This pertains with phone message received by this Office on May 11, 2022 from Regional CBFM Desk Officer Elna Yoo instructing this Office to resubmit the lacking attachments/requirements of the formulated Community Resource Management Framework (CRMF) and Five Year Work Plan (FYWP) of Maranan Uplanders Marketing Association (MUMA) Inc. and submit the affirmation sheet signed by the Regional Executive Director Lormelyn E. Claudio, *CESO IV* as affirming Officer.

Respectfully submitted is the duly accomplished Affirmation Sheet of CRMF for affirmation/approval of Regional Executive Director Lormelyn E. Claudio, *CESO IV* and Approval Sheet of FYWP for the 6th Year onwards, also, the scanned copy of following lacking attachment/requirements, to wit:

1. Basic Information
 - a. Production sharing agreement with People's Organizations in the harvest of forest plantations owned by the government inside CBFM Areas per DAO 98-42 as indicated in Project Sustainability Plan.
2. Maps
 - a. Community Map
 - b. Grid Index Map
 - c. Drainage Map with rivers/creeks and corresponding name
 - d. Land Classification Map
 - e. ECAN Map
 - f. Geohazard Map
 - g. Slope Map

MARANAN UPLANDERS MARKETING ASSOCIATION (MUMA), INC.

Barangay Calategas, Narra, Palawan

PROJECT SUSTAINABILITY PLAN

RESOURCE UTILIZATION

1. Forest Products to be Utilized

1.1 Forest Tree Plantation

1.1.1 Reforestation

Within the five (5) year Work Plan, the PO has proposed to utilize its forest tree plantation with an estimated area of more or less fifty (50) hectares of planted Mahogany and Gmelina. The plantation is now ready for selective harvesting considering that it is about 13 to 20 years old consisting of planted tree species like Mahogany and Gmelina.

1.2 Area of Operation

The tree plantation is located within the CBFMA area of PO-Maranan Uplanders Marketing (MUMA), Inc. scattered situated in Barangay Calategas, Narra, Palawan.

1.3 Approximate Quantity to be Utilized

Result of 100% inventory conducted by DENR personnel together with the representative from the PO using the prescribed method on non-dipterocarp species for Western Visayas Region, it disclosed that the total volume as reflected in the stand and stock table is approximately 242.77 Cubic meters. This consists of the following:

Species	Volume (cu.m.)
Mahogany	82.21
Gmelina	160.21
TOTAL	242.77

This plan has proposed to utilize only those with DBH class of 15 centimeters in diameter and above for good lumber and charcoal (for tops and branches) as the primary product. However, utilization of the tree plantation does not include those that are within the 40-meters strip along both sides of the stream banks and those that are above 50% slope.

The approximate utilization of volume of logs that may be produced in a yearly basis shall be:

Species	2020	2021	2022	2023	2024	Volume (cu.m.)
Mahogany	32.884	32.884	5.48	5.48	5.48	82.21
Gmelina	64.224	24.084	24.084	24.084	24.084	160.56
TOTAL						242.77

1.4 Methods of Harvesting and Transport of Products

The contracted buyer uses the traditional method of harvesting wherein the matured planted trees were felled and buck using chainsaw which will be dragged and hauled from the stump and transported by draft animals to the operation center or loading point in Brgy. Calategas, Narra, Palawan. However, the chainsaw that shall use should be registered in Palawan Council for Sustainable Development (PCSD). Trucks will be used to haul the products from the operation center lumber yard/buying station.

1.5 Equipment and Tools to be Used

The authorized/contracted buyer will provide the equipment and tools to be used.

1.6 Major Activities, Targets, Schedule, Responsible Persons and Support Requirements

Utilization of forest tree planted within the CBFMA area shall be conducted during the first to the fifth year of this plan.

1.7 Disposition Scheme

Forest products will be disposed to the contracted buyer in the form of lumber, charcoal, fuel wood and raw materials for cottages, bunkhouse of the Association, and among others.

The PO will help the members in choosing a good buyer of the above stated products.

1.8 Estimated Production Costs and Financial Sourcing

Since the People's Organization agreed to sell their products to the contracted buyer, it is the buyer will shoulder all the needed operating expenses as well as the machineries to be used.

1.9 Estimated Harvesting Operating Cost and Financial Sourcing

It is estimated that more or less 100% utilization of twigs/branches for firewood and charcoal production.

1.10 Proposed CBFM Activities on Income Generated

Pursuant to DAO No. 98-42, series of 1998, the government share levied on plantation forest funded by the government especially in ISF/CBFM areas and other reforestation projects issued with tenurial instrument has the following sharing agreement, to wit:

People's Organization	-	75% of the gross sales
Government share	-	12.5% of the gross sales
CBFM Fund	-	12.5% of the gross sales

Furthermore, per agreed resolution of the organization, out of the 75% share of the organization on the derived income, 70% will be given to the individual claimant and 5% will the PO share that will be used for plantation, community development support fund and organizational developmental activities.

The proposed CBFM activities that are enumerated in this plan shall benefited from the income that may be generated from the utilization of the tree plantation within the CBFMA area of the PO. Such activities will include but not limited to the following, to wit:

- a. Forest area development particularly on natural and tree plantation development, protection and re-investment plan;
- b. Organizational development;
- c. Livelihood enterprise development projects;
- d. IEC activities; and
- e. On-farm/off-farm development.

The fund will come from the proposed MUMA Fund Account in which the 5% PO share will be deposited and it will be established as soon as this plan starts to operate.
