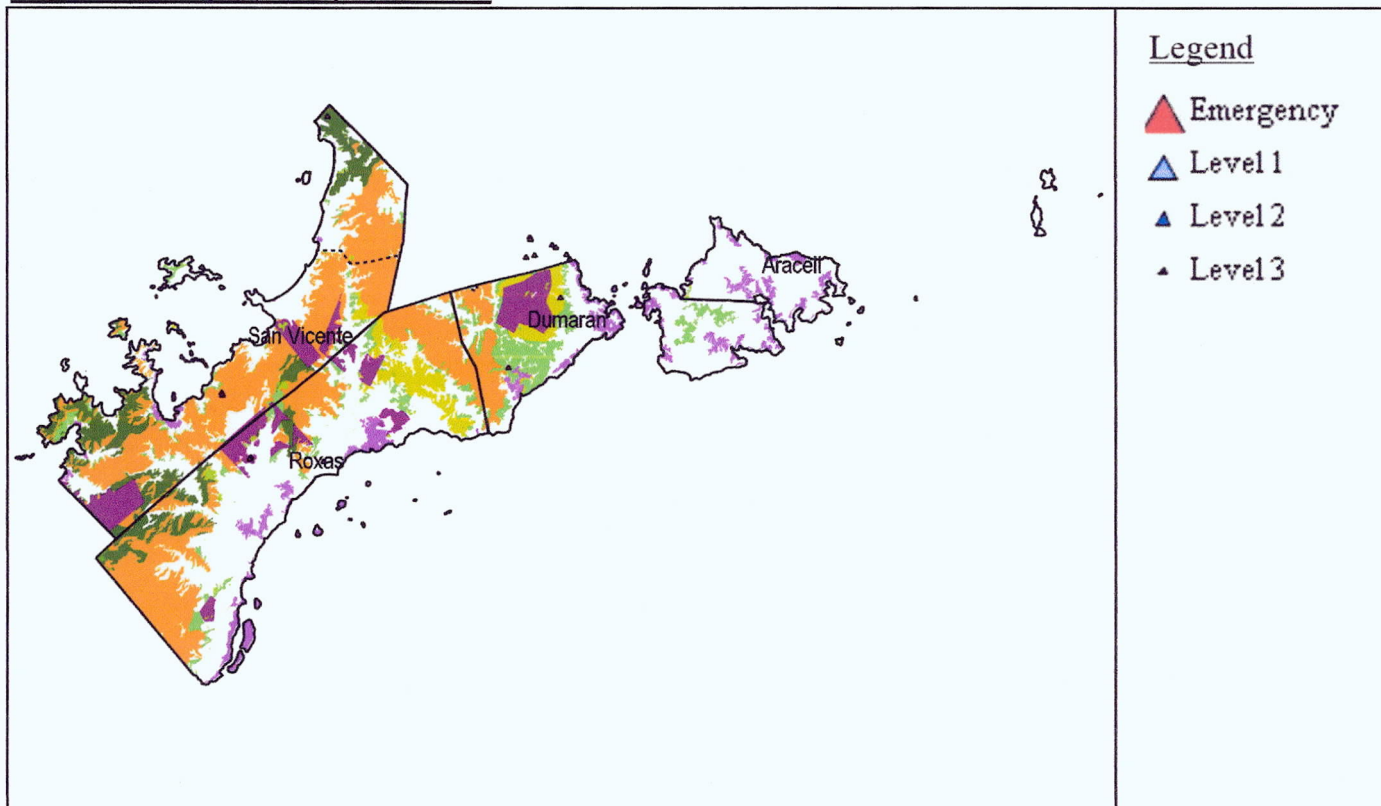

Threat	No. of Observations	Emergency - Immediate action required!	Level 1 - Action required within a week	Level 2 - Action required within a month
Typhoon-related Threats	11	0	0	0
Annual and Perennial Farming	7	0	0	0
Logging Trail	1	0	0	0

Location of observed threats

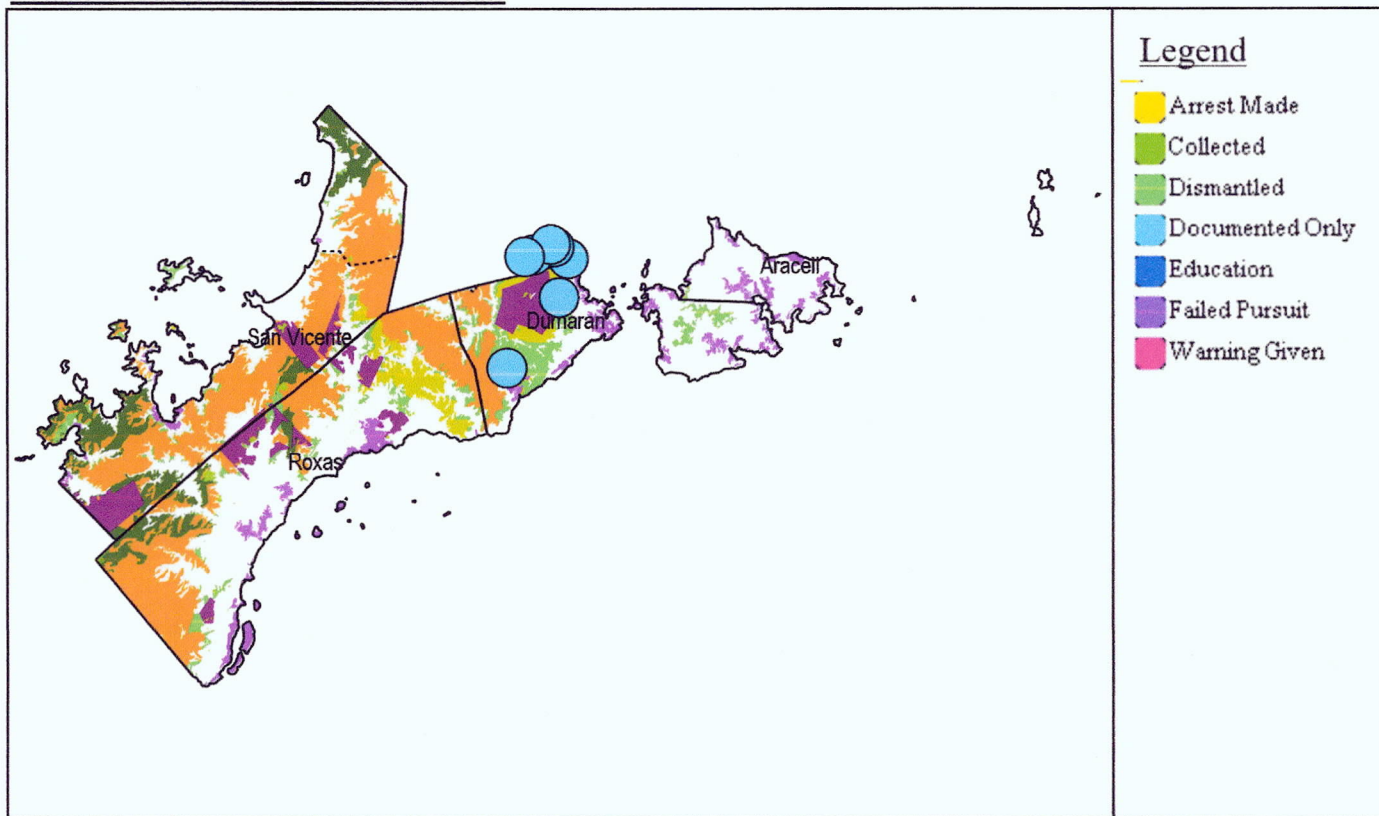

Locations and urgency of responses needed

Locations of actions taken to address threats

Actions taken to address observed threats during patrols

Forest Protection Effectiveness Report

Region 04B - Roxas-Pal

Number of days analyzed: 30

16 Jun 2022 7:56 AM

This reports presents trends in observations of forest condition, regeneration, threats and indicator species. The combined presentation allows for an evaluation if protection efforts are effective, conservation targets are met and the forest achieves the desired future forest condition. Protection efforts are effective, when records of forest condition, regeneration and indicator species show an upward trend towards more observations more and denser regeneration, particularly in degraded forest areas. Increasing trends in indicator species suggest that the improved forest condition is providing a better habitat for forest dependent species. All trends presented are put in relation to the patrol effort to provide comparability. Forest cover data were derived from 2003 and 2010 NAMRIA land cover maps.

Trends of Observations per Patrol Kilometer in the Forest Conservation Area

Trend in Threats

A decreasing trend in threats in the forest conservation area mean effective forest protection; an increasing trend means the opposite.

Trend in Indicator Species

An increasing trend in indicator species in the forest conservation area means effective forest protection; a decreasing trend means the opposite.

Trends in Regeneration Density

An increasing trend in regeneration means effective forest protection; a decreasing trend means the opposite.

Trends of most common Threats
