Good day!

We are 4th year BS Geodetic Engineering graduating students at the University of the Philippines Diliman. We are conducting an undergraduate thesis entitled: "SITE SUITABILITY ANALYSIS OF SALT FARMS IN PANGASINAN USING GEOSPATIAL DATA AND ANALYTIC HIERARCHY PROCESS" which aims to locate the most suitable areas for salt farm operations in Pangasinan by generating a site suitability map based on significant factors affecting salt production.

In line with this, we would like to respectfully request for the database containing the contact details of salt farms in the country and the vector file of existing salt farms in Pangasinan which will be used for validation and AHP survey, respectively. Please see details below:

File	Area	Period (Year)
Contact Details of Salt Farms	Philippines	2021/2022 or year with latest data available
Existing Salt Farms (.SHP)	Pangasinan Province	2021/2022 or year with latest data available

With the data provided, we would be able to select potential respondents for the AHP survey and to validate the accuracy of the site suitability map that will be produced in the study.

For any questions or concerns, please contact us through our email addresses indicated below.

Rest assured all datasets are for research purposes only and DENR will be properly acknowledged should there be any publication that will result from using the requested data.

Thank you very much.

Respectfully yours,

Aaron Jairo DC. Carrido
