SUBJECT : **SUBMISSION OF LAWIN PATROL REPORT OF CENRO CORON
FOR THE MONTH OF FEBRUARY 2023**

Respectfully submitted is the Lawin Patrol Report of CENRO Coron covering the period of February 20 to March 20, 2023.

Please be informed that the LAWIN patrollers of CENRO Coron were able to conduct ten (10) patrol works covering a total distance of Fifty-one point fourteen (**51.14**) kilometers within the conservation areas of Barangay 6, San Nicolas, Turda, Decabobo, and Cheey, all of which are located in the municipality of Coron; Old Busuanga, Concepcion, and Sto. Niño, all of which are located in the municipality of Busuanga; and Barangay Galoc, located in the municipality of Culion.

Please be informed further that there are three (3) cutting of trees recorded/observed one apprehension in the said previously patrolled area. In addition, tracks of Palawan bearded pig (*Sus ahoenobarbus*) were recorded. As well, these areas will be patrolled on a regular basis by LAWIN Patrollers the following month to monitor the development of the area.

For his information and record.

Summary Patrol Report

Region 04B - Coron

Number of days analyzed: 28

Mar 21, 2023 8:16 AM

This report presents the patrol performance and quality of the implementing unit during the above stated period of time (number of days). The report contains information on accomplishment rate, coverage and intensity of patrolling in different forest types on patrol distance covered per patroller. The information is meant to provide a basis for patrol planning for the next planning period and implementation of adaptive measures to enhance patrolling as necessary.

Overall accomplishment rate*

Level of Accomplishment

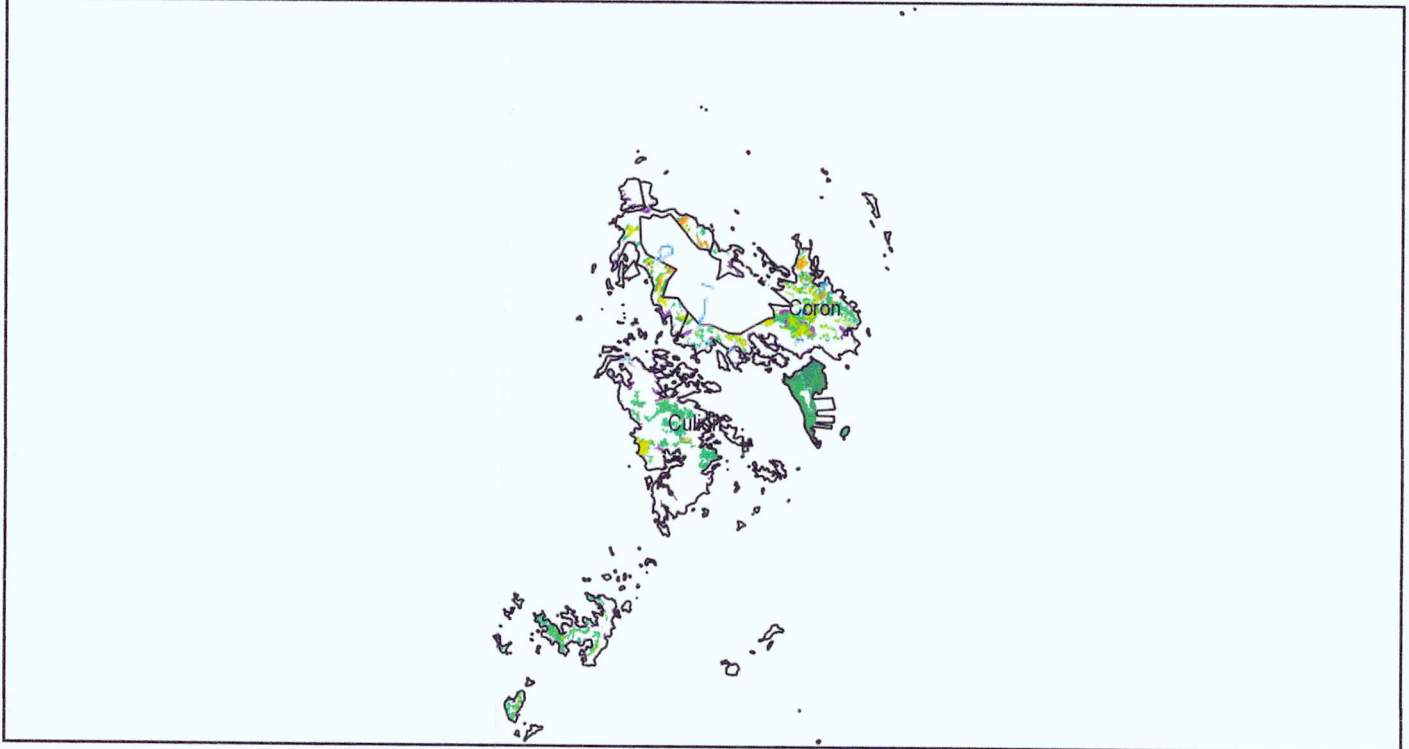

● Accomplishment
● Target

Accomplishment* for the period	Target* distance for the period
51.14	65.25

Accomplishment Rate:
78.38%

*Target is computed based on 10km target per team of 4 DENR patrollers per month

Patrol coverage and intensity

MAP SHOWING THE PATROL LOCATION OF CENRO CORON

Forest Protection Effectiveness Report

Region 04B - Coron

Number of days analyzed: 28

Mar 21, 2023 9:32 AM

This reports presents trends in observations of forest condition, regeneration, threats and indicator species. The combined presentation allows for an evaluation if protection efforts are effective, conservation targets are met and the forest achieves the desired future forest condition. Protection efforts are effective, when records of forest condition, regeneration and indicator species show an upward trend towards more observations more and denser regeneration, particularly in degraded forest areas. Increasing trends in indicator species suggest that the improved forest condition is providing a better habitat for forest dependent species. All trends presented are put in relation to the patrol effort to provide comparability. Forest cover data were derived from 2003 and 2010 NAMRIA land cover maps.

Trends of Observations per Patrol Kilometer in the Forest Conservation Area

Trend in Threats

A decreasing trend in threats in the forest conservation area mean effective forest protection; an increasing trend means the opposite.

Trend in Indicator Species

An increasing trend in indicator species in the forest conservation area means effective forest protection; a decreasing trend means the opposite.

Trends in Regeneration Density

An increasing trend in regeneration means effective forest protection; a decreasing trend means the opposite.

Summary Threat Report

Region 04B - Coron

Number of days analyzed: 28

Mar 21, 2023 8:16 AM

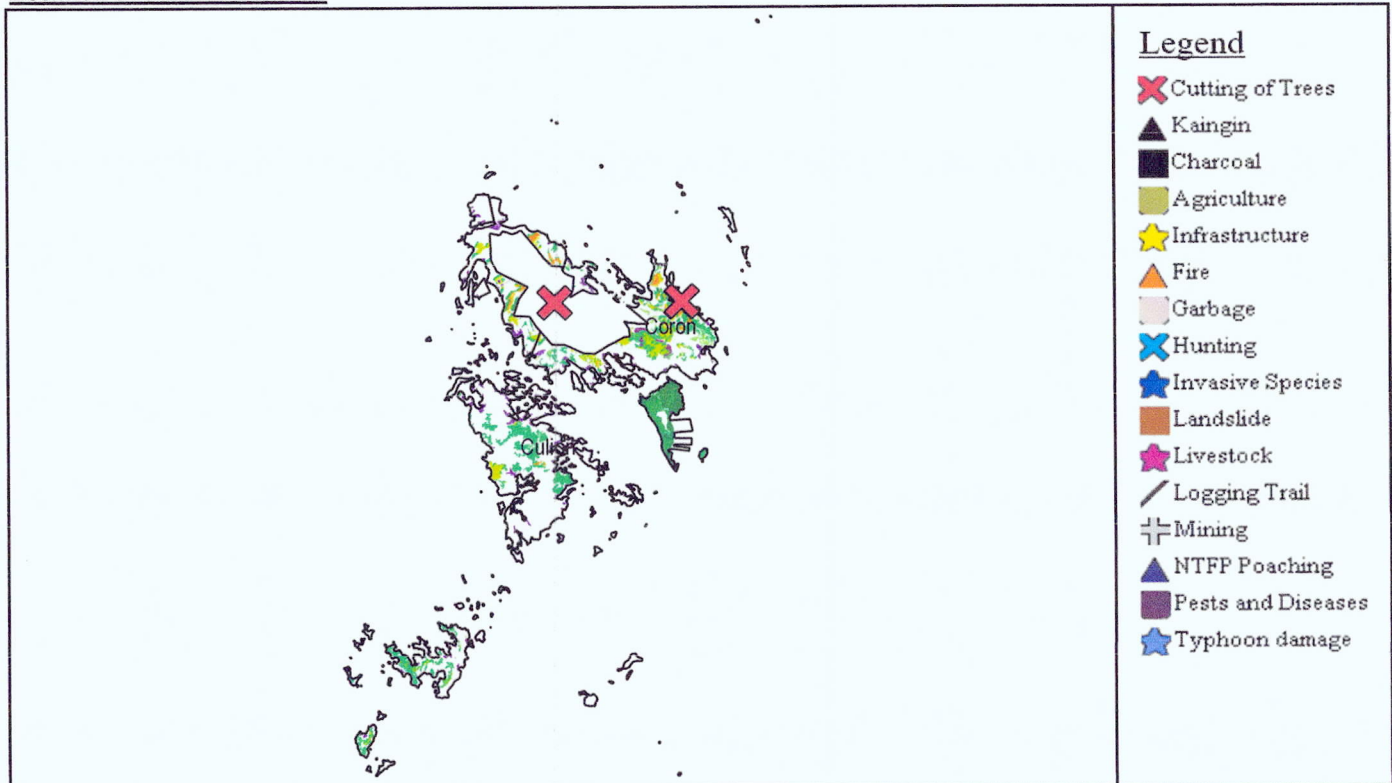

This report presents information for the implementing units of DENR to effectively plan and carry out actions for addressing observed threats to the forest.

Threats observed and level of response required

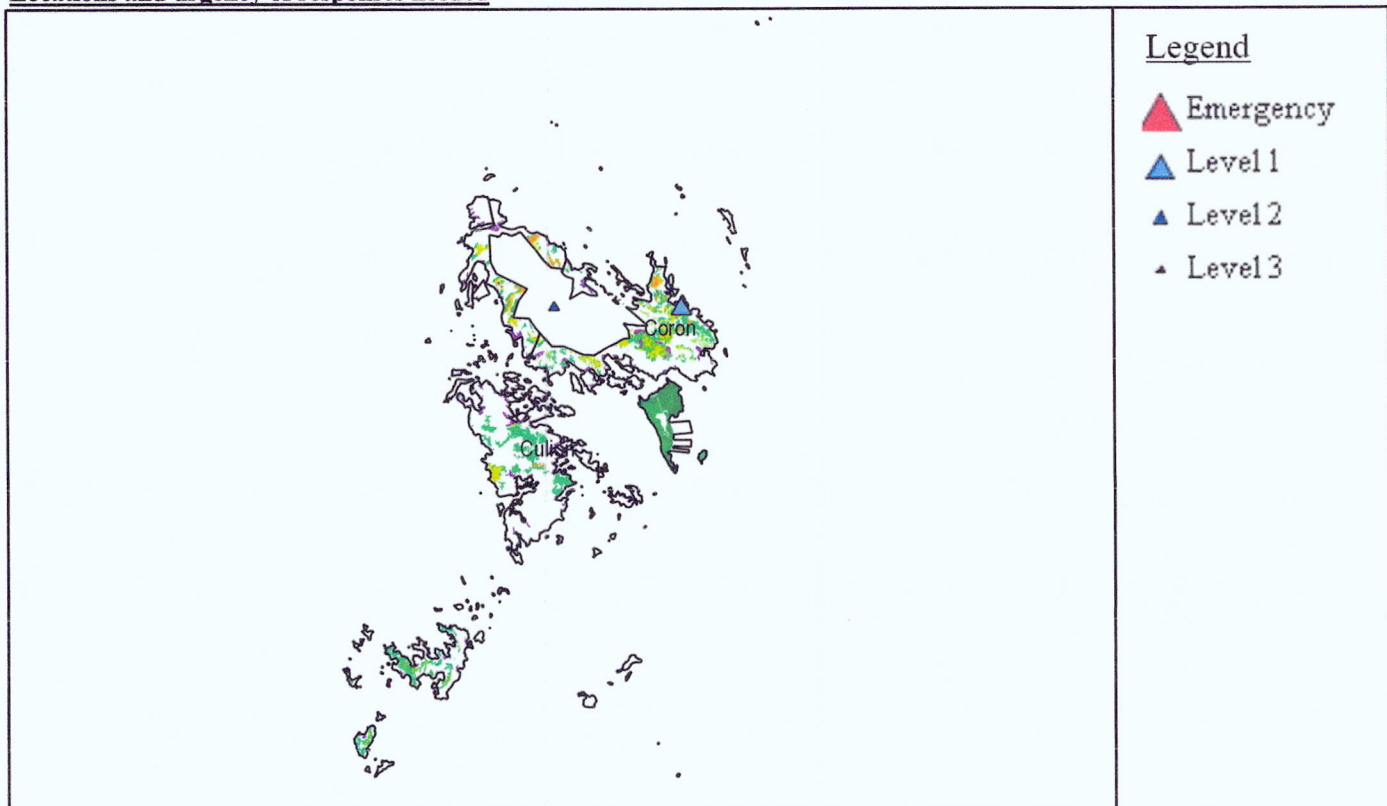

Threat	No. of Observations	Emergency - Immediate action required!	Level 1 - Action required within a week	Level 2 - Action required within a month
Cutting of Trees	3	0	1	2

Location of observed threats

Locations and urgency of responses needed

Summary Response Report

Region 04B - Coron

Number of days analyzed: 28 Mar 21, 2023 8:16 AM

This report presents the response performance and quality of the implementing unit during the above stated period of time (number of days). The report contains information on threats requiring responses, status of threats and types of responses per threat. The information is meant to provide a basis for response tracking and planning for the next planning period and implementation of adaptive measures to enhance responses to threats as necessary.

Number of threats observed: 3

Distribution of level of response required to address observed threats:

Immediate action required	Requires action within a week	Requires action within a month	No further action required
	1	2	

Number of threats requiring post-patrol responses:

Status of threats

No action yet	Requires further action	Addressed	Invalid observation
