 - a. **Organizer** : The undersigned personnel
 - b. **Participants** : eNGP Partners (from Municipality of
Narra, Quezon, Rizal)

Agenda:

3. Updating of respective shapefile/polygon.

During the actual perimeter/tracking, the Forest Extension Officers observed that some of the polygon has a discrepancy in the actual area planted.

- That, on April 2023 the Forest Extension Officers started to update the entire polygon based on actual plantation established by PO's.
- As of to date, the eNGP Projects CY 2021 within the Municipality of Narra is already updated based on actual plantation.

4. Sharing of PO's ^{best} practices

During the implementation of the project. All PO's eNGP partners shared their best practices and it will be guide/basis of other PO's well. Following are the shared best practices.

- One best of observation from very start planting materials/seedlings must be in polybag not bare-root for higher survival in the future.
- Continuous seedlings production for the replacement of mortality.
- Continuous maintenance and protection activity like; ring weeding or strip brushing and patrolling.
- Application of fertilizer to increase the high survival rate of the plantation.
- Intended allocation fund must be expense to the project and sometimes personal money is the first expenditure in order ready/attain the (as shared by Mrs. Eleazar of Aramaywan, Narra, Palawan).
- Don't hesitate to ask technical assistance to the DENR personnel for improvement of the implementation of the project.

5. Issues and Concern

During the implementation of eNGP project some of the PO's/Partners shared their experiences for some hindrances during the implementation of the project.

- Some of the claimant in the identified areas for the project is being backed-out due to the selection of commodity particularly for the pure indigenous species to be planted in their area.
- Delay release of fund.
-

6. Announcement of PAGASA for El Niño Phenomenon.

- All eNGP Partners are advised to ready for the preventive measure to protect the established plantations.
- Continuous monitoring and patrolling to the respective plantation/areas.
- Creation of fire break if possible for those fire prone areas.
- Continuous seedlings production as replacement for the mortality and be planted in rainy season.
