SUBJECT

SUBMISSION OF ACCOMPLISHMENT REPORT ON LAWIN

PATROLLING WITHIN THE AREA OF RESPONSIBILITY OF CENRO-ROXAS, PALAWAN FOR THE PERIOD OF JANUARY 16,

2022 TO FEBRUARY 15, 2023

Respectfully submitted is our report re: above subject.

Please be informed that the LAWIN patrollers of this office have accomplished a total of 145.50 kilometers distance patrolled which corresponds to 291% of the total target of 50 kilometers to be patrolled from January 16 to February 15, 2023 base on the Work and Financial Plan (WRP) for C.Y. 2023.

Further informing that there are twenty-eight (28) threats recorded such as typhoon related threats, garbage, cutting of tree, charcoal, annual and perennial farming, hut or house and other infrastructure, mining and quarrying, slash and burn farming (kaingin). However most of these threats were recorded during Training on LAWIN Forest and Biodiversity Protection System for Municipal-Wide Watershed Conservation Law Enforcement Stakeholder in San Vicente Municipality facilitated by USAID Safe Water and the representatives of this office served as resource speakers for learning purposes of the above activity.

Moreover, this office has already sent request to the LAWIN helpdesk to delete the said patrol data.

For record and consideration.

# **Summary Patrol Report**

Region 04B - Roxas-Pal

Number of days analyzed:

30

21 Feb 2023 2:55 PM

This report presents the patrol performance and quality of the implementing unit during the above stated period of time (number of days). The report contains information on accomplishment rate, coverage and intensity of patrolling in different forest types on patrol distance covered per patroller. The information is meant to provide a basis for patrol planning for the next planning period and implementation of adaptive measures to enhance patrolling as necessary.

### Overall accomplishment rate\*

### Level of Accomplishment

Accomplishment
Target

Accomplishment\* for the period 145.50

Target\* distance for the period

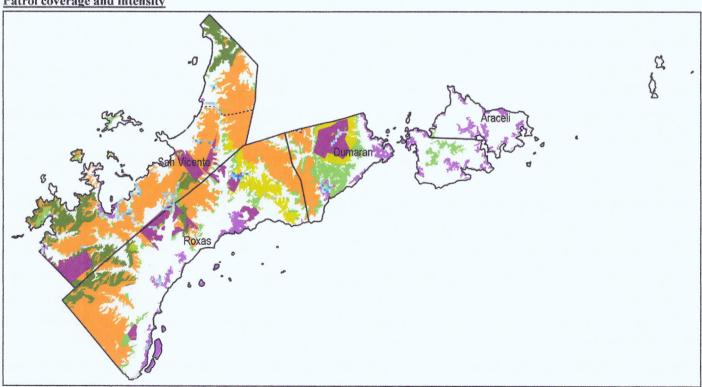

114.75

**Accomplishment Rate:** 

126.81%

\*Target is computed based on 10km target per team of 4 DENR patrollers per month

#### Patrol coverage and intensity

## Patrol distance covered by each forest ranger

Forest Ranger	Patrol Distance Accomplished		
Marco Angelo Marquez	94.19		
Lemuel Bacalla	82.36		
Armando Gabayan	80.86		
Christopher Padrones	78.94		
Nolly Billones	56.84		
Merma Saddin	49.21		
Alvin Maduro	49.04		
Enrique Jardin	42.68		
Charlie Rabang	42.47		
Rommel Allan Llaniguez	42.47		
Roy Mercader	42.47		
Mark Anthony Ortega	30.05		
Ryan Giganto	30.05		
James Tajon	29.77		
Joven Aquino	19.04		
Efren Esparagoza	17.60		
Rogelio Yaquitin	9.98		
Alonso Tabangay	8.97		
Markwilliams Sotoza	8.81		
Ronnie Jann Ian Mabitasan	8.81

# **Summary Threat Report**

### Region 04B - Roxas-Pal

Number of days analyzed:

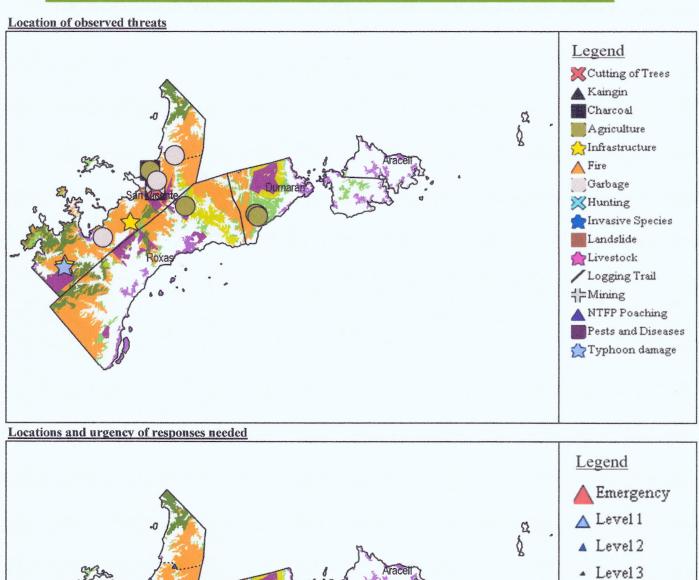

30

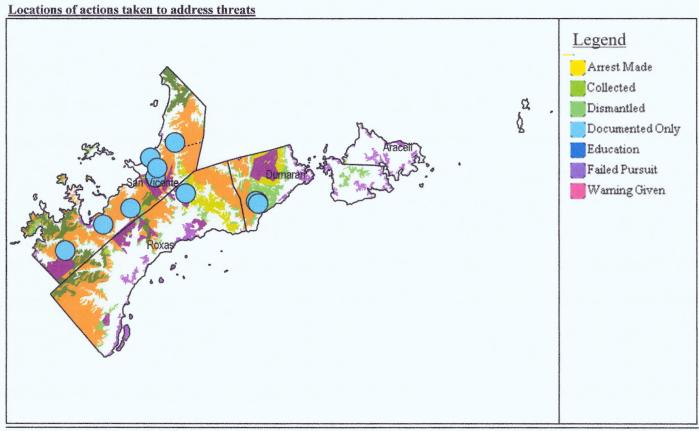

21 Feb 2023 2:53 PM

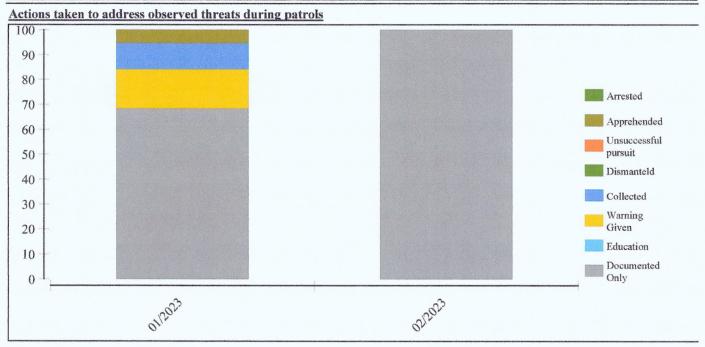

This report presents information for the implementing units of DENR to effectively plan and carry out actions for adressing observed threats to the forest.

### Threats observed and level of response required

Threat	No. of Observations	Emergency - Immediate action required!	Level 1 - Action required within a week	Level 2 - Action required within a month
Annual and Perennial Farming	7	0	1	1
Garbage	5	2	0	2
Typhoon-related Threats	5	0	0	0
Hut or House and Other Infrastructure	4	0	1	2
Charcoal	2	0	2	0
Cutting of Trees	2	1	0	1
Landslide and Mudslide	1	0	0	0
Mining and Quarrying	1	0	0	0
Slash and Burn Farming (Kaingin)	1	0	1	0

# **Forest Protection Effectiveness Report**

### Region 04B - Roxas-Pal

Number of days analyzed:

30

21 Feb 2023 2:56 PM

This reports presents trends in observations of forest condition, regeneration, threats and indicator species. The combined presentation allows for an evaluation if protection efforts are effective, conservation targets are met and the forest achieves the desired future forest condition. Protection efforts are effective, when records of forest condition, regeneration and indicator species show an upward trend towards more observations more and denser regeneration, particularly in degraded forest areas. Increasing trends in indicator species suggest that the improved forest condition is providing a better habitat for forest dependent species. All trends presented are put in relation to the patrol effort to provide comparability. Forest cover data were derived from 2003 and 2010 NAMRIA land cover maps.

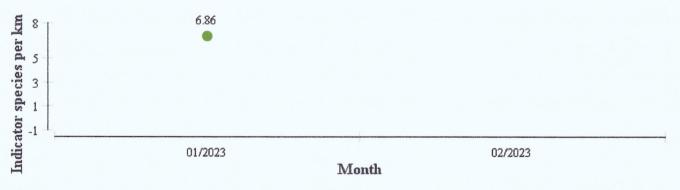

#### Trends of Observations per Patrol Kilometer in the Forest Conservation Area

### **Trend in Threats**

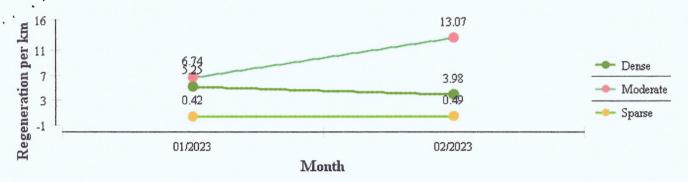

A decreasing trend in threats in the forest conservation area mean effective forest protection; an increasing trend means the opposite.

### **Trend in Indicator Species**

An increasing trend in indicator species in the forest conservation area means effective forest protection; a decreasing trend means the opposite.

## Trends in Regeneration Density

An increasing trend in regeneration means effective forest protection; a decreasing trend means the opposite.

### **Trends of most common Threats**
