Respectfully submitting is the report on the monitoring of CBFM-CARP 2018 project for the 2nd quarter of San Fernando Agroforestry Producers Cooperative (SFAFPC) conducted on July 12, 2022 at Barangay San Fernando, El Nido, Palawan.

The activity disclosed the monitoring of the CBFM-CARP project awarded to the SFAFPC which findings and observations are hereby enumerated as follows:

1. That pursuant to the Executive Order No. 263 adopting Community-Based Forest Management Program (CBFM) as national strategy to ensure the sustainable development of the country's forestland, gave a positive response to address poverty and ensure sustainable management of resources. This was strengthened by the issuance of Executive Order No. 318 known as "Sustainable Forest Management", Executive Order No. 606 known as "Sustainable Upland Development" which anchoring on food, wood and non-wood security and economic productivity. Further enhanced with Executive Order No. 616 known as "The Creation of the Anti-hunger Task Force" to address hunger both on the aspect of supply and demand for food for the upland dwellers, in particular, wherein the San Fernando Agro-forestry Producers Cooperative (SFAFPC) is one of the beneficiaries of the said CBFM program.
2. On November 6, 2001, the DENR awarded the CBFM Agreement to SFAFPC with CBFMA No. RIV-PAL-CBFMA-2001-20 covering an area of 1,378 hectares. The said PO had been a beneficiary of DENR projects particularly the CBFM-CARP 2009 and the National Greening Program. Lately, the PO had acquired provisions of tools and materials for the Bamboo Nursery establishment from Pilipinas Shell Foundation.

3. In 2018, the aforesaid PO had acquired the CBFM-CARP project titled “Fuel Wood with Orchard Plantation Project” wherein different commodities had been established in an area of 100 hectares such as Ipil-ipil, Kakawati, Gmelina, Bamboo, Calamansi, Cacao, Coffee, Rambutan, Guyabano, Dragon fruits, Banana intercrop with pineapple, cassava and vegetable crops.
4. That the said PO had completed their project in the last quarter of 2020 including the re-planting activities. However, in CY 2021, the monitoring conducted disclosed that some planted commodities were affected by the summer season; not all areas were maintained by the beneficiaries for they are also pre-occupied in making a living to support their families; the commodities that were affected by the summer were not yet replaced; some commodities had high mortality because they were covered by overgrown weeds.
5. On July 12, 2022, the CBFM Staff conducted the monitoring particularly in the portion planted with Banana intercropped with Pineapple, Cacao, Kakawate, Coffee, Gmelina, and Dragon fruits. The monitoring disclosed that the planted commodities still no maintenance conducted. Meanwhile, the PO has started the re-planting of bamboo that affected by last summer season.

During monitoring, the issues and concerns observed are the following, to wit:

- Unmaintained plantations
- Bananas are already bearing and fruits were not harvested.
- Some of the affected commodities by last summer season were not yet replaced.

In view of the above observations, the following are being recommended, to wit:

- The PO should conduct meeting with the beneficiaries and make strategy on how to maintain their plantation areas (ex. Bayanihan).
- Banana should be maintained and fruits should be harvested.
- The PO and beneficiaries should replace the affected commodities this rainy season.
- Maintain the seedling production not only to support the CARP project but as source of cooperative's livelihood.

Attached are the photo documentations and map of the monitored area.

For information, record and further instruction.
