RAPID LAND TENURE APPRAISAL

RLTA is a barangay profiling activity designed primarily to establish a comprehensive database and mapping of the status of land parcels in the cities and municipalities which were covered by Cadastral Surveys done more than 30 years ago. The actual lot inventory will reveal how much of the remaining untitled lots are readily available and workable for issuance of land patents.

COMMENT/RECOMMENDATION

The conduct of Rapid Land Tenure Appraisal (RLTA) has proven effective in expediting the processing of land titling of readily available and workable lots. This program has given the residents of San Agustin a great opportunity of having their properties surveyed for free. But there are still huge numbers of properties that are yet to be surveyed and titled.

IN VIEW HEREOF, the Regulation and Permitting Section are please to inform you that the Rapid Land Tenure Appraisal (RLTA) project in the Municipality of San Agustin has been successfully accomplished. Nevertheless, there are still plenty of available and workable lots in the Municipality, hence, it is the recommendation of the undersigned to expand the program and increase the number of recipients. By increasing the number of recipients we will be able to reach the poorest of the poor and have their properties surveyed and titled as well since it is the core purpose of this program.
