February 23, 2022

MEMORANDUM

FOR : The CENRO
THRU : The OIC-CDS Chief
FROM : The Undersigned
SUBJECT : FLYING FOX MONITORING FOR NEW SITE IN
BARANGAY JOLO, ROXAS, ROXAS, PALAWAN

Please be informed that the undersigned CDS staff conducted flying fox (kabog) monitoring for new site in Barangay Jolo, Roxas, Palawan on February 20, 2023.

The activity started with communication, education and public awareness (CEPA) about flying foxes as keystone species and its basic biology. FT Chuckie Aguilos explained that flying foxes are protected species under RA 9147 (Philippine Wildlife Act). Other topics were discussed like Marine Debris by ECOMS I Jane Juarez and Coral and Seagrass Ecosystem by FT I Karl Aries Sumandal. ECOMS I Jo Annie Corvera informed the Barangay Council and other participants to invite DENR CENRO Roxas if they need lecturers about environment topics. The CEPA was concluded with the turnover of posters.

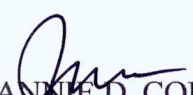

After the CEPA activity, the team proceeded to Verde Island South and North where it was reported that it is a roosting site for flying foxes. The locals said that the island was severely affected by Typhoon Odette in 2021 and the population declined greatly. The team waited until 6:45PM but there was no flyout, possibly because of the bad weather and the sky became too dark to see and do flyout count. The team decided to end the activity. The team will come back in the summer for another monitoring since it is the second flying fox population documented in Roxas, Palawan.

For information and record.
