BARANGAY SAMARINIANA, BROOKE'S POINT,  
PALAWAN

Last 02 February 2023, the undersigned, personnel of MGB MIMAROPA and CENRO Brooke's Point conducted an investigation in response to a call from a CENRO personnel regarding the illegal extraction of sand and gravel in late afternoon to evening hours in Brgy. Samariniana, Brooke's Point.

**Background Information**

Last 01 February 2023, a CENRO personnel informed the undersigned regarding an ongoing extraction of sand and gravel materials in Tamlang Dam, located in Sitio Tamlang, Brgy. Samariniana, Brooke's Point. The information reached the MGB personnel around 5:15 PM. It was then decided that the report will be investigated the following day. Due to prior commitments, the investigating team was only available in the afternoon of the following day 02 February 2023, at around 4:30 PM a tip regarding the start of the extraction was received by this office. The investigating team assembled past 5:00 PM and proceeded to the site after another information came that the extraction was still ongoing.

An investigation regarding an allegedly quarry operation was also conducted in the area last 24 January 2023, however, no equipment or personnel were observed<sup>1</sup>.

<sup>1</sup> Investigation report on the alleged illegal quarry operation in Sitio Tamlang, barangay Samariñana, brooke's point, palawan.

## Findings and Observations

1. The subject area is an irrigation dam in Sitio Tamlang, Brgy. Samariniana, Brooke's Point, Palawan geographically located at 8°45'1.81"N, 117°43'44.87"E (*Figure 1*). It is ~18.5 kilometers away from CENRO Brooke's Point, and can be reached within ~30 minutes of vehicle travel.

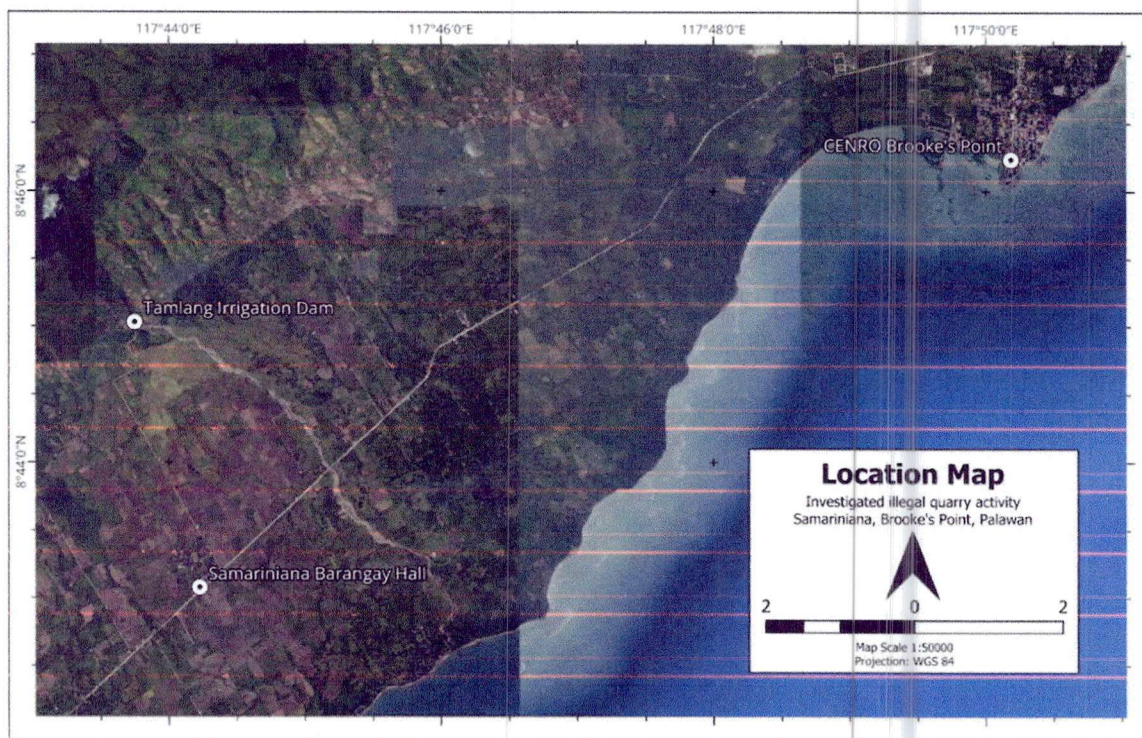

Figure 1. Location map of the investigated report of illegal quarry activity in Sitio Tamlang, Barangay Samariniana, Brooke's Point, Palawan

2. Prior to the arrival at the subject area, approximately 600 meters away from the Tamlang Dam, the team encountered one truck carrying sand and gravel materials (see photo documentation). The driver was asked to stop for inspection. The monitoring team identified themselves and mentioned the reason for the inspection. The truck driver, Mr. Pegie Tonel, was interviewed and the company, JCBB Construction Inc, he said that the materials were to be delivered to a high school in Samariniana to be used as fill material. The necessary documents for the transport of such material were asked from the driver, however, no documents were presented. It was explained by the team that transporting earth materials without pertinent documents is a violation of the law hence, truck and aggregates will be taken into custody.
3. The undersigned also had a dialogue with the PMRB representative in the area, Mr. Edgar Montimer. Mr. Montimer mentioned that the operation of JCBB Construction was being conducted with consent from their office. He affirmed that the earth materials were for the local high school in the area. He further added that portions of the excavated aggregates were also asked by a few unnamed barangay kagawads of Brgy. Samariniana. It was elaborated that their office allowed a limited volume to the company and was supposedly end the operation that very day. When asked if any of these transactions have any compensation and written documentation, he answered

that there was never any amount of compensation and that the agreement was done verbally.

4. Given the circumstances of the activity involving the barangay, the team decided to bring the truck to the CENR Office for custody. At past 8:00 PM, when the team reached the CENRO and while seizure receipts were being prepared, the CENR Officer called the team and mentioned that number of politicians had called him regarding the apprehension. He asked why the truck was apprehended and gave strict instructions for the custody of the truck, it must be taken back to the barangay where it was apprehended.

At the same time, a representative of JCBB Construction, Mrs. Airene Ramboyong also came to the CENRO asking about the reasons for apprehension. It was explained by the team that the truck was caught in the act of transporting aggregates without any documents to show the legality of the action and had an existing cease-and-desist order from MGB MIMAROPA. Mrs. Irene explained that the aggregates were mainly for the NTF-ELCAC Road Concreting Project. The mentioned delivery to the local high school was requested to the JCBB to be used as filling material in the wet patches on the school ground. Similarly, certain barangay officials have also requested a volume of aggregates delivered to them for personal use.

The team also asked why the company conducted the activity during such late hours. The only response by JCBB was that they are busy doing other work in the mornings and are only available in the late afternoons.

5. Following the instruction of CENRO, it was decided that the truck will be driven back to the Barangay Samariniana for custody. However, there was an issue with the front right wheel of the truck and it was losing air pressure. The travel to Samariniana will be very perilous as the truck will be lopsided and the other front wheel can rupture from the excess load that it needs to carry. For the safety of the personnel and the equipment, it was decided that the wheel will be replaced in the nearby JCBB compound prior to travel.

At ~10:40 PM the replacement of the wheel was still not finished due to a failing jack. The team decided to leave the truck there overnight before transporting it to Samariniana in the morning. Strict instructions were communicated with the caretaker and owner, Mrs. Divine Bautista, that the aggregates and truck must be left as it is.

6. The following morning, February 3 the undersigned went to follow up on the status of the truck, upon arrival on the site, the aggregates were already dumped on the waterlogged area of the JCBB compound (see photo documentation).

The team then tried to coordinate with the barangay captain however, he refused to be the custodian of the apprehended truck. The team then talked with Mrs. Bautista where she presented a letter from the Samariniana Irrigators Association requesting for the dredging of the Tamlang Dam, a certification from the PMRB showing no objection from the clearing of waterways as support to NTF-ELCAC Project, and the Barangay Resolution No. 24-2021 of Barangay Samarinia requesting for issuance of Government Gratuitous Permit for the NTF-ELCAC project (Annex A, B, and C respectively). The team explained that these documents are not a substitute for a

gratuitous permit but rather, a part of its requirements. The proponent said that there was strictly no commercial disposition of the material and was mainly used for the NTF-ELCAC project.

7. Given that there were still no legal documents to support the activity extraction in the subject area, the team ordered the proponent to pull out all their equipment from the Tamlang Dam and stop its operation until such government gratuitous permit is granted by the PMRB.

### **Comments and Recommendations**

1. To the JCBB Construction, the company should strictly adhere to the issued Cease and Desist Order, last 27 October 2022, and should not conduct any quarrying activities without the pertinent quarry permits (Annex D). The presented Barangay Resolution and PMRB clearance is not a substitute, but a requirement in the compliance of Government Gratuitous Permit. Hence, the activity is a violation of section 103 of Republic Act 7942, theft of minerals.

*“Any person extracting minerals and disposing the same without a mining agreement, lease, permit, license, or steals minerals or ores or the products thereof from mines or mills or processing plants shall, upon conviction, be imprisoned from six (6) months to six (6) years or pay a fine from Ten thousand pesos (P10,000.00) to Twenty thousand pesos (P20,000.00) or both, at the discretion of the appropriate court. In addition, he shall be liable to pay damages and compensation for the minerals removed, extracted, and disposed of. In the case of associations, partnerships, or corporations, the president and each of the directors thereof shall be responsible for the acts committed by such association, corporation, or partnership.”*

In addition, the extracted materials are considered to be illegally sourced mineral/mineral products. Section 116 Chapter XII of DAO 2010-21 defines this as,

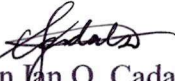

*“Illegally sourced minerals/mineral products are those which are mined, extracted, removed, and/or disposed of without the authority or permit under existing mining laws, rules and regulations.”*

2. The PMRB is asked to further explain the case with JCBB Construction Inc. Should they implement a clearance for a proponent, there should be a written agreement and that concerned offices such as DENR-CENRO, MGB, etc. be copy furnished. Furthermore, the same office is advised to impose the law and should promote the legal way of quarrying/extraction activity rather than tolerating illegal activities.
3. The barangay is advised to continuously monitor the sand and gravel activities in the area in accordance to the powers, duties, and functions of the chief executive of the barangay as stipulated in Item B.9, Section 389 of the Republic Act 7160 or the Local Government Code of 1991:

*“Enforce laws and regulations relating to pollution control and protection of the environment”.*

Dear Sir:

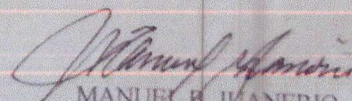

In lieu of the current influx of gravel erosion which clog-in at the Tamlang Catchment and cause the slow flow of water that supply our rice paddies ended To shortage of water supply from the basin.

We have initially made immediate action to meet the problem temporarily by utilizing the back hoe lends by the municipal engineer.

We intend to have the catchment totally silted of gravel and to have the basin clear and deeper to stock enough water for the farm.

In aver of the above, may I, request from your good office the approved for the total dredging of the catchment and further ejected gravel be used to backfill at the barangay and others

Thank you and more power.

Barangay Samariniãna  
Brooke's Point, Palawan

**Dear Mrs. D. Bautista:**

Please be informed that CENRO – Brooke's Point confirmed that you have been conducting sand and gravel operation Barangay Samariniãna, Brooke's Point, Palawan without a valid mining permit.

The above-cited extraction and disposition of sand and gravel materials without a mining permit is equivalent to theft of minerals pursuant to Section 103 of Republic Act (RA) No. 7942<sup>1</sup>, **which provides that:**

*"Theft of Minerals – Any person extracting minerals and disposing the same without a mining agreement lease, permit, license, or steals mineral or ores or the products thereof from mines or mills or processing plants..xxx"*

Hence, you are hereby ordered to immediately **CEASE AND DESIST** from conducting sand and gravel activities without a valid mining permit. This is without prejudice to the filing of appropriate charges against you with the proper court for violation of the applicable provisions of RA No. 7942.

Please be guided accordingly. Thank you.

Very truly yours,
