BY: DATE: 08-09-2022 22-791

Please be informed that this Office has on 06 September 2021 transmitted for verification and approval the request for LC confirmation of Lot 163 of PLS 232. The same was on 28 June 2022 returned having been projected to fall on the sea. The same was verified and found that instead of 77 degrees, 17 degrees was indicated in the V-37 prepared. As Lot 163 was during the cadastral survey reduced into several lots, another was prepared only of the lot to which the portion acquired by Reynaldo Zapanta pertains, hence BL Form No. V-37 for Lot 627 of Cad. 862-D iden. to Lot 163(part) duly e-mailed to that Office on 11 July 2022.

On Friday (05 August), we received the attached memorandum of 21 July 2022 only furnishing us with another copy of the previous findings, raising issues we already have rectified. Attached is another copy of the V-37 submitted in compliance to the instruction on the matter.

For consideration.

This pertains to the application for survey authority of the above mentioned lot. Based on the verification and evaluation of this office of the submitted documents, it was observed that Lot 163, PLS 232 has an erroneous tie-line and it falls to the sea using the tie line S 17-23 W, 879.34 meters from BLLM No. 1, PLS 232. It was observed that the subject lot has the same shape which conforms to Lot 627, 707 & 793 of Cad.862-D Roxas Cadastre. Attached is a sketch showing the projection of the lot and a cadastral map showing different types of survey plans inside Lot 163, PLS 232. Thus, this office cannot issue confirmation for land classification status leading to the issuance for survey authority. It is recommended to check the different survey numbers applied inside Lot 163 if its approved or not and to what survey plan does the applicant falls based on its actual position.
