1515 DENR By the Bay Building, Roxas Blvd.
Barangay 668, Ermita, Manila

THRU : The Assistant Regional Director for
Technical Services

FROM : The Provincial Environment and
Natural Resources Officer

SUBJECT : **ACTIVITY REPORT ON CONDUCTED 4th QUARTER
WATERBIRDS ASSESSMENT AT SNAKE ISLAND NCMCR ON
OCTOBER 25-26, 2022**

Forwarded is the memorandum dated April 25, 2022 of CDS Chief Rhodora B. Ubani along with the subject report of Data Manager Julius F. Landrito of Snake Island NCMCR.

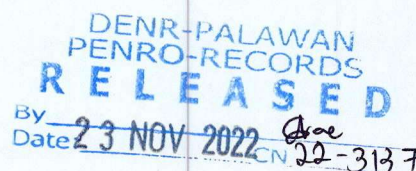

As per report, the activity was conducted on October 25-26, 2022 in partnership with City ENRO, CENRO PPC, BMB and ERDB technical personnel. During the two (2) days assessment, thirty (30) bird species were observed, nineteen (19) of which are waterbirds with a total of two hundred eight-nine (289) individuals recorded and eleven (11) forest birds with a total of nineteen (19) individuals counted.

This report will serve as the Means of Verification (MoV) for Snake Island NCMCR CY 2022 activities. Attached herewith is the activity report with photo documentation.

For information and record.

MEMORANDUM

FOR : The Provincial Environment and
Natural Resources Officer

THRU : The OIC Chief,
Technical Service Division

FROM : The Chief,
Conservation and Development Section

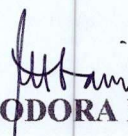

SUBJECT : **ACTIVITY REPORT ON CONDUCTED 4th QUARTER
WATERBIRDS ASSESSMENT AT SNAKE ISLAND NCMCR ON
OCTOBER 25-26, 2022**

Respectfully submitted is the activity report of Data Manager Julius F. Landrito of Snake Island- NCMCR on the conducted waterbirds assessment at Snake Island.

As reported, thirty (30) bird species were observed, nineteen (19) of which are waterbirds with a total of two hundred eight-nine (289) individuals recorded and eleven (11) forest birds with a total of nineteen (19) individuals counted. The species with the most individuals recorded is the Greater Sand Plover, which has 117 individuals, while the species with the fewest individual observed are Common Redshank, Grey Heron, Little Stint, Pacific Reef Heron, Sanderling, and Striated Heron which have only one (1) individual record. There were also large numbers of Whimbrel and Grey wagtail recorded. The team also conducted night monitoring and recorded the Mantanani Scops Owl for the first time, with a total of two (2) individuals. The activity was conducted in partnership with CENRO PPC, City ENRO, ERDB, and BMB.

This report will serve as the Means of Verification (MoV) for Snake Island NCMCR CY 2022 activities. Attached herewith is the activity report with photo documentation.

For information, record and further instruction.

**ACTIVITY REPORT ON CONDUCTED 4th QUARTER WATERBIRDS
ASSESSMENT AT SNAKE ISLAND NCMCR ON OCTOBER 25-26, 2022**

As part of the regular monitoring of waterbirds population in Snake Island-National Coastal and Marine Center for Research, a quarterly assessment was programmed to monitor its population and analyze it for further studies. For the 4th quarter of the year 2022, the monitoring team from PENRO Palawan in partnership with CENRO PPC, City ENRO, ERDB and BMB conducted the assessment on October 25-26, 2022.

During the two (2) days assessment, thirty (30) bird species were observed, nineteen (19) of which are waterbirds with a total of two hundred eight-nine (289) individuals recorded and eleven (11) forest birds with a total of nineteen (19) individuals counted. The species with the most individuals recorded is the Greater Sand Plover, which has 117 individuals, while the species with the fewest individual observed are Common Redshank, Grey Heron, Little Stint, Pacific Reef Heron, Sanderling and Striated Heron which have only one (1) individual record. There were also large numbers of Whimbrel and Grey wagtail recorded. The team also conducted night monitoring and recorded the Mantanani Scops Owl for the first time, with a total of two (2) individuals. On the first day of monitoring, it was cloudy and high tide; on the second day, it was the same. The table below also shows the conservation status of these waterbirds based on the International Union for Conservation of Nature (IUCN) Redlist of Endangered Species version 2020-2, Department of Environment and Natural Resources Biodiversity Management Bureau (DENR BMB): Philippine Redlist of threatened wild fauna Part 1 - Vertebrates and the Palawan Council for Sustainable Development (PCSD) Resolution No. 15-521.
