THRU : The Provincial CBFM Desk Officer

FROM : The Community Environment and Natural Resources Office

SUBJECT : **INSPECTION AND MONITORING REPORT OF CBFM- CARP PROJECT CY 2022 OF MACATUMBALEN COMMUNITY- BASED FOREST AND COASTAL MANAGEMENT ASSOCIATION (MCBFCMA) AND BANTOTO ABAROAN FARMERS ASSOCIATION INC. (BAFAI) LOCATED AT POBLACION, SAN VICENTE AND BARANGAY ABAROAN, ROXAS, PALAWAN, RESPECTIVELY**

Forwarded are the inspection and monitoring reports of the Monitoring Evaluating Officer (MEO), Nympha L. Tablinga pertaining to the above subject.

Please be informed that the Macatumbalen Community- Based Forest and Coastal Management Association (MCBFCMA) was awarded with CBFM CARP Project entitled as "Livelihood Erosion and Bamboo Plantation" while Bantoto Abaroan Farmers Association Inc. (BAFAI) was awarded with CBFM CARP Project entitled "Agroforestry Plantation and a combination of fruit trees and vegetables with Lagundi Honey Production".

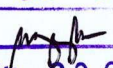

Based on the report submitted, both the MCBFCMA and BAFAI had already established their nurseries and have produced the required number of plantable seedlings for CBFM- CARP projects for CY 2022.

For information and further instruction.

SUBJECT : **INSPECTION AND MONITORING OF CBFM-CARP PROJECT
CY-2022 OF BANTOTO ABAROAN FARMERS ASSOCIATION
(BAFARMAI) INC. LOCATED AT SO. BANTOTO, BRGY.
ABAROAN, ROXAS, PALAWAN**

Respectfully submitted is the report on the inspection and monitoring of the CBFM-CARP project CY-2022 of Bantoto-Abaroan Farmers Multipurpose Cooperative (BAFARMAI) conducted on July 29, 2022. The project is entitled as Agroforestry Plantation and a combination of fruits trees and vegetables with Lagundi Honey Production.

During monitoring, the PO already established their nursery. The seeds of Calamansi that have already sprouted and other seedlings that have already grown are taking care-off by individual/PO beneficiary. Almost all of their target seedlings have been accomplished waiting for the right time of transplanting to the plantation site.

However, it was observed that the seedlings grow slowly maybe the nutrition available from the soil may not be sufficient for their growth due to unhealthy soil used and not in proper care and maintenance. As a MEO assigned to monitoring these are my recommendations:

1. Use of organic fertilizer like manure from cow/carabao to become healthy seedling and their nursery area,
2. The nursery area is in one place for proper care and constant monitoring, and
3. Establishment of fences and nets to avoid the attack of livestock and wild animals including rodents like mice/rats.

With the above, the undersigned MEO will continuously monitor and supervise the project activities to ascertain the completion of the project.

Please see attached document for your review and further instruction.

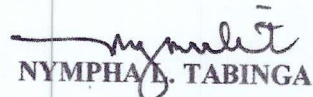

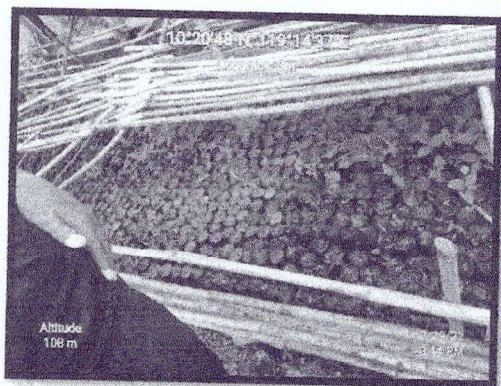

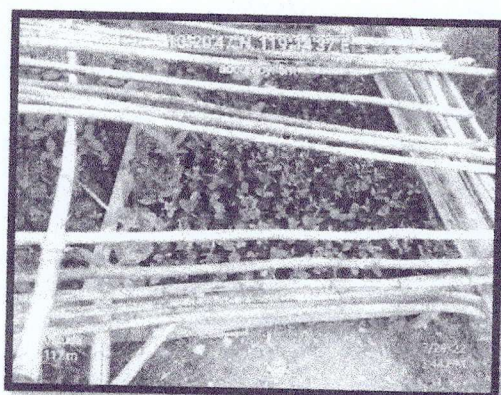

NYMPHA L. TABINGA

Table of Species Produced

	SEEDLINGS PRODUCED	TARGET	ACCOMPLISHMENT	PERCENT (%)	REMARKS
Calamansi	1,000	1000 seedlings	Produced 300 seedlings	30%	Completed
Suha	1,000	1,000 seedlings	Produced 500 seedlings	50%	Completed
Abaca	1,000	1,000 seedlings	Produced 300 seedlings	30%	Produced without in the WFP

MEMORANDUM

FOR : The Community Environment and Natural Resources Officer

THRU : The Chief, Conservation and Development Section
The CBFM-Desk Officer

FROM : The CBFM-CARP Monitoring Evaluating Officer

SUBJECT : **INSPECTION AND MONITORING OF CBFM-CARP PROJECT
CY-2022 OF MACATUMBALEN COMMUNITY BASED
FOREST AND COASTAL MANAGEMENT ASSOCIATION
(MCBFCMA)**

Respectfully submitted is the report on the inspection and monitoring of the CBFM-CARP project CY-2022 of Macatumbalen Community Based Forest and Coastal Management Association (MCBFCMA) for CY 2022. The project is entitled as livelihood erosion and Bamboo plantation.

During monitoring the nursery site of bamboo seedlings production together with the PO's Project Manager; Jimmy Tablazon, so far, they already completed bamboo seedlings of 2,000 pcs wherein the target produced is based on the Work Financial Plan (WFP).

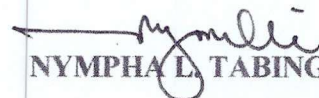

During monitoring, the PO already established their Nursery (Bamboo) under the sheds of forest trees and is ready for transplant to the planting site.

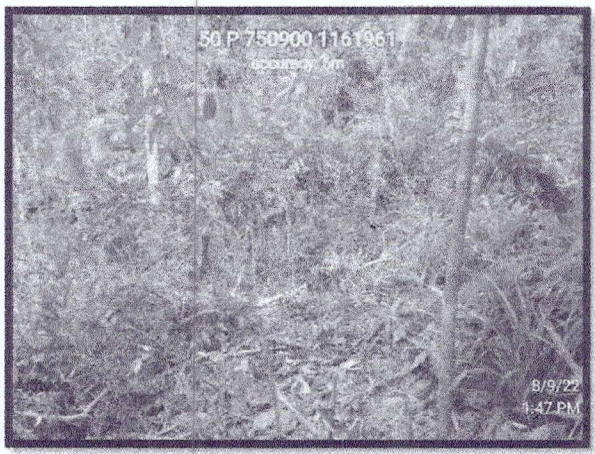

As MEO assigned in the monitoring, below are the recommendations, to wit:

1. Advised the recipient PO to complete the total target of other species seedlings needed based on WFP,
2. PO members of (MCBFCMA) currently continue conducting the strip brushing and site preparation for the upcoming transplanting of the bamboo seedlings,
3. Prepare the nursery for Gmelina seedlings instead of Mahogany as required in the WFP.

With the above, the undersigned MEO will continuously monitor and supervise the project activities to ascertain the completion of the project.

Please see attached document for your review and further instruction.
