With the implementation of the LAWIN Forest and Biodiversity Protection System, respectfully submitted is the detailed report of the Busuanga Pasture Reserve Management Office (BPRMO) on the results of the Lawin monitoring and patrolling activity conducted in the Municipalities of Coron and Busuanga, Palawan within the BPR area for the month of September 2022.

I. Findings and Result

Two (2) Patrol Teams were dispatched during the conduct of this activity within the Forest Conservation Area (FCA) of BPR situated in the Municipalities of Coron and Busuanga, Palawan. The target distance for the month of September 2022 is 30 kilometers (km) based on the Lawin Patrol Plan for the 3rd Quarter of 2022. On the said month, the BPRMO Patrol Teams were able to traverse an aggregate distance of 32.21 km or 107.37 % (Table 1).

Table 1. BPRMO LAWIN monitoring and patrolling accomplishment for September 2022

Month	Target (km)	Accomplishment (km)	Difference (km)	Accomplishment (%)
September	30	32.21	(2.21)	107.37

**The accomplishment rate is computed based on the 30 kilometer target per CENRO/CA per month compared to the sum of the distance patrolled per CENRO/CA.*

Table 2 shows a total of 473 Forest Condition Counts (FCCs) recorded during the patrolling. Early Secondary Forest (ESF) appears to have the highest figure recorded for September 2022 with 255 counts or 54%, while Old Growth Forest (OGF) has the least recorded observation with 9 counts or 2%. The remaining forest conditions such as Open-Cultivated (OC), Advanced Secondary Forest (ASF), and Open-Uncultivated (OUC) with

corresponding total figures of 83 (18%), 55 (12%), and 71 (15%), respectively. Based on the SMART analysis, the total FC with the good condition has a total count of 319 or 67.44% which includes OGF, ASF, and ESF.

Table 2. Patrol Observation: Forest Condition Counts

OGF-Old Growth Forest. ASF-Advance Secondary Forest. ESF-Early Secondary Forest. OUC-Open, Un-cultivated. OC-Open, Cultivated

For the presence of natural regenerants, 341 FCCs or 72.09% of the total FCC was recorded with the presence of natural regenerants while 132 FCCs or 28% were with the absence of natural regenerants. There were five (5) or 1% recorded dense natural regenerants, while one hundred seventeen (117) FCCs or 25% and two hundred nineteen (219) or 46% recorded as moderate and sparse natural regenerants, respectively (Table 3).

Table 4 shows the observed and recorded threats within the FCA of BPR. A total of six (6) threats were observed and recorded during the Lawin Patrolling for the month of September 2022 and this was accounted for four (4) under tree cutting; one (1) for huts or houses and other infrastructures; and lastly one (1) for slash and burn farming (kaingin).

Table 4. Patrol Observation: Threat Count

Threats	No. of observation
Cutting of trees	4
Huts or Houses and other Infrastructures	1
Slash and burn farming	1

As can be viewed from the map in Annex C, the threats observed/documented in the FCA during the month of September 2022 were found in Barangays of Quezon, Cheey, and New Busuanga, Busuanga and Brgy. Decalachao, Coron to Brgy. Sto. Niño, Busuanga, Palawan. The current threat index was computed as 0.12 threats per kilometer (T/Km) in January 2022, up to 0.21 T/Km in the month of March 2022, down to 0.03 T/km in April 2022 up to 0.26 T/Km for the month of June. Forest Protection Effectiveness Report

Sep 22, 2022 10:13 PM

This reports presents trends in observations of forest condition, regeneration, threats and indicator species. The combined presentation allows for an evaluation if protection efforts are effective, conservation targets are met and the forest achieves the desired future forest condition. Protection efforts are effective, when records of forest condition, regeneration and indicator species show an upward trend towards more observations more and denser regeneration, particularly in degraded forest areas. Increasing trends in indicator species suggest that the improved forest condition is providing a better habitat for forest dependent species. All trends presented are put in relation to the patrol effort to provide comparability. Forest cover data were derived from 2003 and 2010 NAMRIA land cover maps.
