MEMORANDUM

FOR : The Regional Executive Director
DENR - MIMAROPA Region
1515 L&S Bldg. Roxas Blvd., Ermita, Manila

THRU : The OIC, PENR Officer
Mamburao, Occidental Mindoro

FROM : The CENR Officer

SUBJECT : SUBMISSION OF THE REPORT ON THE MARINE
TURTLE NESTING ACTIVITIES WITHIN THE
JURISDICTION OF CENRO – SAN JOSE, OCCIDENTAL
MINDORO

Respectfully submitted is the report re: abovementioned subject conducted by the CDS- BMU covering the months from November to December, 2022 in Brgy. Concepcion, Calintaan, Occidental Mindoro.

Please be informed that for the said months, there have been three (3) marine turtle nesting activities reported in Brgy. Concepcion, Calintaan, Occidental Mindoro. Furthermore, CDS-BMU staff and other stakeholders, including Bantay Dagat members, relocated a clutch of eggs for the reason that the nesting site was too close to the sea level, and rising seas or tides could cause the eggs not to hatch. Through these instincts, on December 08, 2022 BMU staff and Bantay Dagat volunteers decided to bury the clutch of eggs in an alternative nest where the water could not reach it and covered it with fish nets to protect it from any predators.

Hereunder is the consolidated data of marine turtle nests monitored for November to December 2022:

Date	Place	Remarks
November 25, 2022	Brgy. Concepcion, Calintaan, Occidental Mindoro	Concerned Bantay Dagat volunteers reported one (1) marine turtle nesting activity. Sea turtle eggs have an incubation period of about two months. Furthermore, these reported eggs are expected to hatch on January 26, 2022 and the following days.
December 06, 2022	Brgy. Concepcion, Calintaan, Occidental Mindoro	Two (2) marine turtle nesting activities were reported by concerned Bantay Dagat volunteers. These reported nests are expected to hatch on February 23, 2022 and the following days.

Attached are photo documentations of the activities for your ready reference.

For your information and record.

For and in the absence of the
