Please be informed that on December 10, 2022, at around 8:00 a.m., the undersigned received a call from Mr. Crozaldo Macalalad of Sitio Pandan, Barangay Claudio Salgado informing him that two marine turtles had been caught in his fishnet.

The undersigned went to the location and evaluated the two (2) marine turtles. Upon closer inspection both are identified as female Olive Ridley (*Lepidochelys olivacea*). One of the turtles is still alive, while the other was discovered dead due to entanglement. The latter was buried at Sitio Pandan Beach (GPS location: 51 P 260610, 1426984), while the surviving one (1) was evaluated, tagged, and released with the Tagging Code No. PH1558K. The MT01 Marine Turtle Tagging Data Form and the MT02 Marine Turtle Stranding Report Form were used to record these marine turtles.
