MEMORANDUM

FOR : **The Regional Executive Director**
DENR MIMAROPA Region
1515 DENR By the Bay Bldg.
Roxas Blvd., Barangay 668
Ermita, Manila

THRU: **The Assistant Regional Director**
for Technical Services

FROM : **The OIC, PENR Officer**
Odiongan, Romblon

SUBJECT : **MANAGEMENT EFFECTIVENESS ASSESSMENT REPORT OF CALSANAG WATERSHED FOREST RESERVE LOCATED AT TABLAS ISLAND, ROMBLON, C.Y. 2023**

Respectfully submitting is the Management Effectiveness Assessment (MEA) Report of CALSANAG Watershed Forest Reserve located at Tablas Island, Romblon, C.Y. 2023.

Based on the Management Effectiveness Tracking Tool (METT) results, this protected area obtained the following rating by element, to wit: a.) Context 33.33%; b.) Planning 98.99%; c.) Input 59.47%; d.) Process 73.00%; e.) Outcomes 80.30%; and f.) Output 33.33%.

Accordingly, the Final METT Score (Total METT Rating + Additional Points Rating) is 88.51%. It means that the management effectiveness status is Excellent.

Please see attached pertinent documents in support to the MEA Report.

For information and further instruction.

MEMORANDUM

FOR : The OIC, PENR Officer

THRU : Chief, Technical Services Division

FROM : The PASu, CALSANAG WFR

SUBJECT : MANAGEMENT EFFECTIVENESS ASSESSMENT REPORT OF CALSANAG WATERSHED FOREST RESERVE LOCATED AT TABLAS ISLAND, ROMBLON, C.Y. 2023

Respectfully submitting is the Management Effectiveness Assessment Report of CALSANAG Watershed Forest Reserve located at Tablas Island, Romblon, C.Y. 2023.

Per comparison of METT results, this protected area progressively improved from 15% (Poor) in 2013 to 29.74% (Fair) in 2016, then, 72% (Good) in 2020, and finally, 88% (Excellent) in 2023.

For information and record.

MANAGEMENT EFFECTIVENESS ASSESSMENT REPORT

1. Description of the Protected Area

Please see attached Data Sheet 1: Reporting Progress at PA Site.

1.1. Area Description and Location

The Tablas Island is used to be a well-wooded island at the turn of the nineteenth century according to Worcester and Bourns (1898) as cited by Ong, Afuong, and Rusell-Ambal (2002) which signifies the origin of its name and is one of the sources of prime wood. But in the early 60s to 70s the area was logged by concession occupying more than one half of the area which now is identified as the priority area for conservation and research for arthropods, classified extremely high for amphibians and reptiles, extremely high for marine, very high for birds and very high biological level of importance for terrestrial and inland water areas (Ong, P.S., et. al. 2002).

The CALSANAG Watershed Forest Reserve (CWFR), the largest intact watershed in the island is considered as one of the priority conservation areas of various critical ecosystems, and is the habitat and home to globally threatened species. It has about 37 species, 7 orders, and 21 families of birds identified across ecosystems (MODECERA, 2017). One distinctive taxon is the Tablas Drongo (*Dicrurus menagei*), a species endemic to the Tablas Island and is considered endangered due to its very small population. It is declared as key species in the area by PAMB, and found nowhere else in the world but listed in IUCN as endangered (BirdLife International, 2016). It was believed to be extinct but the last sightings in 1998 proved that the species is extinct, albeit rare (Allen, 2006). Another notable species is the Colasisi or Philippine Hanging Parrot (*Loriculus philippinensis*), an endemic to the Philippines which has occasionally been found intoxicated on palm wine or tuba. About 8 species of fruit and insect bats were recorded including the Little Golden-Manteled Flying Fox (*Pteropus pumilus*). This is considered as near threatened and decreasing in population due to hunting and habitat destruction. In terms of spider diversity, a total of 597 spider individuals belonging to 14 genera under the families of *Araneidae, Clubionidae, Oxyopidae, Linyphiidae, Thomisidae, Nephilidae, Pisauridae, Sparassidae, Tetragnathidae, Theridiidae,* and *Theraphosidae* were recorded and 52% of these spiders are found in the grassland ecosystem (Fadri and Barrion, 2017). The most abundant family is *Araneidae* including the following: *Argiope catenulate, Argiope luzona, Argiope aemula, Neoscona theisi, Neoscona molemensis, Neoscona punctigera, Gasteracantha diasdemia, Poltys illepidus, Poltys n. sp. and Poltys elevatus*. A *Theraphosid, Orphnaecus sp*. was also common in the CALSANAG Watershed Forest Reserve. The *Orphnaecus sp.* and *Poltys sp.* are newly discovered species in the Philippines identified in CALSANAG Watershed while *Thomisus sp.* and the *Thomisus guangxicus* the new records in the Philippines (Fadri and Barrion, 2017). The insect diversity of CALSANAG also composed of 11 insect orders mostly dominated by *Lepidoptera, Phasmatodea, Hymenoptera*, and *Orthoptera* (MODECERA, 2017). The CALSANAG area is still the habitat of Philippine Palm Civet (Musang) through the presence of stool/feces in the area (DENR-BMS, 2017).

In terms of flora, a total of 109 species belonging to 50 families and 83 genera of

vascular plants were identified. Thirty (30) taxa or 27% of total species identified belonging to 20 families and 26 genera have distributions that are confined only to the Philippine Archipelago.A total of 15 species or 14% of total species are listed under the DAO 2007-1 and IUCN (2016) red lists of threatened species (Motin et.al., 2016).

The CWFR is composed of three adjoining municipalities, namely: Calatrava, San Andres, and San Agustin. It is located at the Northern part of Tablas Island approximately between 120° 35' North latitude and 122° 04' East longitude. It is one of the 240 protected areas in the Philippines managed by the Department of Environment and Natural Resources (DENR) as mandated by the National Integrated Protected Areas System (NIPAS) Act of 1992. Previously proposed as CALSANAG Protected Landscape, it was established as CALSANAG WFR under Proclamation No. 2186, signed on April 29, 1982, during the Marcos administration. CALSANAG used to cover 2,670 ha public domain identified in the BFD Map LC-660 certified on May 27, 1927. However, result of recent survey conducted by Regional Assessment Delineation Team (RADT) in May 8-22, 2014, the covered area was reduced to 2,614.28 hectares, as indicated in Figure 1.

Figure 1. Map of Delineated Boundary: CALSANAG Watershed Forest Reserve, 2014

1.2. Human Populations and Boundaries

Nine barangays are located near the reserve area, which include Linawan, Marigondon Norte, and Agpudlos in San Andres; Balogo, San Roque, and Pagsangahan in Calatrava; and Doña Juana, Dubduban and Binongaan in San Agustin.

A result of the Survey and Registration of Protected Area Occupants (SRPAO) made in 2017 using Socio-Economic Assessment and Monitoring System (SEAMS) revealed 185 household heads are PA occupants, however, only 83 are considered Tenured Migrants based on proof of occupancy submitted and validated from three municipalities. These household heads are largely composed of males with 89.19% compared to 10.81% females. The number of tenured migrants' household heads per municipalities is as follows: San Agustin has the highest number of tenured migrants accumulating 34 household heads (40.96%), followed by Calatrava with 30 household heads (36.14%), and San Andres with 19 household heads (22.89%). Meanwhile, no groups of Indigenous People are found occupying in the protected area.

2. Methodology (Methods used, date of assessment, respondents)

2.1. Collection of relevant documents

The following documents sourced from DENR PENRO Romblon were used for the assessment and evaluation process:

1. Calatrava, San Andres, San Agustin Watershed Forest Reserve: Management Effectiveness and Capacity Assessment Report in 2013, 2016 & 2020
2. General Management Plan (GMP)
3. CALSANAG Map shapefile

2.2. Facilitated METT Scoring

A total of 11 respondents participated on the assessment and evaluation of CALSANAG WFR using the Management Effectiveness Tracking Tool (METT) as the survey instrument with one representative-respondent from each of the concerned LGUs covered by the watershed and one DENR representative-respondent. The Punong Barangay or member of the Barangay Council as well as Municipal Officials represented the LGUs while the PASu represented the DENR.

To complete the full METT implementation, the respondents were invited during the conduct of 1st Quarter CALSANAG Watershed Forest Reserve- Protected Area Management Board held at Linawan Barangay Covered Court, Barangay Linawan, San Andres, Romblon on February 10, 2023. After the meeting of the Board, the respondents in the conduct of METT convened for the assessment, completing all the METT including all questions on the datasheets and narrative sections related to the multiple choice questions with initial deliberation of the results and discussion of the next steps. This was facilitated by Technical Working Committee of the PAMB. Through the facilitated scoring system of the METT, the emerging threats and issues in the management of the CALSANAG WFR were identified. Each member individually scored the METT after all the management indicators were fully explained by the facilitators and understood by the respondents. It was important that the scoring and basis of scoring were clear and commonly understood by the respondents.

Respondents of the assessment comprised of the following:

(1) Municipal Mayor Marieta F. Babera of Calatrava, Romblon;

(2) Punong Barangay Ernie T. Enquillo of Marigondon Norte, San Andres, Romblon;

(3) Punong Barangay Resty G. Gabaldon of Linawan, San Andres, Romblon;

(4) Municipal Mayor Arsenio G. Gadon of San Andres, Romblon;

(5) Protected Area Superintendent Raymund G. Inocencio;

(6) Punong Barangay Sulpicio G. Machado of Binongaan, San Agustin;

(7) Municipal Mayor Esteban S.F. Madrona, Jr. of San Agustin, Romblon;

(8) Punong Barangay Josefina M. Manalon of Doña Juana, San Agustin, Romblon:

(9) Punong Barangay Rolando M. Selosa, Sr. of Agpudlos, San Andres, Romblon;

(10) Punong Barangay Juliet M. Sixon of Balogo, Calatrava, Romblon; and

(11) Punong Barangay Redeemer D. Solano of Dubduban, San Agustin, Romblon.

3. Results and Analysis

3.1. Significance/Values/Key Features

Approximately, 36% (967.89 ha) of the original total land area (2670 ha) of the CALSANAG WFR is forest, while 28% (755 ha) and 25% (680.36) is grassland and coconut, respectively. Shrubs, pasture, and cultivated land covered the remaining area of the reserve.

From the inventory result of previous research projects on CWFR,[1] the forest area is dominated by locally known dipterocarp species such as "Lauan", "Tanguile", "Apitong", "Bagtikan", "Yakal", and "Manggachapui" and has an estimated mean total of 315 stems/ha representing 98 species found naturally thriving in the area belonging to 47 families. This indicates that the present forest structure and composition in the CALSANAG watershed may be at its early build-up phase towards a more complex structure and composition (i.e. climax phase). The high number of small-diameter classes indicates the abundance of young trees typical of natural forests and is a manifestation of ecosystem resilience.[2]

Moreover, based on the report on Resource Valuation Project in the CWFR (2020)[3], the CWFR is critical in the provision of various ecosystem services and functions that help the economies of the surrounding agricultural and coastal communities directly and indirectly. These services include the supply of food, timber, and non-timber forest products;

[3] Research project on Resource Valuation of CALSANAG Watershed Forest Reserve and Payment for Ecosystem Services conducted by the Romblon State University funded by the DENR (2020).

regulation of carbon sequestration, water supply and quality, and soil protection; and essential underlying functions such as oxygen production.

3.2. **Threats/Stressors**

The CALSANAG WFR currently faces issues and threats. **Error! Reference source not found.** presents the result of threat values based on the METT responses of the respondents. The highest possible answer in threat values is 11 representing a total of 11 respondents. However, values can also have a total of less than 11 since some respondents' answers were "no data" or not-applicable" which were not accounted.

Overall, the respondents perceived that all threats presented are facing a low level of threat. Of the identified low level threats, the biological resource use and harm within a protected area has the highest mean value of 0.85, followed by agriculture and aquaculture within a protected area at 0.67, geological event at 0.61, specific cultural and social threats at 0.53 and residential and commercial development within protected area at 0.33. This means that low level threats are primarily due to some human disturbance like timber and non-timber poaching activities as observed within Barangays Balogo and San Roque, Calatrava and Barangay Mari-Norte, San Andres. This includes gathering of poles for household use and extraction of "Balew" leaves for weaving Bayong baskets. Thus, human extractive activities within terrestrial ecosystems shall be fully monitored and controlled by the management.

Table 1. Threat values based on the METT response

CALSANAG Threats	Mean Threat Score	Description
1. Residential and commercial development within protected area	0.33	Low threat
2. Agriculture and aquaculture within a protected area.	0.67	Low threat
3. Energy production and mining within or outside a protected area.	0.07	Low threat
4. Transportation and service corridors within a protected area.	0.16	Low threat
5. Biological resource use and harm within a protected area.	0.85	Low threat
6. Human intrusions and disturbance within a protected area.	0.24	Low threat
7. Natural system modifications.	0.29	Low threat
8. Invasive and other problematic species and genes	0.32	Low threat
9. Pollution entering or generated within protected area.	0.10	Low threat
10. Geological event	0.61	Low threat
11. Climate change and severe weather.	0.18	Low threat
12. Specific cultural and social threats	0.53	Low threat
Average	**0.36**	**Low threat**

3.3. **Management Effectiveness**

Context. The context refers to the legal status of CALSANAG WFR which was established as such by virtue of Presidential Proclamation No. 2186 on 29 April 1982. All of the assessors except for two, gave a rating of zero and two which put the total rating for context at 33.33% (**Error! Reference source not found.**). The exception gave a rating of zero, a rating for not having the CWFR gazetted despite the discussions presented during the assessment. Currently, this protected area is under review of the National NIPAS Review Committee. Based on the result of Protected Area Suitability Assessment (PASA), the CALSANAG Watershed Forest Reserve is for inclusion to the National Integrated Protected Areas System (NIPAS) under the category of Protected Landscape.

Although all of the identified threats were perceived as low impact threats, the threat of a growing population, new road openings to and from the area, and the continuously increasing demand for lumber and firewood and other forest products exposes the protected area to threats made by human. Thus, the proclamation of the CALSANAG Watershed Forest Reserve as a protected landscape under NIPAS is critical in a small island community.

Table 2. Total score and percentage of context element of management effectiveness of CALSANAG WFR

Element	Question No.	Score	No. of Respondents	Total Score	Percentage
Context	1	0	1	0	
		1	9	9	27.27
		2	1	2	6.06
		3		0	
Total Respondent Score for Context				**11**	**33.33**
TMS for Context				**33**	

Planning. The planning element evaluates the established vision, goals, objectives and strategies to conserve values and reduce threats. Specifically, this area of management being assessed is comprised of CALSANAG WFR regulations, objectives, design, management plan, work and financial plan (WFP), and land and water planning. This element of evaluation for CWFR has the highest level of consolidated rating at 98.99% (Table 3) with maximum scores attained on issues concerning the protected area objectives, protected area design and Regular Work Plan (Annual WFP).

Currently, it has the General Management Plan (GMP) applicable until 2022 submitted but is yet to be approved so funding for its planned activities are dependent on the regular budget of the DENR-PENRO and respective LGUs for protection and conservation activities. Environmental profile of the CWFR was undertaken through the biodiversity assessment on the flora and fauna resources conducted by Romblon State University using its internally and externally generated funds.

Table 3. Total score and percentage of planning element of management effectiveness of CALSANAG WFR

Element	Question No.	Score	No. of Respondents	Total Score	Element Rating (%)
Planning	2, 4, 5, 7, 8, 21	0		0	
		1		0	
		2	2	4	2.02
		3	64	192	96.97
Total Respondent Score for Planning				**196**	**98.99**
TMS for Planning				**198**	

Inputs. The input element assesses the resourcing of the DENR and the resourcing of the protected area. This specifically considers how resources of staff, money and equipment are allocated to work towards the objectives. It considers law enforcement staff, availability of information, staff number and training, current budget, security of budget, equipment and fees in the management and protection of CWFR. The assessors gave an overall quality of input rating of 59.47% (Table 4) with the lowest score (lower middle ratings to zero) on the issues of: 1) fees, as there are no entry fees or fines collected, and 2) staff members, as there are inadequate for critical management activities. Only 3 regular staff assigned in the protected area.

On the issues of law enforcement, security of budget, staff training, current budget, most of the assessors gave the upper middle rating while the resource inventory obtained the highest rating. There are related researches on biodiversity conducted over the last 5 years however, information dissemination was limited. Furthermore, in terms of law enforcement, the LGUs PA Rangers and DENR PENRO -Monitoring and Enforcement Section personnel augmented the limited number of protected area staffs but there are some deficiencies in staff training, enforcement plan, budget and equipment, including the systematic monitoring and reporting.

Table 4. Total score and percentage of input element of management effectiveness of CALSANAG WFR

Element	Question No.	Score	No. of Respondents	Total Score	Element Rating (%)
Input	3, 9, 13, 14, 15, 16, 18, 29	0	23	0	
		1	13	13	4.92
		2	45	90	34.09
		3	18	54	20.45
Total Respondent Score for Input				**157**	**59.47**
TMS for Input				**264**	

Process. The process element evaluates the suitability of management processes and how the management board implement management actions according to its processes. The consolidated percentage rating for the process element of management is 73.00% (Good; Table 5), which reflects how the PAMB was re-established from its dormancy to undertake

its mandate, a big improvement from 2013 METT results of 15% (Poor), 29.74% (Fair) in 2016 and 72% (Good) in 2020. This is supported by local communities' direct contribution to some relevant decisions, adequate budget management, delineation and knowledge of boundary, active undertaking of resource management, conduct of research and development of program of management-oriented survey, and conduct of monitoring and evaluation of management activities and against performance. However, some issues that need to be addressed further are those that concern on commercial tourism operators and state and commercial neighbours.

Table 5. Total score and percentage of process element of management effectiveness of CALSANAG WFR

Element	Question No.	Score	No. of Respondents	Total Score	Element Rating (%)
Process	6, 10, 11, 12, 17, 19, 20, 22, 24, 26, 28	0		0	
		1	24	24	6.61
		2	50	100	27.55
		3	47	141	38.84
Total Respondent Score for Process				**265**	**73.00**
TMS for Process				**363**	

Outputs. The outputs element assesses the implementation of management programs and actions as well as delivery of products and services. All of the assessors gave a rating of 1.0 which put the total rating for output at 33.33% (Table 6). Despite inadequacy of visitor facilities, there was one newly-maintained ecotourism shed in Balogo, Calatrava that served as reception shed to cater local tourists in this area.

Table 6. Total score and percentage of output element of management effectiveness of CALSANAG WFR

Element	Question No.	Score	No. of Respondents	Total Score	Element Rating (%)
Output	27	0		0	
		1	11	11	33.33
		2		0	
		3		0	
Total Respondent Score for Output (TS for Output)				**11**	**33.33**
TMS for Output				**33**	

Outcomes. The outcomes element assesses the outcomes and the extent to which they achieved objectives. Majority of the assessors gave a rating of 1.0 which put the total rating for outcomes at 80.30% (Table 7). Since this protected area is a watershed, it provides abundant water to the Municipalities of Calatrava, San Andres and San Agustin, Romblon for household, agricultural, industrial and institutional use. Then, some pristine natural pools and waterfalls found in the areas that attract tourists both local and foreign. In addition, the academe and other agencies continuously conduct biodiversity research/program and

information dissemination that in the end help to address biodiversity threats and maintain key biodiversity, ecological and cultural values in the protected area.

Table 7. Total score and percentage of outcomes element of management effectiveness of CALSANAG WFR

Element	Question No.	Score	No. of Respondents	Total Score	Element Rating (%)
Outcomes	25, 30	0		0	
		1		0	
		2	13	26	39.39
		3	9	27	40.91
Total Respondent Score for Outcomes				**53**	**80.30**
TMS for Outcomes				**66**	

Table 8. Additional points rating and percentage of planning, process and output elements of management effectiveness of CALSANAG WFR

Element	Question No.	Score	No. of Respondents	Total Score	Element Rating (%)
Planning, Process, Output	7a-7e, 21a-21c, 24a-24c, 29a, 30a-30c	0		0	
		1	154	154	77.78
		2		0	0.00
		3		0	0.00
Total additional points				**154**	**16.09**
TMS for All Elements				**957**	

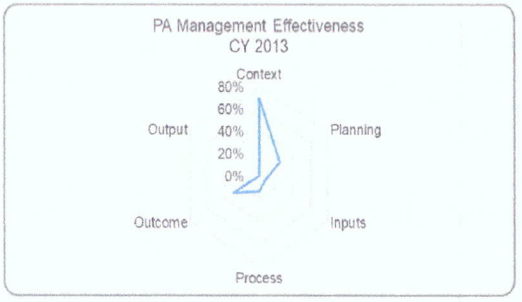
$$\text{Total METT Rating (\%)} = \frac{\sum TS \text{ of all elements}}{\sum TMS \text{ of all elements}} = \frac{693}{957} = \mathbf{72.41\%}$$

Final METT Score (%) = Total METT Rating + Additional Points Rating
= 72.41% + 16.09%
= **88.51%(Excellent)**

4. Summary and Recommendations

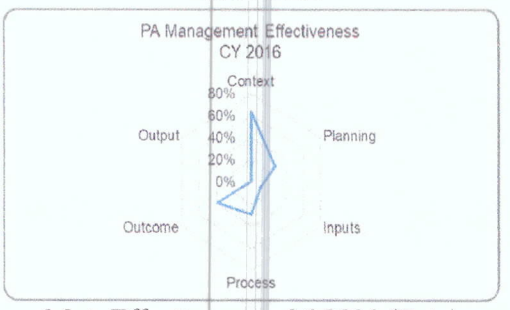
Below are the summary of the overall management effectiveness rating of CALSANAG Watershed Forest Reserve with recommendations and actions:

C.Y. 2013



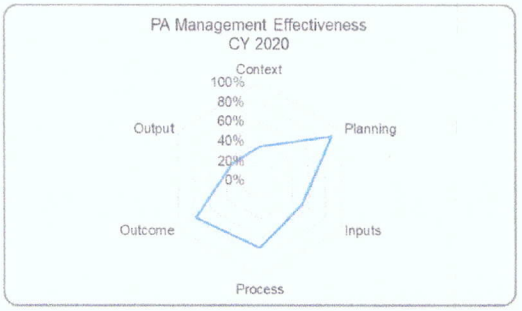
Mgt. Effectiveness: 17.83% (Poor)

C.Y. 2016



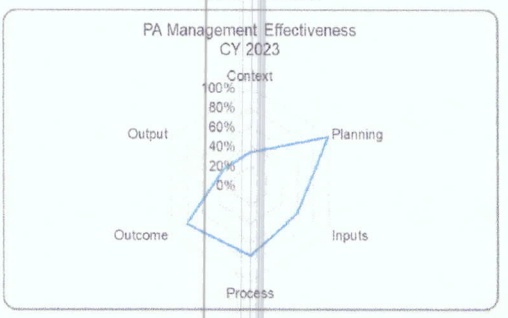
Mgt. Effectiveness: 26.90% (Fair)

C.Y. 2020



Mgt. Effectiveness: 70.00% (Good)

C.Y. 2023



Mgt. Effectiveness: 88.51% (Excellent)

Figure 1-Radar Chart for the Management Effectiveness Rating of CALSANAG Watershed Forest Reserve, C.Y. 2013, 2017, 2020 and 2023.

Table 9. Prioritized recommended interventions and sources for CALSANAG Watershed Forest Reserve

Specific Interventions	Sources of Intervention		
	Local	Regional	National
1. Strengthening PAMB membership and additional PAMO personnel			
Reorient all PAMB members and PAMO personnel about CALSANAG WFR management			
Employ and or/ designate technical personnel and regular staff for enforcement			
Ensure incorruptible, committed and knowledgeable personnel			
2. Revisiting the general management plan			
Organize composite team to delineate management zones of the PA			
Organize/Hire technical personnel to revisit the management plan			
Mainstream in the CLUP the management of the protected area			
DENR PENRO-CWFR PAMO should provide forest tree seedlings			
Revive the certificate of tree planning requirement for marriage			
Enhance community awareness about CALSANAG WFR protection			
3. Generating funds from various sources			
Seek national and local government allocations for PA management			
Persuade political leaders to lobby on the proclamation of CWFR to NIPAS			
4. Strengthening of enforcement capacity and resources			
Strengthen personal values, fairness and political will to enforce			
Coordinate with local authorities about the strict implementation of PA related laws			
Employ regular forest guards and should be visible in the area			
Purchase horse for patrolling inside the forest			
5. Provisioning of alternative livelihoods			
Introduce appropriate alternative livelihoods for diversion			
Relocate households to areas where they can be productive			

ELEMENTS	PARAMETERS	PROPOSED MANAGEMENT INTERVENTIONS AND GUIDANCE	SOURCES OF INTERVENTION
1. Context	1.1 Legal Status	• Lobby with respective congressmen and LGU officials to support the declaration of CWFR as a Protected Landscape of the protected area.	• Regional • National
2. Planning	2.1 PA Regulation 2.2 PA Objectives 2.3 PA Design 2.4 PA Management Plan a. Stakeholder involvement b. Periodic review c. Research and M&E d. Operations Manual e. Enforcement Manual 2.5 Regular Work Plan 2.6 Planning for adjacent land and water use a. Land use planning for conservation b. Connectivity c. Planning for ecosystem services	• Strengthen PA patrolling, law enforcement and Communication, Education and Public Awareness. • Update PA Management Plan following the BMB Technical Bulletin No. 2016-08 (Clarifying the Protected Area Management Planning Process and Providing the Annotated Outline for PA Management Plans) and harmonize with local plans (CLUP and FLUP, among others). • Annual Work and Financial Plan shall be consistent with the PA Management Plan and ensure for its implementation by getting support from the local government units in addition from the GAA. • Determine and delineate Management Zones and appropriate management interventions following BMB TB No. 2018-01 (Clarifying the Procedures in the Identification, Designation and Delineation of Management Zones of PAs under the NIPAS).	• Local • Regional

ELEMENTS	PARAMETERS	PROPOSED MANAGEMENT INTERVENTIONS AND GUIDANCE	SOURCES OF INTERVENTION
		• Ensure that management objectives and activities are consistent with the category of the protected area. • Update PAMB Manual of Operations following the BMB TB No. 2017-04 (Prescribing the Guidelines on the Preparation of the PAMB Manual of Operations) to promote transparency and accountability among the members of the Management Board in performance of their duties and responsibilities.	
3. Input	3.1 Law Enforcement 3.2 Resource Inventory 3.3 Staff Numbers 3.4 Current Budget 3.5 Security of Budget 3.6 Equipment 3.7 Fees	• Encourage support from LGU and other external units such as, NGOs, Water Districts, private institutions and academe, among others, to augment the financial and manpower requirements of the protected area. • Conduct biodiversity and socio-economic assessments and monitoring following BMB TB No. 2017-09 (Adopting the User Manual on Biodiversity Assessment and Monitoring System for Terrestrial Ecosystems), BMB TB. No. 2017-04 (Guidelines on the Assessment of Coastal and Marine Ecosystems), BMB TB No. 2016-06 (Guidelines on Socio-Economic Assessment	• Local • Regional • National

55.) CWFR-PAMB RESOLUTION NO. 055-22 Series of 2022 RESOLUTION RESPECTFULLY REQUESTING THE DEPARTMENT OF SCIENCE AND TECHNOLOGY AND THE ROMBLON STATE UNIVERSITY TO ALLOCATE FUNDS FOR THE RE-ESTABLISHMENT OF THE PROGRAM ENTITLED "MONITORING AND DETECTION OF ECOSYSTEMS CHANGES FOR ENHANCING RESILIENCE AND ADAPTATION IN THE PHILIPPINES (MODECERA)" LOCATED AT CALSANAG WATERSHED FOREST RESERVE, BALOGO, CALATRAVA, ROMBLON

56.) CWFR-PAMB RESOLUTION NO. 056-22 Series of 2022 RESOLUTION RESPECTFULLY REQUESTING HON. JOSE R. RIANO, PROVINCIAL GOVERNOR OF ROMBLON TO PROVIDE BASIC PATROLLING EQUIPMENT'S AND SUPPLIES FOR THE PROTECTED AREA RANGERS IN NINE (9) BARANGAY LGU'S IN THE MUNICIPALITIES OF CALATRAVA, SAN ANDRES AND SAN AGUSTIN, ROMBLON UNDER CALSANAG WFR, TABLAS ISLAND, ROMBLON

57.) CWFR-PAMB RESOLUTION NO. 057-22 Series of 2022 RESOLUTION EXPRESSING THE HEARTFELT GRATITUDE AND APPRECIATION TO THE BARANGAY LOCAL GOVERNMENT UNIT OF DOÑA JUANA, SAN AGUSTIN, ROMBLON FOR SUCCESSFULLY HOSTING THE FOURTH QUARTER CALSANAG WATERSHED FOREST RESERVE-PROTECTED AREA MANAGEMENT BOARD (CWFR-PAMB) MEETING LOCATED AT TABLAS ISLAND, ROMBLON ON OCTOBER 7, 2022

58.) CWFR-PAMB RESOLUTION NO. 058-22 Series of 2022 RESOLUTION EXPRESSING THE HEARTFELT GRATITUDE AND APPRECIATION TO THE ROMBLON STATE UNIVERSITY FOR THEIR ACTIVE PARTICIPATION DURING THE CONDUCT OF FOURTH QUARTER CALSANAG WATERSHED FOREST RESERVE-PROTECTED AREA MANAGEMENT BOARD (CWFR-PAMB) MEETING LOCATED AT TABLAS ISLAND, ROMBLON ON OCTOBER 7, 2022

59.) CWFR-PAMB RESOLUTION NO. 059-22 Series of 2022 RESOLUTION EXPRESSING THE HEARTFELT GRATITUDE AND APPRECIATION TO THE MUNICIPAL LOCAL GOVERNMENT UNIT OF SAN AGUSTIN, ROMBLON FOR THEIR ACTIVE PARTICIPATION DURING THE CONDUCT OF FOURTH QUARTER CALSANAG WATERSHED FOREST RESERVE-PROTECTED AREA MANAGEMENT BOARD (CWFR-PAMB) MEETING LOCATED AT TABLAS ISLAND, ROMBLON ON OCTOBER 7, 2022

60.) CWFR-PAMB RESOLUTION NO. 060-22 Series of 2022 RESOLUTION EXPRESSING THE HEARTFELT GRATITUDE AND APPRECIATION TO THE MUNICIPAL LOCAL GOVERNMENT UNIT OF CALATRAVA, ROMBLON FOR THEIR ACTIVE PARTICIPATION DURING THE CONDUCT OF FOURTH QUARTER CALSANAG WATERSHED FOREST RESERVE-PROTECTED AREA MANAGEMENT BOARD (CWFR-PAMB) MEETING LOCATED AT TABLAS ISLAND, ROMBLON ON OCTOBER 7, 2022

61.) CWFR-PAMB RESOLUTION NO. 061-22 Series of 2022 RESOLUTION EXPRESSING THE HEARTFELT GRATITUDE AND APPRECIATION TO THE MUNICIPAL LOCAL GOVERNMENT UNIT OF SAN ANDRES, ROMBLON FOR THEIR ACTIVE PARTICIPATION DURING THE CONDUCT OF FOURTH QUARTER CALSANAG WATERSHED FOREST RESERVE-PROTECTED AREA MANAGEMENT BOARD (CWFR-PAMB) MEETING LOCATED AT TABLAS ISLAND, ROMBLON ON OCTOBER 7, 2022

Summary of CALSANAG Watershed Forest Reserve -Biodiversity Monitoring System
Reports with reference to law enforcement and biodiversity assessment
C.Y. 2019-Present

Year 2019			
SPECIES	**n**	**RA (n/N)**	**% frequency**
Brown Shrike (Alimbabaras)	128	0.2058	20.58%
Common Palm Civet (Gayong)	102	0.1640	16.40%
Phil. Green Parrot (Pikoy)	77	0.1238	12.38%
Black-headed Munia (Intsamis)	47	0.0756	7.56%
Red jungle fowl (Ilahas na Manok)	42	0.0675	6.75%
Plain Throated Sunbird (Tamsi)	41	0.0659	6.59%
Pied Fantail (Tagutihot)	35	0.0563	5.63%
Streak Breasted Bulbul (Tikmaya)	25	0.0402	4.02%
Common Koel (Bahaw)	22	0.0354	3.54%
White Eared Brown Dove (Alimukon)	22	0.0354	3.54%
Phil. Coucal (Kokuk)	21	0.0338	3.38%
Phil. Hanging Parakeet (Kosi)	20	0.0322	3.22%
Emerald Dove (Punay)	17	0.0273	2.73%

Year 2020			
SPECIES	**n**	**RA (n/N)**	**% frequency**
Streak Breasted Bulbul (Tigmaya)	163	0.4055	40.55%
Phil. Green Parrot (Pikoy)	95	0.2363	23.63%
Black-headed Munia (Intsamis)	88	0.2189	21.89%
Phil. Hanging Parakeet (Kusi)	66	0.1642	16.42%
Pied Fantail (Tagutihot)	61	0.1517	15.17%
Plain Throated Sunbird (Tamsi)	50	0.1244	12.44%
Red jungle fowl (Ilahas na Manok	44	0.1095	10.95%
Brown Shrike (Alimbabaras)	34	0.0846	8.46%

SUMMARY OF ACCOMPLISHMENT REPORTS,
Work and Financial Plan
2016 To Present

YEAR	ACTIVITY IMPLEMENTED	AMOUNT (PHP)
2016	1.) Biodiversity Monitoring System (BMS)	300,000.00
	2.) Blue/Green Brigade Volunteers	12,000.00
	3.) IEC/Advocacy Campaign	141,000.00
	4.) Establishment/Maintenance of Long-Term Vegetation Plots	300,000.00
	Sub-total	**753,000.00**
2017	1.) Preparation of Management Plan	500,000.00
	2.) Biodiversity Monitoring System (BMS)	200,000.00
	3.) Hiring of Forest Protection Officer (FPO)	204,000.00
	4.) Blue/Green Brigade Volunteers	396,000.00
	5.) IEC Materials Distributed	7,000.00
	6.) Hiring of Communication Staff	223,000.00
	7.) PAMB Meetings	100,000.00
	Sub-total	**1,630,000.00**
2018	1.) Biodiversity Assessment & Monitoring Systems (BAMS)	606,000.00
	2.) Protected Area Suitability Assessment (PASA)	293,000.00
	3.) Advocacy/IEC	200,000.00
	4.) Biodiversity Monitoring System (BMS)	250,000.00
	5.) PAMB Meetings	100,000.00
	Sub-total	**1,449,000.00**
2019	1.) Blue/Green Brigade Volunteers	288,000.00
	2.) Advocacy/IEC	200,000.00
	3.) Biodiversity Monitoring System (BMS)	250,000.00
	4.) PAMB Meetings	76,000.00
	5.) Capacity Building	124,000.00
	Sub-total	**938,000.00**
2020	1.) Communication, Education & Public Awareness (CEPA) on BAMS Result	208,000.00
	2.) Biodiversity Monitoring System (BMS)	250,000.00
	3.) PAMB Meetings	145,000.00
	4.) Management Effectiveness Assesment (MEA)	50,000.00
	5.) Updating of Manual of Operations	68,000.00
	Sub-total	**721,000.00**

2021	1.) Biodiversity Monitoring System (BMS)	250,000.00
	2.) CEPA Materials developed/produced & distributed	300,000.00
	3.) PAMB Meetings	135,000.00
	4.) Maintenance of DENR Facility:Ecotourism Shed	150,000.00
	Sub-total	**835,000.00**
2022		
	1.) Biodiversity Monitoring System (BMS)	250,000.00
	2.) CEPA Materials developed/produced & distributed	300,000.00
	3.) Capacity-Building	50,000.00
	4.) PAMB Meetings	283,000.00
	5.) Maintenance of DENR Facility:Ecotourism Shed	150,000.00
	Sub-total	**1,033,000.00**
2023	1.) Biodiversity Assessment and Monitoring System (BAMS)	200,000.00
	2.) Biodiversity Monitoring System (BMS)	250,000.00
	3.) Communication Plan	300,000.00
	4.) CEPA Materials developed/produced & distributed	290,000.00
	5.) Capacity Building	315,000.00
	6.) PAMB Meetings	283,000.00
	7.) Maintenance of Ecotourism Facility	150,000.00
	Sub-total	**1,788,000.00**

CALSANAG Watershed Forest Reserve
Tablas Island, Romblon

SUMMARY OF FINANCIAL COUNTERPART FROM LGUs
F.Y. 2020-2023

Name of LGU	2020	2021	2022	2023	Amount
1.) Calatrava					
MLGU	150,000	150,000	150,000	150,00	**Php 600,000**
BLGUs (3 BLGUs@4 pax @900@12 mos.)	129,600	129,600	129,600	129,600	**Php 518,400**
2.) San Andres					
MLGU	-	-	500,000	300,000	**Php 800,000**
BLGUs (3 BLGUs@4 pax @900@12 mos.)	129,600	129,600	129,600	129,600	**Php 518,400**
3.) San Agustin					
MLGU	-	-	120,000	60,000	**Php 180,000**
BLGUs (3 BLGUs@4 pax @900@12 mos.)	129,600	129,600	129,600	129,600	**Php 518,400**
